

VENKATA PRASAD KRUPANANDA

Data Analyst

Location: TX • Email: venkatakrupananda@gmail.com • Phone: +1 (903)-423-3014

SUMMARY

Data Analyst with 4+ years of experience delivering actionable insights and data-driven solutions **across consulting, energy, and technology sectors**. Skilled in **SQL, Python, and R** for advanced **data analysis, statistical modeling, and predictive analytics**. Proven expertise in designing **ETL pipelines, building Tableau and Power BI dashboards**, and applying **machine learning models** to optimize operations, forecast demand, and enhance revenue strategies. Experienced in supply chain analytics, inventory optimization, and KPI reporting, with hands-on exposure to **AWS, Azure, and GCP cloud platforms**. Adept at collaborating in **Agile** environments, translating complex datasets into executive-ready insights, and driving operational efficiency through data-informed decision-making.

EXPERIENCE

MCKINSEY & COMPANY	USA
Data Analyst	Jul 2024 - Present
• Formulated complex SQL queries on PostgreSQL to unify fragmented client operational data across multiple business units, automating workflows and improving data accessibility. • Orchestrated Python-based regression models to evaluate sales performance drivers for retail clients, providing actionable predictive insights that informed revenue strategy. • Synthesized exploratory data analysis in R tidyverse on global supply chain datasets, uncovering operational bottlenecks and optimizing inventory processes. • Streamlined business intelligence reporting by developing Tableau dashboards for regional banking divisions, enabling executives to monitor KPIs and enhance decision-making. • Evaluated digital transformation pilots in healthcare systems through hypothesis testing and ANOVA-driven statistical analysis, validating \$12M in projected cost savings for client implementation strategies. • Automated ETL pipelines in AWS Redshift to integrate marketing, CRM, and sales datasets, reducing query execution time from 9 minutes to under 4 minutes. • Facilitated Agile sprints using JIRA to deliver scenario modeling and stakeholder reporting for government projects, producing 15 client-ready analytical reports. • Modeled customer behavior for a telecom client using clustering and time-series forecasting in scikit-learn, driving targeted campaign strategies and incremental revenue growth.	
ADANI	INDIA
Data Analyst	Dec 2020 - Aug 2022
• Optimized port logistics by conducting Exploratory Data Analysis (EDA) in Python, uncovering root causes of vessel delays and designing data-driven recommendations that improved operational efficiency across the shipping network. • Designed automated SQL dashboards (PostgreSQL) for business intelligence reporting on electricity distribution KPIs, giving state-level managers real-time visibility and ensuring faster response to operational anomalies. • Developed demand forecasting models using predictive modeling and Time Series Forecasting in R, aligning delivery schedules with consumption patterns to prevent recurring shortages and reduce unnecessary carrying costs. • Built interactive Power BI dashboards to support executive decision-making, presenting renewable energy project data in intuitive formats that guided strategic capacity planning. • Streamlined supply chain analytics for Adani's agribusiness vertical, applying inventory optimization techniques that enabled better tracking of perishable commodities and improved delivery performance across regional hubs. • Engineered scalable ETL pipelines using AWS Redshift and S3 for data integration and cleansing, consolidating subsidiary-level energy data into a unified structure that enhanced reporting accuracy and speed. • Conducted regression-based statistical analysis on airport operations data, collaborating with cross-functional teams to pinpoint key drivers of passenger delays; process changes cut check-in wait times by 12 minutes per traveler, improving flow for 8.5 million passengers annually.	
DELL TECHNOLOGIES	INDIA
Data Analyst	Dec 2019 - Dec 2020
• Developed SQL-based data pipelines to integrate manufacturing data from the Sriperumbudur plant; improved accuracy and speed of OTIF and defect tracking reports for plant managers. • Formulated predictive analytics models in Python to strengthen shipment forecasting; supported the Make in India program by aligning demand planning with actual production trends. • Produced Tableau dashboards for leadership across AI and cloud R&D projects in Bengaluru; enhanced visibility into KPIs, enabling faster project reviews and resource allocation.	

- **Conducted** statistical modeling in R on logistics operations; identified recurring delivery bottlenecks and provided insights that shaped vendor strategy in the Asia-Pacific region.
- **Orchestrated** data integration workflows on AWS (S3, Athena, Redshift) combining data from multiple enterprise systems; boosted data availability for global BI and analytics teams.
- **Championed** controlled testing on Dell's SMB digital platform, analyzing engagement patterns of 42,000 users; findings informed product roadmap decisions and drove higher feature adoption.

SKILLS

- **Data Analysis & Interpretation:** Exploratory Data Analysis (EDA), Trend Analysis, Root Cause Diagnosis, KPI Tracking
- **Analytical Thinking:** Business Insight Generation, Hypothesis Testing, Scenario Modeling, Decision Support
- **Supply Chain Analytics:** Inventory Optimization, Demand Forecasting, Lead Time Analysis, Logistics Metrics, OTIF Tracking
- **Visualization & Reporting:** Tableau, Power BI, Looker, Excel (Pivot Tables, Power Query), Data Storytelling
- **SQL & Databases:** Complex Queries, Window Functions, Joins, CTEs, MySQL, PostgreSQL, Google BigQuery
- **PROGRAMMING:** PYTHON (PANDAS, NUMPY, MATPLOTLIB, SEABORN), R (TIDYVERSE, GGLOT2)
- **STATISTICAL METHODS & MODELING:** A/B TESTING, REGRESSION (LINEAR & LOGISTIC), TIME SERIES FORECASTING, CLUSTERING, ANOVA
- **DATA ENGINEERING BASICS:** ETL DESIGN, DATA CLEANING, API DATA INTEGRATION, DATA MODELING
- **CLOUD PLATFORMS:** AWS (S3, ATHENA, REDSHIFT), AZURE (DATA FACTORY, SYNAPSE), GCP (BIGQUERY, CLOUD FUNCTIONS)
- **MACHINE LEARNING (APPLIED):** SCIKIT-LEARN, FEATURE ENGINEERING, MODEL EVALUATION, CLASSIFICATION MODELS
- **TOOLS & COLLABORATION:** GIT, GITHUB, JIRA, AGILE/SCRUM FRAMEWORKS

EDUCATION

NEW ENGLAND COLLEGE USA	
MASTER OF SCIENCE IN DATA SCIENCE AND ANALYTICS	July 2025- March 2027
TEXAS A&M UNIVERSITY-COMMERCE USA	
MASTER OF SCIENCE IN MARKETING AND MARKETING ANALYTICS	Aug 2022- May 2024
ST. JOSEPH'S COLLEGE OF COMMERCE INDIA	
BACHELOR OF COMMERCE	June 2017- Dec 2020
