## Education:

Stony Brook University - Stony Brook, NY  
Bachelors of Science in Computer Science

May 2025  
Specialization: Artificial Intelligence and Data Science

## Work Experience:

**Classroom Technology DoIT (Classroom Technician)** - Stony Brook, NY *January 2023- May 2025*

- Resolved a high volume of AV equipment issues, ensuring smooth class and event operations.
- Diagnosed and repaired microphones, lavaliers, projectors, and lecture capture systems
- Assisted faculty with classroom tech such as PowerPoint, Zoom, and Solstice content sharing for presentations.

**Robotic S.T.E.A.M (Teaching Assistant)** - Brooklyn, NY *July 2023 - August 2023*

- Taught programming concepts in Scratch and Roblox Studio to beginner and intermediate students.
- Guided students through hands-on robotics projects using LEGO engineering kits.
- Designed and delivered engaging STEAM lessons that increased student participation and project completion.

## Projects/Research:

**HR Analytics Dashboard - (Tableau, Python, Pandas, Faker)** *August 2025*

- Built interactive HR analytics dashboard in Tableau analyzing demographics, hiring/termination trends, and salary patterns.
- Generated 8,950 synthetic HR records in Python (Pandas, NumPy, Faker) with probability-based demographic/job role distributions.
- Applied transformations for age, adjusted salaries, and hire/termination date consistency.

**Life Financial Planner - (JavaScript, HTML, MongoDB, Recharts)** *January 2025 - May 2025*

- Developed a financial forecasting model to project investment growth, tax liabilities, and retirement income under multiple scenarios.
- Implemented Monte Carlo simulations and percentile-based projections in Recharts to quantify uncertainty in long-term outcomes.
- Designed data pipelines to process user inputs into scenario-driven financial metrics, enabling comparative analysis of strategies.
- Integrated Node.js/Express APIs with MongoDB for storing structured plan data and supporting real-time model recalculations.

**Predictive Analytics for Student Success - (Python, Jupyter Notebook)** *August 2024 – May 2025*

- Built a predictive classification model to identify at-risk students using 649 academic and behavioral records.
- Cleaned and preprocessed data; trained Logistic Regression, Random Forest, SVM, and KNN models.
- Selected best model using precision, recall, F1-score, and ROC AUC; visualized results in Matplotlib.

## Certifications:

- Google Data Analytics Professional Certificate – (Coursera) *August 2025*

## Skills:

- Data Science:** Python, R, SQL, Pandas, NumPy, Scikit-learn, Matplotlib, Tableau
- Programming:** JavaScript, TypeScript, Java, C, Kotlin, Assembly
- Tools:** React, Node.js, Microsoft Office Suite, Google Workspace, AutoCAD, Fusion 360, Blender, Photoshop
