

Vijaya Nishitha Vatter

Data Analyst

Milwaukee, WI | +1 (414) 275-9005 | vijayanishitha1811@gmail.com | [LinkedIn](#)

SUMMARY

Entry-level Healthcare Data Analyst with hands-on experience in data cleaning, validation, analysis, and reporting across structured and regulated data environments. Skilled in SQL, Python, Excel, Power BI, and Tableau, with a strong interest in healthcare analytics, data accuracy, and compliance-driven reporting. Adept at translating complex datasets into clear, actionable insights that support operational and clinical decision-making while following data privacy and security best practices.

SKILLS

Data Analysis & Business Intelligence:

Healthcare Data Analysis, Data Cleaning & Validation, Descriptive Analytics, Trend & Anomaly Detection, KPI Reporting, Data Documentation, Reporting Automation

Programming & Tools:

SQL (Joins, Aggregations, Data Extraction), Python (Pandas, NumPy), Excel (Pivot Tables, Power Query), R (Foundational)

Data Visualization Platforms:

Power BI, Tableau

Healthcare & Compliance:

Exposure to EHR- and claims-style data, HIPAA awareness, Data Privacy & Security Standards

Collaboration & Communication:

Stakeholder Support, Cross-Functional Collaboration, Remote Teamwork, Technical & Process Documentation

EXPERIENCE

PNC Financial Services, Data Analyst

Dec 2024 – Present

- Clean and validate large, sensitive datasets using SQL and Python, applying structured quality checks aligned with regulated data standards.
- Perform descriptive data analysis to identify trends, patterns, and operational anomalies that support business decision-making.
- Assist in the development and maintenance of Power BI dashboards used to track KPIs and operational performance metrics.
- Write and execute SQL queries to extract, structure, and prepare datasets for reporting and ad-hoc analysis.
- Document data sources, transformation logic, and reporting workflows to ensure consistency, accuracy, and transparency.
- Collaborate with analysts, engineers, and business stakeholders in a remote environment while adhering to data security best practices.

Genius SoftTech, Data Analyst

Jan 2021 – Jul 2023

- Supported data collection, cleaning, and validation across CRM and ERP systems to ensure accurate and reliable reporting.
- Assisted senior analysts with descriptive analytics to identify trends and performance insights.
- Built and maintained Tableau dashboards for internal stakeholders to improve visibility into operational metrics.
- Executed SQL queries to extract and organize datasets for recurring reports and analysis.
- Contributed to documentation of data definitions, reporting processes, and analytical methodologies.
- Worked closely with cross-functional teams in a remote setting to support analytics project goals.

Proxy Web Solutions, Marketing Research Analyst

Jan 2019 – Dec 2020

- Collected, cleaned, and analyzed structured and survey-based datasets to identify behavioral and performance trends.
- Applied descriptive statistical techniques to evaluate campaign effectiveness and customer engagement patterns.
- Supported data visualization and reporting efforts using Excel and R to communicate insights to non-technical stakeholders.
- Assisted in maintaining data accuracy, consistency, and documentation across research initiatives.

EDUCATION

Masters in Computer Science

University of Wisconsin, Milwaukee

Sep 2023 – May 2025
