Profile

Full Stack Developer with 2+ years of experience in designing and deploying scalable web applications using Python (Django, Flask), JavaScript (React, Angular), and RESTful APIs. Proficient in building responsive user interfaces, robust backend systems, and integrating cloud services like AWS (EC2, S3, RDS, Lambda). Skilled in working with PostgreSQL, MySQL, MongoDB, and Redis, with hands-on experience in Docker, Git, Jenkins, and CI/CD pipelines. Adept at Agile development, version control, and automated testing (PyTest, JUnit), with a strong focus on performance, security, and clean code practices.

Skills

- **Programming & Scripting:** Python, JavaScript (ES6+), HTML5, CSS3, SQL, Bash
- **Web & Application Development:** Django, Flask, FastAPI, React.js, Angular, Redux, Bootstrap, Tailwind CSS, AJAX, jQuery, RESTful APIs, GraphQL (basic), JWT, OAuth2, WebSockets
- **Databases & Data Management:** PostgreSQL, MySQL, MongoDB, SQLite, Redis, Django ORM, SQLAlchemy, Data Serialization (JSON, XML)
- **Cloud, DevOps & Tools:** AWS (EC2, S3, RDS, Lambda, IAM, CloudWatch), Docker, Jenkins, Git, GitHub, GitLab, GitHub Actions, CI/CD, NGINX, Linux (Ubuntu/CentOS), Visual Studio Code, PyCharm, Swagger/OpenAPI
- **Testing, Methodologies & Workflow:** PyTest, UnitTest, JUnit, Selenium, Postman, Agile/Scrum, TDD/BDD, MVC/MVT architecture, Secure Coding, Performance Optimization, Code Reviews, JIRA, Confluence, Trello, Notion

Professional Experience

Full Stack Developer, SkillShare 06/2024 – Present | Remote, USA

- Developed and deployed a dynamic, SEO-optimized web application using React, Next.js, and Redux, enhancing UI performance, accessibility, and user engagement across all devices.
- Engineered RESTful APIs and backend services using Django, Node.js, and Express.js, integrating PostgreSQL with SQLAlchemy and Sequelize ORM to ensure efficient data handling and relational integrity.
- Implemented secure user authentication and authorization using JWT and OAuth 2.0, and integrated Stripe and SendGrid APIs for seamless payment processing and email notifications.
- Containerized and deployed applications using Docker on AWS Elastic Beanstalk, with AWS RDS for database management and automated CI/CD pipelines via AWS CodePipeline, GitHub Actions, and Jenkins.
- Conducted robust testing with Jest, React Testing Library, Pytest, and Supertest, reducing production bugs and improving application reliability within Agile/Scrum team workflows.

Full Stack Developer, Genpact 08/2020 – 12/2021 | Pune, India

- Designed and implemented modular, RESTful APIs using Python (Flask/FastAPI) and Node.js (Express) following MVC architecture, supporting robust backend functionality for gold loan scheduling and processing.
- Built dynamic, mobile-responsive interfaces with React.js and Next.js, utilizing React Hooks, SSR, and reusable components to enhance user experience and application performance.
- Integrated frontend and backend components using AJAX and REST APIs, enabling real-time data flow and seamless user interactions for loan release appointments.
- Wrote optimized SQL queries and performed data transformations with PostgreSQL, improving system performance and reducing latency in data processing workflows.
- Collaborated in Agile development cycles using Jira for sprint planning, issue tracking, and task management while maintaining code versioning and collaboration through Git/GitHub.
- Improved service usability by streamlining workflows, implementing responsive design, and optimizing UI/UX, resulting in higher customer satisfaction and reduced manual interventions.

Education

Master of Science, Trine University 06/2024 – 05/2026 | Detroit, USA
Information Science

Master of Science, The University of Texas at Arlington 01/2022 – 05/2024 | Arlington, USA
Computer Science

Bachelor of Engineering, Savitribai Phule University 08/2017 – 05/2021 | Pune, India
Computer Engineering

PROJECTS

AI-Powered Document Summarization System, Python, FastAPI, React, PostgreSQL, Docker

- Built a responsive frontend using HTML, CSS, JavaScript, and connected it to a Flask backend to fetch and display transaction status and volume.
- Visualized time-based transaction trends using Chart.js, and implemented backend filters to support date, region, and type.
- Used PostgreSQL for structured data storage, wrote basic ER diagrams for planning, and tracked changes via Git.
