EDUCATION

Drexel University, Master of Science in Business Analytics, Minor - Finance **Sep 2022 - Mar 2024**

Coursework: Data Visualization, RDBMS, Statistics, Operations Research, Corporate Finance, Investment Management

University of Texas, Post Graduate Program in Data Science

Jul 2020 - Aug 2021

Coursework: Marketing Analytics, Finance & Risk Analytics, Machine Learning, Time Series Forecasting, NLP

SKILLS & CERTIFICATIONS

Programming Languages: Python, SQL, R Programming Basics

Tools: Tableau, Power BI, Alteryx, Git, Microsoft Office (Excel, Word, and Power Point), KNIME

Certifications: Product Analytics Micro-certification, Alteryx Designer Core, Basics of Project Management

WORK EXPERIENCE

TD Bank

Aug 2024 - Present

Anti Money Laundering Analyst

King of Prussia, USA

- Consolidated, cleaned, and analyzed customer transactional data, conducted due diligence (CDD) and performed internet research to accurately assess customer profiles, information, risk levels and detect suspicious activity.
- Developed Excel visualizations, pivot tables and charts to analyze and substantiate flagged transaction decisions with 95% accuracy, ensuring regulatory compliance and mitigating risks of money laundering.
- Streamlined AML reporting by creating a VBA automation script for standardized narration, significantly reducing redundancy, error rates in narrations and improving alert processing accuracy and speed.

Arlite Technology LLC

Jun 2023 - Aug 2023

Business Development Intern - Analytics

Philadelphia, USA

- Increased email outreach by 200% using Apollo.io and targeted communication strategies, enhancing campaign reach while maintaining a structured database of 5,000+ contacts and communications.
- Improved email response rates by 100% through A/B testing and content optimization, ensuring efficient follow-ups and seamless pipeline tracking for better conversion rates.

Drexel University

Apr 2023 - Aug 2023

Graduate Data Analyst

Philadelphia, USA

- Analyzed 17 years of US skyboarding industry data to identify employment, wage, and profitability trends. Cleaned and consolidated large datasets using Excel and developed interactive Tableau dashboards to visualize key insights.
- Extracted, analyzed, and presented Fortune 500 data using Python and BeautifulSoup, uncovering industry trends, company growth patterns, and geographic distributions through visualizations.

Tata Consultancy Services Ltd.

Mar 2018 - Aug 2022

Business Analyst

Pune, India

- Reduced ADAS feature defects by 20% through data-driven root cause analysis, leveraging Python for anomaly detection, trend analysis, and visualizations to optimize feature performance and ultimately enhance vehicle safety.
- Developed Power BI dashboards to track defect rates, recurring problems, and resolution status. Consolidated and performed multi-location data management using Excel, enabling stakeholders to prioritize high-impact issues.
- Monitored project management KPIs, optimizing workflows and resource allocation. Provided insights that improved strategic decision-making that increased overall performance by 10%.
- Led end-to-end project execution, new associate training, managing documentation and business requirements gathering, issue resolution, and test plan design delivering new project 15 days ahead of scheduled time.
- Drove cross-functional collaboration and implemented agile methodologies to enhance efficiency, reducing project cycle time by 10 hours per week.

PROJECTS

Pediatric Healthcare Analysis | Hypothesis Testing, Data Cleaning, Storytelling

- Utilized Python for merging and cleaning of 3M+ row USA Pediatric Healthcare datasets ensuring data quality.
- Performed exploratory data analysis and hypothesis testing to verify the correlation of socioeconomic factors with pediatric healthcare issues and carried out regional and racial segmentation analysis to devise strategies.
- Showcased dashboards using business intelligence tool and provided research-backed cost-benefit analysis & recommendations to save estimated \$1M+ in pediatric healthcare expenditures and reduce cases by 30%.

Flight Delay Prediction | Machine Learning (ML), Logistic Regression, Decision Trees, KNN, Random Forest Classifier

- Built an efficient data pipeline with Alteryx application for ETL (Extract-Transform-Load) and SQL (PostgreSQL) database, efficiently managing 3Gb+ complex data sets to maintain data integrity for further analysis.
- Programmed classification predictive modeling with hyperparameter tuning to predict airline flight delays with 85% accuracy.

Ship Price Evaluation | Linear Regression, Regression Trees, Generative AI

- Predicted ship prices with 92% accuracy using Multiple Linear Regression and Regression Trees.
- Enhanced model performance by generating 5000 synthetic data entries with Generative AI.
