

HAMZA SHAIKH

Data Scientist

• **Location:** OH • **Email:** hamzas7251@gmail.com • **Mobile:** (+1) 216 650-7620 • [LinkedIn](#)

SUMMARY

- Data Scientist with 4+ years of experience in Data Extraction, Data Modelling, Data Wrangling, Statistical Modeling, Data Mining, Machine Learning, and Data Visualization.
- Proficient in guiding projects through the Software Development Life Cycle, encompassing Analysis, Design, Development, Testing, Deployment, and Support, and adept at working within Agile and Waterfall methodologies.
- Working experience in developing Web Services with Python and R programming languages.
- Skilled in crafting and designing statistical models using diverse R packages, Python libraries, and SAS procedures/functions.
- Demonstrated mastery of a spectrum of machine learning algorithms, including logistic regression, random forest, KNN, SVM, neural network, linear regression, Naive Bayes, K Means, and CNN.
- Proficient in various packages in Python and R like ggplot2, pandas, NumPy, Seaborn, SciPy, Matplotlib, and TensorFlow.
- Well-versed in the creation of visualizations, interactive dashboards, reports, and data stories using popular tools like Tableau and Power BI.
- Proficient in database management with a solid understanding of Stored Procedures, Functions, and Triggers, coupled with the ability to write complex queries using SQL Server and MySQL.
- Strong understanding of the principles of Data warehousing, Fact Tables, Dimension Tables, Star, and Snowflake schema modeling.
- Good experience in client-side designing and validations using HTML5, CSS3, and JavaScript
- Good communication skills, analytical mind, people skills, a team player, an individual contributor, and a quick learner to adapt to new technologies, and processes

PROFESSIONAL EXPERIENCE

MetLife, OH
Data Scientist

May 2023 - Current

- Engaged in the software life cycle within SDLC and Agile methodologies, involving the creation of requirements and test plans.
- Utilized Python with Pandas, NumPy, seaborn, SciPy, Matplotlib, Scikit-learn, and Ggplot2 to implement diverse machine learning algorithms, employing techniques such as linear regression, naive Bayes, Random Forests, K-means, and KNN for comprehensive data analysis.
- Spearheaded a team of data scientists in the successful development of a customer segmentation model, resulting in a notable 25% enhancement in personalized marketing campaigns.
- Proficiently generated reports and visualizations based on data insights, primarily utilizing Tableau and contributing to the development of dashboards.
- Optimize Snowflake performance by 30%, resulting in improved user experience through query tuning, performance troubleshooting, and innovative solutions.
- Optimized the data preprocessing workflow, achieving a remarkable 30% reduction in data cleaning time and enhancing data accuracy by an impressive 95%.
- Leveraged the MySQL Database package and Python-MySQL connector for the composition and execution of various MYSQL database queries within Python.
- Operated in development environments such as Git and MS Excel, contributing to seamless workflow processes.
- Design scalable SSIS packages for efficient handling of growing data volumes, resulting in a 10% improvement in ETL performance for large datasets.
- Build and optimize Redshift dashboards to provide real-time insights to stakeholders, leading to a 15% increase in data-driven decision-making.

7FinCorp Group, INDIA
Data Scientist

May 2019 - April 2022

- Led the implementation of the Waterfall Methodology in the development of an internal application, overseeing the entire Software Development Life Cycle (SDLC) and efficiently managing the Defect lifecycle.
- Engineered predictive models utilizing a diverse set of Machine learning algorithms, including Random Forest, Boosted Trees, Naïve Bayes, Support Vector Machines (SVM), and Logistic Regression, contributing to data-driven decision making.
- Spearheaded the automation of data integration processes, resulting in a significant 50% reduction in data processing time and enhanced accessibility for analytics teams.
- Leveraged Python for data manipulation, employing libraries such as Matplotlib, NumPy, SciPy, and Pandas to facilitate loading, extraction, and in-depth analysis of diverse datasets.
- Presented insightful dashboards to senior management using Power BI, providing a comprehensive view for better decision-making.
- Elevated inventory management efficiency by 20% through the creation of an advanced inventory forecasting model using time series analysis techniques.
- Developed robust Stored Procedures and intricate Views using Joins in SQL Server, ensuring fast and reliable data retrieval for various applications
- Performed data analysis and data profiling using complex SQL on various source systems including SQL Server and PostgreSQL
- Implemented version control using Git for the data science ecosystem, fostering collaboration and enabling efficient tracking of changes across teams.

SKILLS

- **Methodologies:** SDLC, Agile, Waterfall
- **Language:** Python, R, SQL, SAS
- **IDEs:** Visual Studio Code, PyCharm
- **ML Algorithm:** Linear Regression, Logistic Regression, Decision Trees, Supervised Learning, Unsupervised Learning, Classification, SVM, Random Forests, Naive Bayes, KNN, K Means, CNN
- **Packages:** NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow, Ggplot2
- **Visualization Tools:** Tableau, Power BI
- **Cloud Technologies:** AWS (S3, EC2, Redshift, Lambda), Snowflake
- **Database:** SQL Server, MySQL, PostgreSQL, MongoDB
- **Other Tools:** Git, MS Excel
- **Operating System:** Windows, Linux, MacOS

EDUCATION

Master of Science in Information Systems
Cleveland State University

December 2023
Cleveland, OH

Bachelor of Science Information Technology
Middlesex University

July 2018
Dubai, U.A.E
