

Mohammed Aqib

Cybersecurity Professional | Vulnerability Assessment | Network Security | Cloud Security | Secure Application Development
Denton, TX 76210 | (682)529-1330 | mohammedaqib.cs@gmail.com | linkedin.com/in/makmkh

PROFESSIONAL SUMMARY

Cybersecurity professional experienced in security monitoring, incident triage, log analysis, vulnerability management, endpoint security, and threat investigation across Windows, Linux, network, and cloud environments. Hands-on with Splunk SIEM, Microsoft Defender, Wireshark, Nessus, Nmap, Python, PowerShell, and NIST-aligned security controls.

PROFESSIONAL EXPERIENCE

IT Security Associate – University of North Texas

Aug 2025 – July 2026

- Monitored **Splunk SIEM** and **Microsoft Defender** telemetry across 1,000+ Windows endpoints, investigating security alerts, suspicious user activity, host events, and endpoint anomalies while supporting incident triage and escalation that reduced average resolution time by 40%.
- Analyzed security and network data with **Wireshark, Nmap, and Nessus**, reviewed TCP/IP, DNS, firewall, and endpoint activity, and supported vulnerability assessment, remediation tracking, and patch validation that reduced recurring vulnerability tickets by 30%.
- Supported endpoint and identity security using **Microsoft Defender, Intune, Active Directory, Group Policy, RBAC, and Duo MFA** for 200+ users across 3 departments, maintaining least-privilege controls and reducing unauthorized access incidents to zero over 12 months.
- Documented security investigations, remediation actions, evidence, and **SOPs/runbooks** while supporting audits, security awareness activities, and quarterly reviews with 100% alignment to university and **NIST-based** requirements.

Software Developer (Security Champion) – Charles Schwab

Jan 2024 – July 2025

- Served as **Security Champion** while developing Java/Spring Boot services, partnering with engineering and security teams to investigate application-security findings, assess risk, and coordinate remediation before release.
- Triage findings from **Veracode, CodeQL, Black Duck, and TruffleHog**, validated severity and root cause, and documented actionable remediation guidance for developers and DevOps teams.
- Integrated **SAST, SCA, and secrets scanning** into CI/CD workflows, improving repeatable security monitoring, finding validation, and remediation tracking across application releases.

Software Developer – ISD

Jan 2023 – Dec 2023

- Built and secured a multi-platform environment serving 25K+ monthly interactions using **RBAC, OAuth2/JWT, Firebase, logging, and least-privilege controls** across web, mobile, and administrative applications.
- Investigated authentication, API, connectivity, and suspicious application behavior using **Postman, Firebase, and log analysis**, strengthening access controls and reducing manual data exposure by 95%.
- Built Dockerized services and **GitHub Actions CI/CD** workflows with logging and secure configuration controls, improving deployment consistency, operational visibility, and response to application issues.

Research Assistant – University of North Texas

Jan 2022 – July 2023

- Developed and security-tested a Java/Spring Boot and Angular application using **Spring Security, session management, and RBAC** to validate authentication, authorization, and secure-configuration controls.
- Developed a controlled **Python ransomware proof of concept** to study endpoint behavior, AES encryption, malware indicators, logging, detection, containment, and remediation techniques in a safe research environment.

MEMBERSHIPS & AWARDS

- | | |
|---|-------------------------|
| ● Eagle Excellence Scholarship (\$20,000) – University of North Texas | January 2021 – May 2025 |
| ● Sports Analytics Hackathon Winner – University of North Texas | November 2025 |
| ● NSA Cybersecurity Certificate – National Security Agency | May 2025 |
| ● Google Cybersecurity Professional Certificate – Google | August 2025 |
| ● Discover AI Certificate (\$300 award) – AI4ALL | August 2022 |
| ● CompTIA Security+ (In Progress) | |

SKILLS

Security Operations: Splunk SIEM, Microsoft Defender, Security Monitoring, Alert Triage, Incident Response, Containment, Escalation, Phishing Investigation, Threat Hunting, ServiceNow, SOPs, Runbooks

Log & Network Analysis: Windows Event Logs, Linux Syslog, Wireshark, Nmap, TCP/IP, DNS, HTTP/HTTPS, VPNs, Firewalls, IDS/IPS, Packet Analysis, Host Logs, Network Logs

Vulnerability & Endpoint Security: Nessus, Vulnerability Assessment, Remediation Tracking, Patch Validation, Endpoint Hardening, EDR/XDR Concepts, Malware Analysis Fundamentals, IOC Analysis

Systems & Cloud: Windows, Linux, Azure, AWS, Intune, Active Directory, Group Policy, Microsoft 365, Endpoint Security, Cloud Security

IAM & Security Controls: Entra ID, RBAC, MFA, SSO, Least Privilege, Access Reviews, NIST CSF, NIST SP 800-53, Security Awareness, Audit Support

Automation & AppSec: Python, PowerShell, Bash, Java, REST APIs, Git/GitHub Actions, CI/CD, Docker, Veracode, CodeQL, Black Duck, TruffleHog, SAST, SCA, OWASP Top 10

EDUCATION

University of North Texas | **M.S. Cybersecurity**, GPA: 3.7 | **B.S. Computer Science**, GPA: 3.7
