SUMMARY

Data Analyst with over 2 years of experience in building data pipelines, creating detailed dashboards, and conducting in-depth analyses. Successfully led initiatives to forecast resource allocation and improve user engagement using predictive modeling. Skilled in leveraging tools like Power BI and ETL processes to maintain data integrity and streamline workflows. Looking to apply expertise in analytics to support data-driven decision-making and contribute to strategy development for organizational growth.

EDUCATION

- **Master's in Business Analytics** **December 2023**
California State University, East Bay, Hayward, CA, CGPA: 3.39/4
 - **Bachelors in Electronics and Communication** **July 2020**
CVR College of Engineering, Hyderabad, India, CGPA: 7.17/10
-

TECHNICAL SKILLS

- **Programming Languages:** SQL, Python, R, SAS.
 - **Methodologies:** SDLC, Agile, Waterfall.
 - **Data Visualization:** Power BI, Tableau, Microsoft Excel.
 - **Cloud Technologies:** AWS, Google Cloud Platform.
 - **Software and Tools:** Jupyter Notebook, Talend, Jenkins, Apache Spark, ETL, Git, IBM SPSS, Agile Testing, Microsoft Office Suite, Hadoop.
 - **Other Skills:** Exploratory Data Analysis, Regression Analysis, Predictive Modeling, Data Manipulation, Time Series Analysis, Data Cleaning, Data Validation, Data Wrangling
-

PROFESSIONAL EXPERIENCE

Data Analyst **May 2022 - December 2023**

Library Learning Commons / California State University, East Bay / Hayward, California.

- Created and maintained data pipelines for integrating information from various library systems, ensuring data integrity and accessibility.
- Utilized Power BI and other visualization tools to create reports and dashboards that helped library management understand student engagement with library services
- Conducted in-depth data analyses to identify trends and opportunities for process improvement, leading to more efficient troubleshooting processes.
- Designed and implemented ETL (Extract, Transform, Load) processes to consolidate data from disparate sources, such as library databases and student records, into a centralized data warehouse
- Built predictive models to forecast student demand for library resources, enabling the library to proactively allocate resources based on anticipated needs.

Associate Software Engineer **November 2020 - December 2021**

ADP / Hyderabad, India.

- Spearheaded the development and successful launch of 'Roll by ADP', a HCM mobile application tailored for small business owners. Conducted extensive data analysis on user engagement, leading to a 25% increase in employee productivity.
- Applied advanced data analytics to analyze user behavior and enhance the Electronic Form I9 experience, resulting in a 15% increase in form completion rates and improved compliance. Utilized data visualization tools like Tableau to present findings to stakeholders.
- Implemented a cutting-edge Time product, leveraging data automation techniques to reduce time and attendance tracking errors by 95%, resulting in significant payroll cost savings. Created detailed reports to track performance metrics and improvements.
- Collaborated with cross-functional teams to develop a user-friendly employee management solution. Used SQL and Python to extract and analyze data, ensuring the solution met user needs and business objectives.
- Executed advanced monitoring tools to track mobile app performance metrics, resulting in a 20% improvement in app responsiveness and a 15% reduction in average response time, enhancing overall user experience and satisfaction.
