Macomb, IL | 9203183618 | trvgurunadh@gmail.com

SUMMARY

Graduated in Computer Science from Western Illinois University. With 2+ years in full-stack development, I excel in the full SDLC, modern web development frameworks, cloud implementations (AWS) and tools.

EDUCATION

University

Master of Science: Computer and Information Sciences

- 3.54 GPA, Western Illinois University

University

Bachelor of Science: Computer Science

- 8.18 GPA out of 10, Jawaharlal Nehru Technological University

Macomb, IL

May 2024

Kakinada, India

May 2020

WORK EXPERIENCE

TATA CONSULTANCY SERVICES

Assistant System Engineer

Chennai, India

May 2020 - Aug 2022

- Implementation of robust, scalable Java applications, leveraging advanced features of Java 8 for optimal performance and maintainability.
- Developed java applications as a part of migration project in weight and balance system of prominent airlines.
- Designed and implemented RESTful APIs to enhance client-server communication, ensuring seamless data exchange and functionality integration.
- Implemented Spring Boot Micro services to divide the application into various sub modules with enhanced modularity and reusability by 30%.
- Developed the interfaces platform using spring boot for providing different entities to exchange information in efficient manner
- Integrated Java applications with relational databases like Oracle and MySQL using JDBC and Hibernate ORM increasing data retrieval efficiency by 35%.
- Integrated front-end applications with back-end services using custom and library components in React, managing state with Redux, and communicating with servers via RESTful and SOAP web services using XML/JSON

SKILLS

- Languages: Java, Python, SQL
- Frameworks: Hibernate, Spring Boot, React.js
- Databases: PostgreSQL, MongoDB.
- Cloud Technologies: AWS.
- Methodology: Water Fall, Agile.
- IDE Tools: IntelliJ, Visual Studio
- Other Tools: Jenkins, Ansible, Docker, GIT, Jira.

PROJECTS

Data Extractor:

Jan 2024 - Feb 2024

- Developed a text processing pipeline to identify and extract key information from large text story files using Python. Designed and implemented a data storage solution in MongoDB, efficiently handling extracted data for further analysis and retrieval.

Tools: Python, Jupyter Notebook, MongoDB

Grade calculator:

Jul 2020 - Aug 2020

- Implemented standalone application to calculate GPA of a student in the university.

Tools: Python, Tkinter, NumPy
