

Swapna savitikati

Java Full Stack Developer

Email: savitikatiswapna08@gmail.com phone No: 4702904143

OBJECTIVE

As an accomplished Java Full stack Developer with 4 years of hands-on experience, my objective is to leverage my expertise in both front-end and back-end development to contribute to the success of innovative projects and organizations.

PROFESSIONAL SUMMARY

- Over 4 years of IT experience in Analysis, Design, Development, implementation, and execution of test cases of software application using **Java/J2EE** technologies.
- Hands on Experience in integration with **JUnit**, and **Log4j** frameworks.
- Good Knowledge on working with **OAuth2.0** to provide authentication and authorization to Rest services by exchanging Access tokens.
- Hands on experience in version control tools like **Git**, **SVN** and **CVS**.
- Experience with implementing Service Oriented Architecture (**SOA**) using **SOAP** and **REST Web Services**.
- Expertise with employment of **Spring Kafka** and **Zookeeper** apart from **JMS** as messaging service.
- Thorough in **J2EE** technologies like **Spring**, **Hibernate**, **Web Services**, **Design Patterns**, **SOAP**, **REST**, **Struts**, **Tiles**, **MVC**, **EJB**, **MQ Series**, **JMS**, **JSP** and **Servlets**.
- Proficient in utilizing **AWS Lambda** to build server less architectures and improve application scalability and efficiency.
- Experience in writing test automation scripts using **java**, **selenium WebDriver** and **TestNG** which performed sanity testing on every deployment performed in **QA** environment.
- Developing websites using **DXP (Digital Experience Platform)**, **HTML 4.0/5.0**, **XHTML**, **CSS**, **CSS3**, **JavaScript**, **jQuery**, **Ajax**, and **JSON**.
- Experience in creation and maintenance of **CI/CD** pipelines.
- Experience in using core Technologies **Java**, **J2EE**, **Servlets**, **JSP**, **JDBC**, **JavaBeans**, **JavaScript**, **JNDI**, and **HTML**.

EDUCATION

Master of Information Systems
from Auburn University
Montgomery

SKILLS

Java Programming Languages

C, C++, Java/J2EE, SQL, PL/SQL, Python.

Java APIs: J2EE, EJB, Servlets, JSP, JSTL, Custom Tag Libraries, JAX-RPC, JDBC, JNDI, JMS, JAXB, JUnit,

Mockito, AWT, Spring MVC, Hibernate, Spring AOP, Spring DAO, Spring Core, Spring Security, Spring REST, Spring Boot, JPA, Log4j, Apache Kafka.

Frameworks: Spring, Hibernate, MEAN Stack.

Scripting Languages:

JavaScript, TypeScript, jQuery

Web Technologies:

HTML/HTML5, XML, CSS/CSS3, Bootstrap, JSP, Ajax, NodeJS, Express, ReactJS, AngularJS, Angular 2.0 and above.

Web/Application Servers:

Apache Tomcat, WebSphere, WebLogic, JBoss

IDE's: Visual Studio Code, Eclipse, NetBeans, IntelliJ, IBM RAD, WSAD

- Strong knowledge and hands on experience of deploying applications using **Kubernetes, cloud native application development, pivotal cloud foundry, JavaScript, Kendo UI, Java/J2EE technologies & RDBMS.**
- Good knowledge of key **Oracle** performance related features such as **Query Optimizer, Execution Plans, and Indexes.**
- Experience working with **Agile SCRUM/RAD methodology** and **(TDD) Test Driven Development.**
- Good knowledge on the **Spring Modules** like **Spring IOC, Spring MVC, Spring DAO, Spring Batch, Spring Web Flow, Spring Security** and **Spring Boot.**
- Experience in **Jenkins** integration service for software development.

Databases: Oracle, MySQL, PostgreSQL, DB2, MongoDB, Cassandra.

Operating Systems: Windows, MacOS, Unix, Linux

Version Control: CVS, Clear Case, SVN, GitHub, Bit bucket.

Methodologies: Agile, Waterfall

Container/Orchestration: Docker, Kubernetes

Build/ CI Tools: Ant, Maven, Jenkins, Kubernetes, Docker, Gherkins and Hudson.

PROFESSIONAL EXPERIENCE

Client: Master Card, Atlanta, USA (Feb 2024 - Present)

Role: Java Full Stack Developer

Description: Mastercard is a payment network processor. collaborate with a multidisciplinary team to deliver feature-rich software at an accelerated pace.

Responsibilities:

- Experience working in **Agile development** following SCRUM **process, Sprint,** and **daily stand-up meetings.**
- Worked on **Swagger API** and auto-generated documentation for all **REST** calls.
- Designed and developed front-end and **back-end** applications using technologies such as HTML, CSS, JavaScript, and frameworks like React, Angular, or Vue.js.
- Implemented **database designs** and optimize queries for efficient data retrieval and storage.
- Implemented security controls and best practices to protect **AWS** environments from unauthorized access, data breaches, and other security threats.
- Customized and configured **ServiceNow modules,** workflows, and integrations.
- Designed and implemented **JDBC**-based solutions to connect Java applications with various databases, ensuring seamless data integration and manipulation.
- Build and **maintain RESTful APIs** for seamless integration between front-end and back-end systems
- Developed and maintained server-side applications using **Node.js.**
- Managed user access, roles, and groups within **Jira.**
- Collaborated with stakeholders to understand business requirements and designing **AWS**-based solutions to meet those needs. Provided technical support and troubleshooting issues related to **Confluence** usage.
- Deployed and managed **Node.js** applications on cloud platforms like **AWS, Azure,** or Google Cloud.

- Developed and maintained **coding** standards to ensure consistency and quality across the **codebase**.
- Designed and implemented database solutions using **Amazon DynamoDB**, ensuring high availability, performance, and scalability.
- Stayed updated with the latest trends and developments in **Node.js** and **JavaScript** ecosystem.
- Integrated **Confluence** with other **Atlassian** tools and third-party applications.
- Designed, developed, and tested HTML5, **CSS3**, **Bootstrap**, **JavaScript**, **jQuery** and **React.JS** that meet accessibility and web browser standards for websites. Used Angular controllers to update entity models, and Angular custom filters to provide better search experience and used Angular service for Rest API calls.
- Implemented robust source control management strategies using **Git**, ensuring **version control** and collaborative.
- Designed, developed, and **tested HTML5, CSS3, Bootstrap, JavaScript, jQuery** and **React.JS** that meet accessibility and web browser standards for websites.
- Automated build processes using tools like **Maven or Gradle**, streamlining the build and deployment pipeline.
- Designed and implemented **CI/CD** pipelines using **Jenkins**, GitLab CI, or similar tools for automating testing and deployment processes within **Kubernetes** environments, enhancing deployment frequency and reducing lead time for changes.
- Implemented a **continuous delivery pipeline** with **Docker** for custom application images in the cloud using **Jenkins**.
- Applied security best practices for **Kubernetes**, including role-based access control (RBAC), network policies, and Secrets management, to safeguard sensitive information and maintain compliance with industry standards.
- Setup **CI/CD** pipeline process for the application using the **Jenkins**.
- Focused on **Test Driven Development**; thereby creating detailed **JUnit** tests for every single piece of functionality before writing the functionality.
- Used **Spring MVC** architecture with **Hibernate** to implement **DAO** code and used **RESTful Web Services** with **XML** parsing to interact with other modules.
- Developed the persistence layer using **Hibernate Framework**, created the **POJO** objects and mapped using **Hibernate** annotations and Transaction Management.
- Customized **Jira** workflows, fields, screens, and permissions to meet project requirements.

Environment: Java 8.0, Spring 4, Hibernate 4.2, Spring batch, Spring Boot, JPA, JMS, ReactJS, NodeJS, HTML5, CSS3, Eclipse, MongoDB, AWS, Swagger UI, Log4j, JIRA, Pure XML, Web Services, Kafka, Microservices, REST UI, Cucumber, Jenkins, Cognito, Selenium.

Client: Home Depot, Atlanta, USA (Jun 2023 - Jan 2024)

Role: Java Full Stack Developer

Description: Home Depot is the world's largest home improvement retailer. we've fostered a responsive and iterative development process. Our aim is to provide Home Depot customers with a seamless and efficient online shopping journey.

Responsibilities:

- Involved in Requirements gathering, Analysis, Design, Development and Testing of application using **AGILE methodology (SCRUM)** in a **test-driven development (TDD)** approach.
- Used **JUnit, Mockito** for Unit testing the code, and **SL4J** for logging errors. Likewise worked on **Karma, Jasmine** in **Angular** App unit Testing and Protractor for automation. **GIT** for version control.
- Developed the view-controller components using **Servlets/JSPs, JavaScript (jQuery), CSS, HTML** and **DHTML**.
- Conducted research and kept up to date with the latest advancements in **Java** and **Kubernetes** technologies, incorporating them into development processes.
- Triggered the automation jobs using **Jenkins** to get the **cucumber JSON** reports.
- Involved in writing the **microservices** in **spring boot** application with **spring annotations**.
- Worked closely with **DevOps** teams to streamline the deployment process and implement **CI/CD** pipelines using **Kubernetes**.
- Unit testing through **JUnit** & Integration testing in staging environment
- Utilized **AWS Lambda** to optimize Backend processes and improve application performance.
- Worked on Query optimization, functions and Stored Procedures and other database objects.
- Developed application-level persistence using **Hibernate** and **spring framework**.

Environment: Java 1.8, J2EE, HTML5, CSS3, JavaScript, jQuery, Angular 2, Typescript, Bootstrap, Spring Boot, Spring IOC, Spring MVC, Log4j, SOAP, RESTful, Microservices Architecture, XML, AWS, Mongo DB, CI/CD, Maven, IntelliJ IDE, JUnit, JMS, UNIX, Jenkins, JIRA, Log4j, Git

Client: Deutsche Bank, Bangalore, India (Jul 2019 – Dec 2021)

Role: Java Developer

Description: Deutsche Bank is an established market leader in Europe. Expertise in Java technologies will drive the development of robust backend systems, seamlessly integrated with responsive frontend interfaces.

Responsibilities:

- Involved in various phases of **SDLC such** as requirement gathering, modeling, analysis, architecture design and development and the project was developed using **Agile** Methodologies.
- Produced as well as consumed **RESTful** web services using **Jersey API's**.

- Worked on **Jenkins** for **continuous integration** with **Gradle** and **GitHub**.
- Developed Business tier and Presentation tier using **Struts, JSP**. Coding using **JSP, HTML and CSS JavaScript** for validation, **Servlets** using **STRUTS framework, JDBC**.
- Developed applications using **J2EE, JSP, Servlets** and **Spring Bean Classes**.
- Worked in configuring **CI/CD** tool **Jenkins** for project builds and automation of deployments.
- Extensively used Junit and **JMockit** for writing unit test cases.
- Developed the middle tier using **Session Bean, Entity Bean / DAO**, and **Business Objects**. Database layer is developed using – **Oracle** while Presentation layer developed using **JSP**.
- Created **Web services** using **Restful API'S** for communication with other application modules to acquire data and validate.
- Developed Business objects using **POJOs** and data access layer using **Hibernate** framework.

Environment: Angular8, HTML, CSS5, JSON, NodeJS, AJAX, Rest Web Services, Express, JavaScript, Docker, Kubernetes, Apollo, Mongo DB, PostgreSQL, SQL, Enzyme, Junit, Selenium, Maven, Spring MVC, Hibernate, AWS

Client: Myntra, Bangalore, India (Nov 2018- Jun 2019)

Role: Java Developer

Description: Myntra e-commerce site for fashion and Lifestyle company. It maintains an online marketplace for buying and selling new Cloths. Worked for the forefront of transforming the online fashion landscape. Harnessing the power of Java technologies, you will craft seamless user experiences from front to back end, ensuring every click is a delight.

Responsibilities:

- Designed various modules using technologies like **CSS Media Queries, HTML5, AJAX, JSON**, and **JavaScript**.
- Behavior Driven Development (**BDD**) implementation with **Cucumber gherkin** and **Jenkins** for **continuous integration** and **continuous delivery**.
- Designed and developed **microservices** with **Spring Boot 2.0** and **Spring REST**.
- Developed **JUnit** test cases for **DAO** and Service Layer methods.
- Used **Oracle** as database and involved in the development of **PL/SQL** backend implementation.
- Developed multiple enterprise applications using **Spring Boot, Hibernate framework, Spring IOC, Spring MVC, Spring JDBC, Spring Annotations, Spring AOP, Spring Integration, framework**.

Environment: Java 8.0, Spring 4, Hibernate 4.2, Spring batch, Spring Boot, JPA, JMS, ReactJS, NodeJS, HTML5, CSS3, Eclipse, MongoDB, AWS, Swagger UI, Log4j, JIRA, Pure XML, Web Services, Kafka, Microservices, REST UI, Cucumber, Jenkins, Cognito, Selenium.
