

Ishank Aggarwal Full Stack Developer

✉ ishank@jobemails.net ☎ 415-996-9838 📍 CA, USA 🌐 LinkedIn 🐙 GitHub

Profile

Innovative Full Stack Developer with 1 year of experience in designing, developing, and managing complex web applications and backend services. Proficient in a multitude of programming languages and frameworks, including JavaScript, React, Node.js, and more. Demonstrated ability to lead development projects from concept to deployment with a focus on responsive design and cross-platform compatibility.

Skills

Languages & Framework: JavaScript, Node JS, SQL, NoSQL, React JS, Redux, AJAX, Python, Bootstrap, Material UI, HTML, CSS, Express.js, Next JS, TypeScript, C++

Tool & Technology: PostgreSQL, MySQL, MongoDB, AWS (EC2, S3, RDS, VPC, EKS, IAM), Azure (VM, Blob, AzureSQL, AKS, Active Directory), GitHub, Jenkins, JIRA, CI/CD, Postman, Swagger, Agile, SDLC

Professional Experience

Full Stack Developer, Walmart 06/2023 – present | Remote, USA

- Spearheaded the design and implementation of a robust Inventory Management System using React.js and Node.js, resulting in a 30% improvement in processing speed and a 25% increase in user satisfaction.
- Developed and maintained scalable microservices in Node.js, managing inventory data processing and business logic with a focus on clean, maintainable code.
- Crafted and deployed advanced React.js frontend components, utilizing Redux for state management, which improved application efficiency by 35% and supported complex state management across the platform.
- Integrated Azure Active Directory for secure authentication and Azure Application Gateway to enforce HTTPS protocols, ensuring data security and compliance.
- Orchestrated container deployment with Docker and managed microservices using AKS, leading to a 50% increase in deployment efficiency and a 99.9% uptime for critical services.
- Conducted testing such as unit testing, integration testing, and end-to-end tests, utilizing Azure DevOps for continuous integration and delivery pipelines.

Software Engineer, Quark Software Inc. 01/2021 – 06/2021 | Punjab, India

- Orchestrated DevOps tasks by deploying the Quark Publishing Platform (QPP) on AWS EC2, optimizing the CI/CD pipeline for improved deployment workflows.
- Managed AWS services, including S3 bucket creation, ACL, and IAM policy definitions, ensuring secure and efficient storage solutions for the application hosted on ECS.
- Enhanced the front-end usability and back-end stability of QuarkXPress, leading to a 10% reduction in application crashes and contributing to a more reliable user experience.
- Collaborated within a Scrum team of 6 engineers to develop, troubleshoot, and enhance features across the stack, with a focus on robust Node JS back-end development.
- Contributed to the design and implementation of the Composition Zone feature, allowing dynamic content management, including image and text box integration, demonstrating strong full-stack capabilities.

Education

Master of Science, San Francisco State University 08/2021 – 05/2024 | CA, USA
Computer Science

Bachelor of Engineering, Panjab University 07/2017 – 06/2021 | Punjab, India
Computer Science Engineering

Projects

Data Structures and Algorithm Visualizer 📄 09/2023 – 03/2024

TypeScript, Next.js, React.js, JavaScript, Tailwind CSS, CSS

- Developed an interactive visualization tool to enhance understanding of Data Structures and Algorithms through dynamic, real-time visualizations.
- Implemented an intuitive user interface with features such as code highlighting, customizable visual parameters, and support for various data structures and algorithms such as arrays, trees and graphs.
- Contributed to research in educational technology by providing a platform that bridges theoretical concepts with practical application, catering to diverse learning styles.

AI-SaaS 📄

TypeScript, SQL, Next.js, Prisma, Clerk AUTH, Zustand, Tailwind CSS, Stripe, Chatgpt API, Replicate API

- Engineered a cutting-edge AI SaaS platform with five tools (code, music, video, image generation, and conversation) using Next.js 14, TypeScript, Tailwind CSS, Prisma, and Zustand Chatgpt API, ReplicateAI API.
- Integrated Next.js 14 App Router for efficient client-side routing, optimizing performance, and enhancing user experience.
- Implemented a seamless Stripe subscription system for secure billing, showcased through individual tabs for each tool, ensuring a comprehensive and user-friendly interface.
