Professional Summary

Entry-level Java Developer with a strong foundation in Java, object-oriented programming, and backend development. Hands-on experience building REST APIs, working with relational databases, and developing backend services through academic and professional projects. Comfortable collaborating in Agile teams, writing clean and maintainable code, and learning new technologies under guidance.

Technical Skills

Programming	Java, Python, JavaScript, C++
Core Concepts	Object-Oriented Programming (OOP), data structures, clean code practices
Backend	RESTful APIs, backend service development, system integration
Frameworks	Spring fundamentals, Spring Boot (academic exposure)
Databases	SQL, PostgreSQL, MySQL, relational database design
Tools	Git, Linux, version control workflows
Practices	Debugging, unit testing, code reviews, documentation, Agile/Scrum

Professional Experience

Software Engineer Tomcat Technologies Pvt Ltd, Hyderabad, India	Jul 2022 – Nov 2023
---	---------------------

- Developed and maintained backend components using Java and object-oriented design principles.
- Built and consumed RESTful APIs to support application features and system integrations.
- Worked with SQL databases to store, retrieve, and manage application data.
- Debugged application issues and implemented fixes to improve reliability and performance.
- Participated in code reviews and followed coding standards and documentation practices.
- Collaborated with senior developers and cross-functional teams in an Agile environment.

Academic Software Engineering Experience

Software Engineering Projects Oregon State University	2024 – 2025
---	-------------

- Built Java-based backend applications as part of coursework and team projects.
- Implemented REST APIs and database-backed services using Java and SQL.
- Applied object-oriented design patterns and best practices.
- Wrote unit tests and performed debugging to ensure correct application behaviour.
- Worked in Agile teams with sprint-based development and peer code reviews.

Selected Projects

Java Backend Application

- Developed a Java-based backend service with REST APIs and relational database integration.
- Implemented CRUD operations and followed clean code and OOP principles.

Data-Driven Application

- Built backend features driven by SQL queries and Java-based data processing.
- Improved query efficiency and data handling through structured debugging.

System Integration Project

- Integrated multiple backend components and APIs into a unified workflow.
- Documented application logic and API endpoints for maintainability.

Education

Master of Engineering in Computer Science

Jan 2024 – Dec 2025

Oregon State University, Corvallis, OR

Bachelor's Degree in Engineering / Computer Science

Completed
