WORK EXPERIENCE

Build City

New York, USA

Intern

May 2024 - Aug 2024

- Developed a Flask-based web application, working on both backend development and integrating it with a frontend using JavaScript, HTML, and CSS.
- Built and optimized RESTful APIs for handling user input, data storage, and retrieval, improving backend efficiency.
- Connected frontend with backend using basic HTTP requests, ensuring smooth data flow between the two layers.
- Debugged and improved application performance, fixing issues in backend logic and frontend responsiveness.
- Collaborated with mentors and senior developers, learning best practices in full-stack development and improving code structure.

CFA Institute

New York, USA

Research Analyst

Sep 2023 - Dec 2023

- Conducted equity research on Mastercard Inc. (MA), analyzing financial performance, industry trends, and competitive positioning.
- Built DCF and comparable company models to determine target price and investment recommendation.
- Assessed key financial metrics, growth drivers, and ESG factors impacting Mastercard's valuation.

MBA Hub

Remote, India

Analyst, Intern

Jun 2022 - Aug 2022

- Conducted advanced quantitative analysis to evaluate market trends, enhance investment strategies and driving a 15% increase in portfolio returns.
- Developed Python scripts for automated financial data analysis, identifying 15 high-potential trading opportunities within a month.
- Designed robust valuation models using Monte Carlo simulations and option pricing techniques to assess investment opportunities aligned with risk profiles.
- Backtested investment strategies on historical stock data to ensure alignment with performance objectives and market trends.

CEO's Maps Consultancy Services

Aurangabad, India

Founder and Lead Analyst

Jan 2022 - Jun 2022

- Developed machine learning models for sales forecasting, leveraging time series analysis and regression techniques, leading to a 20% improvement in decision-making accuracy.
- Collaborated with a team of 10 analysts, conducting data-driven financial analysis and predictive modeling, delivering actionable insights to enhance business strategies.
- Applied statistical techniques (hypothesis testing, A/B testing, clustering) to uncover key trends, optimize revenue generation, and improve operational efficiency across multiple projects.

SKILLS & INTERESTS

Skills: MS Office Suite (Excel, Word, PowerPoint), Python, SQL, MATLAB, Machine Learning, Financial Modeling, Data Visualization, Option Pricing, Portfolio Optimization, Problem Solving, DSA

EDUCATION

New Jersey Institute of Technology

Newark, New Jersey

Master's in Management, Financial Technology

Graduation Date: Dec 2024

Government College of Engineering, Aurangabad

Aurangabad, India

B. Tech, Mechanical Engineering

Graduation Date: Jun 2023

PROJECT EXPERIENCE

New Jersey Institute of Technology**Newark, New Jersey***Dynamic Portfolio Optimization using Reinforcement Learning**Dec 2023 - Present*

- Developed and implemented reinforcement learning models to optimize asset allocation, maximizing risk-adjusted returns using historical financial data.
- Integrated Q-Learning and Deep Reinforcement Learning algorithms to dynamically adjust trading strategies based on market fluctuations.

New Jersey Institute of Technology**Newark, New Jersey***Predictive Modeling for Loan Default Risk**Oct 2023 - Present*

- Built machine learning models, including Random Forest, Neural Networks, and SVM, to predict default probabilities in lending environments.
- Designed a comprehensive dataset, encompassing historical loan approvals, rejections, repayments, and defaults for robust model training.

New Jersey Institute of Technology**Newark, New Jersey***Stock Price Prediction Application**Sep 2023 - Present*

- Developed a stock price prediction web application using Flask for backend processing and Streamlit for frontend visualization, enabling real-time user interaction.
