

Adelbert G Cade

Middlefield, Connecticut

delcade2002@gmail.com

860.681.2792

SUMMARY

Data-driven professional with a strong foundation in computer science and mathematics, specializing in data analysis, system integration, and actionable insights. Skilled in leveraging analytics to inform decision-making, streamline processes, and optimize performance for diverse applications.

EDUCATION

University of Kentucky - Stanley and Karen Pigman College of Engineering

Lexington, Kentucky

Bachelor of Computer Science

May 2024

Minor in Mathematics

EXPERIENCE

Ameritech Contracting LLC.

Berlin, Connecticut

Junior Business Analyst

April 2025 - Present

- Cleaned, structured, and analyzed 8,000+ corporate credit card transactions across 50+ categories using Power Query and Excel, identifying trends and discrepancies for visualization in a Power BI dashboard.
- Streamlined Excel workflows using VBA, Python in Excel, and advanced formulas to enhance efficiency and automation.
- Handled manual data entry while improving efficiency through process automation and SOP creation.

eProcess Development

Beverly, Massachusetts - Remote

Data Analyst, Video Production Manager - Freelance

Oct 2024 - Feb 2025

- Edited and optimized video content for posting on clients' LinkedIn profiles, enhancing their professional branding and audience engagement.
- Refined PowerPoint training materials by fixing embedded videos and updating text, ensuring clarity and effectiveness for client presentations.

Infiltrator Water Technologies

Old Saybrook, Connecticut

IT Intern

May 2022 - August 2022, May 2023 - August 2023

- Developed a human resources app to track employee issues and customer inquiries, cutting resolution time by 50% and increasing case capacity by 45%.
- Improved data accuracy by 30% and reduced manual entry by 60% through enhancements to a web application managing material and machine data.
- Built a conference planning app to streamline scheduling and staffing for 30+ events, reducing prep time and boosting coordination efficiency.

PROJECTS

Infineon Technologies - Model Design Rule Check

Academic - Computer Science Senior Design Project

Aug 2023 - May 2024

- Led a team of students to integrate the model into an existing system, ensuring key metrics of simulated devices met specified criteria.
- Developed a Python-based system to analyze YAML files containing device simulation data in collaboration with Infineon Technologies and presented findings on system performance and improvements to a group of 100+ students and faculty.

Betacus - Horse Racing Data Analysis

Personal - Betacus.com Collaboration/Assistance

Oct 2024 - April 2025

- Analyzed a dataset of 38,922 past races and 303,982 entries, including detailed statistics on horse performance, jockey performance, and other race-related variables. Used Python libraries such as NumPy, pandas, and Matplotlib to process and visualize the data effectively.
- Analyzed horse-specific metrics (e.g., speed, weight, and previous race performance) alongside expert predictions to identify the most predictive factors and evaluate their alignment with race results to provide actionable insights for bettors by understanding key variables that impact race outcomes.

SKILLS

Python, SQL, Power Query, VBA, R, C++, Tableau, JMP, Web Development, Microsoft Excel, Microsoft Powerpoint, Microsoft Power Apps, PowerBI, Data Analysis, Data Visualization, Data Cleaning, Database Management
