Data Analyst/Data Furnisher

Versatile and highly analytical professional with 4+ years of experience in financial analysis and data-driven decision-making. Adept at leveraging economic modeling, data mining, and visualization techniques to extract actionable insights. Holds a Google Data Analytics Certificate and a proven track record in process optimization, reporting, and cross-functional collaboration. Seeking to transition into a Data Analyst or FP&A role to drive strategic insights and business improvements.

PROFESSIONAL EXPERIENCE

TD Bank – Mahwah, NJ (Remote)

2019 – Present

Data Furnisher

- Utilized internal systems and third-party sources to mine and clean large datasets, ensuring high accuracy in credit reporting and compliance with regulatory standards.
- Designed and implemented dynamic Excel macros and automated reporting tools that reduced manual processing time and improved operational efficiency.
- Produced comprehensive dashboards and analytical reports using Excel and R to visualize key performance indicators (KPIs), supporting strategic decisions by senior management.
- Worked closely with cross-functional teams to develop data-driven insights and recommendations, ensuring the alignment of operational improvements with business objectives.
- Maintained record-level high accuracy for credit reporting by mining data from sources efficiently, utilizing third-party data sources, internal systems, and tools to conduct deep research & analysis.
- Championed a clear understanding of internal credit-related policies & procedures, and all applicable federal regulations & credit industry standards to enable seamless bank operations.
- Handled highly confidential/sensitive information with discretion, operating with high integrity, ethical standards & sound commercial judgment.
- Identified industry best-practices; incorporated dynamic formulas & macros to enhance efficiency, accuracy, and enable data-driven decision making.
- Leveraged a resilient, resourceful attitude & strong time management to balance workflow to meet daily, weekly, monthly & quarterly reports.
- Researched & responded to disputes in a timely manner via mail, email, or phone with a personable & professional demeanor.

SELECTED HIGHLIGHTS

- Collaborated closely with Innovis to develop and implement a new proprietary software to TD RCS Credit Bureau Department.
 - Resulted in significantly accelerated response time & improved workflow by case-managing incoming accounts.
- Enhanced account completion speeds by over 50% through working closely with the project specialist department to develop & integrate intuitive excel macros capable of completing accounts concurrently, instead of one at a time.
- Recognized for leading the department as the most accurate agent, maintaining a record low error rate of under 5%.
- Partnered with management to develop a detailed guide for new analysts to swiftly find the answers they need when management unavailable.
- Identified and rolled out innovative email channels for optimized email management; increased email organization speeds by over 20%.
