PROFESSIONAL SUMMARY

Senior Business Data Analyst with **4+ years** of experience delivering enterprise **data solutions, predictive models, and business intelligence frameworks** across financial services and technology sectors. Expert in **SQL, Python, Tableau, and AWS Cloud Architecture** (Redshift, S3, Glue). Proven track record of leveraging **A/B testing, ETL/ELT pipelines, and machine learning algorithms** to convert complex datasets into executive-level strategies, driving **preservation of \$28M+ ARR** and **multi-million dollar revenue optimizations**. Adept at cross-functional stakeholder management, **data governance**, and bridging technical execution with C-suite decision-making.

EDUCATION

Indiana University Bloomington

Master of Science in Data Science

Bloomington, IN

May 2025

Gayatri Vidya Parishad College of Engineering

Bachelor of Engineering in Computer Science

India

Jun 2023

EXPERIENCE

BNY Mellon

Senior Business Data Analyst

Dallas, TX

Jul 2026 – Present

- Engineered **predictive customer churn models** leveraging **Logistic Regression, Random Forest, and XGBoost**, identifying high-risk client segments and enabling proactive retention strategies that preserved **\$28M in annual recurring revenue (ARR)**.
- Designed and deployed 25+ interactive **Tableau dashboards** monitoring **portfolio performance, risk exposure, and market trends**, reducing quarterly executive **reporting cycle time by 80%** (from 6 days to 4 hours).
- Optimized **ETL/ELT data pipelines** on **AWS (S3, Glue, Redshift)**, slashing daily batch **data processing latency by 5 hours** and enabling near-**real-time analytics** for business operations.

Xsolla

Business Development Data Analyst

Remote | Austin, TX

Sep 2025 – Jun 2026

- Analyzed and preprocessed enterprise datasets using **SQL** and **Python**, applying **statistical and exploratory data analysis** techniques to surface actionable insights supporting strategic decision-making by senior leadership.
- Designed and maintained **executive dashboards** in **Google Looker Studio** and **Neo4j / NeoDash**, translating complex relational and graph data into clear, actionable visualizations for cross-functional stakeholders.
- Built and managed **automated data workflows** using **n8n** to integrate third-party **APIs** and streamline operational pipelines, significantly reducing manual processing time and improving data delivery speed.
- Owned **data quality and governance** for enterprise **CRM data**; engineered a **Python**-based deduplication project that merged **694 duplicate records** via **OAuth 2.0**-authenticated scripting, improving data integrity across the organization.

Kelley School of Business, Indiana University

Data Scientist / Research Assistant

Bloomington, IN

Jun 2025 – Aug 2025

- Designed and implemented **Deep Learning (NLP)** models on 50,000+ financial news articles, extracting quantitative **sentiment signals** strongly correlated with equity market fluctuations for academic publication.
- Built robust **data processing pipelines** in **Python (Pandas, NumPy)** and **R** to clean, harmonize, and structure 10+ years of unstructured financial **time-series data** from Bloomberg and Reuters APIs.
- Co-authored **predictive risk models** for corporate bankruptcy, achieving **87% precision** in out-of-sample testing using **Gradient Boosting (LightGBM)** and **Neural Network** architectures.

Dell Technologies

Business Data Analyst

India

Aug 2021 – Jun 2023

- Led the engineering of an enterprise **Business Intelligence (BI) platform** consolidating sales, supply chain, and CRM data across 6 regional databases, establishing single-source-of-truth reporting for **300+ global analysts**.
- Developed an automated **anomaly detection engine** leveraging **Statistical Process Control** and **Isolation Forest ML**, flagging supply chain bottlenecks 2 weeks in advance and preventing **\$18M in potential revenue loss**.
- Designed 40+ interactive **Power BI dashboards** tracking global sales velocity, inventory turnover, and CSAT metrics, eliminating manual processes and saving **350+ hours per quarter**.

- Optimized **Snowflake / Redshift data warehouse** query performance through advanced indexing, partitioning, and materialization, accelerating query execution from **12 minutes to 28 seconds** (96% speedup).
- Partnered with regional operations heads to build **demand forecasting models** incorporating promotional cadence and market trends, sustaining **95% accuracy** on 3-month forward projections.

PROJECTS

IRIS Classification using Vision Transformer | *Python, Scikit-learn, Matplotlib*

- Designed a supervised ML classification model to identify iris patterns for biometric applications, achieving **97% accuracy** using Logistic Regression and Decision Trees with cross-validation strategies.
- Applied feature engineering, data preprocessing, and domain-driven optimization; generated insightful **Matplotlib visualizations** to interpret feature significance and classification outcomes.

Job Quest Log – Job Search Management Platform | *Python, HTML, Data Visualization*

- Built a full-stack **web platform** to streamline job application tracking, integrating **web scraping** for automated data collection from job postings and interactive visualizations to surface application trends and insights.
- Implemented a **reminder and follow-up system**, centralizing application data and reducing manual tracking overhead while improving user engagement and search strategy effectiveness.

Voice-Activated Virtual Assistant for Laptops | *Python, NLP, API Integration*

- Developed a voice-activated laptop assistant supporting application control, system automation (brightness/volume), web search, and direct email/messaging via voice commands, leveraging **NLP** and **speech recognition** APIs.
- Integrated system-level automation with real-time voice recognition pipelines, demonstrating end-to-end **API integration** and practical **AI deployment** for everyday productivity use cases.

Blind Assistance System | *Python, YOLOv4, OpenCV, Text-to-Speech*

- Built an Android-compatible **real-time object detection** system for the visually impaired using **YOLOv4** trained on the COCO dataset, identifying objects from live camera feed and converting labels and positions to **audio output** via Text-to-Speech.

TECHNICAL SKILLS

Languages & Querying: SQL (PostgreSQL, MySQL, T-SQL, Snowflake SQL, BigQuery SQL, Oracle PL/SQL, SQLite), Python (Pandas, NumPy, Scikit-Learn, PyTorch, TensorFlow, Keras, SciPy, Matplotlib, Seaborn, Plotly, Streamlit, Flask), R (dplyr, ggplot2, caret, tidyverse), Bash, SAS, Scala, Java, C++

Analytics & Business Intelligence: Tableau, Power BI, Looker, Google Looker Studio, Neo4j/NeoDash, ThoughtSpot, Qlik Sense, MicroStrategy, Excel (VBA, Power Query, DAX, PivotTables), KPI Frameworks, Dashboard Architecture, Executive Reporting, Funnel Analysis, Cohort Analysis, RFM Analysis, Customer Segmentation, Root Cause Analysis

Data Engineering & Cloud: AWS (Redshift, S3, Glue, Lambda, Athena, EMR, EC2, IAM, CloudWatch, RDS, Kinesis), Snowflake, Databricks, Azure (Synapse, Data Factory, Blob Storage), BigQuery, dbt, Apache Airflow, Apache Spark, PySpark, Kafka, Hadoop, Hive, n8n (Workflow Automation), ETL/ELT Pipelines, Data Warehousing, Data Governance, Data Lake Architecture, Delta Lake, Star/Snowflake Schema, Data Modeling, CI/CD (GitHub Actions, GitLab CI)

Data Science & Modeling: Predictive Analytics, Machine Learning, Deep Learning, NLP, A/B Testing & Experimentation, Time-Series Forecasting (ARIMA, Prophet, LSTM), Clustering (K-Means, DBSCAN), CLV Modeling, Churn Analysis, Regression (Linear, Ridge, Lasso), Classification (Logistic Regression, SVM, Naive Bayes), Ensemble Methods (XGBoost, LightGBM, CatBoost, Random Forest), Neural Networks (CNN, RNN, LSTM, Transformers), Feature Engineering, Dimensionality Reduction (PCA, t-SNE, UMAP)

Tools & Methodologies: Git, GitHub, GitLab, Jira, Confluence, Agile/Scrum, Docker, Kubernetes, Terraform, Google Analytics 4 (GA4), Postman, REST APIs, GraphQL, Data Quality Assurance (Great Expectations, Deequ), OAuth 2.0, Business Requirements Gathering (BRD/PRD), Technical Documentation, Stakeholder Management

CERTIFICATIONS

Tableau: Tableau Desktop Specialist

Amazon Web Services (AWS): Certified Cloud Practitioner, Academy Graduate – Machine Learning Foundations, Academy Graduate – Cloud Foundations

Cisco: CCNA: Introduction to Networks, Cybersecurity Essentials, Introduction to Cybersecurity, Introduction to Packet Tracer, Cyber Security Virtual Internship Program
