234-973-3222 | aghanathe03@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst / Business Intelligence Analyst with 5 years of experience supporting enterprise reporting, dashboard development, workflow analysis, and cross-functional analytics initiatives across finance and enterprise environments. Skilled in SQL, Power BI, Excel, Python, data validation, KPI reporting, requirements gathering, and stakeholder collaboration. Experienced translating business needs into reporting solutions and supporting Agile delivery, testing, and process improvement.

CORE COMPETENCIES

- **CORE COMPETENCIES:** Business Analysis & Project Coordination, Technical Writing & SOP Documentation, Workflow Analysis & Process Improvement, Process Flow & Diagram Creation (Visio, PowerPoint), Requirements Gathering & Documentation-, Stakeholder Management & Communication, Reporting & Dashboard Development, Regulatory & Compliance Support, SDLC & Agile Methodologies, Status Reporting & Project Tracking, Cross-Functional Team Coordination, Risk Identification & Escalation, UAT Support & Validation, Documentation Management & Knowledge Transfer
- **Business Analysis & Documentation:** Requirements Gathering, Technical Writing, SOP Documentation, Process Mapping, Workflow Documentation, Gap Analysis, BRM Support, Functional Documentation, User Stories, Business Process Analysis
- **Project & Coordination Tools:** Jira, Azure DevOps, Microsoft Visio, PowerPoint, Microsoft Office Suite, Excel, SharePoint
- **Reporting & Analytics:** Power BI, Tableau, SQL Reporting, Dashboard Development, KPI Reporting, Data Validation, Status Reporting, DAX, Power Query, Data Modeling
- **Databases & Technologies:** SQL Server, Oracle, MySQL, Snowflake, BigQuery, PostgreSQL
- **Programming & Query Languages:** SQL, Python, R, Pandas, NumPy
- **Agile & SDLC:** Agile Methodologies, Sprint Planning, Backlog Refinement, UAT Support, Testing & Validation, SDLC, Requirements Traceability
- **Cross-Functional Collaboration:** Meeting Coordination, Stakeholder Communication, Documentation Management, Schedule Tracking, Risk Escalation, Compliance Support

PROFESSIONAL EXPERIENCE

- DTEC**
Data & Reporting Analyst

Apr 2025 - Present
Tampa, FL

 - Gathered, analyzed, and documented business and functional requirements for Power BI reporting, data validation, and operational initiatives across cross-functional teams.
 - Developed technical documentation, SOPs, workflow documents, reporting standards, and process guides to support SDLC and operational processes.
 - Created process flows, workflow diagrams, and reporting documentation using PowerPoint, Visio, and Microsoft Office tools.
 - Coordinated with business stakeholders, IT teams, QA teams, and project managers to support project execution and delivery timelines.
 - Managed reporting trackers, project status updates, issue logs, and documentation repositories to support ongoing operational activities.
 - Assisted in identifying process gaps, operational risks, and workflow inefficiencies while recommending process improvement opportunities.
 - Supported Agile delivery activities including sprint planning, backlog refinement, requirements discussions, and testing coordination using Jira and Azure DevOps.
 - Facilitated cross-functional meetings and stakeholder discussions to ensure alignment on project deliverables and reporting requirements.
 - Coordinated testing validation, UAT support, issue resolution, and business sign-off activities for reporting and operational solutions.
 - Maintained compliance-related documentation and supported audit readiness through accurate reporting and documentation management.
- Verizon**
Quantitative Analytics Associate

Jun 2024 - Apr 2025
Cleveland, OH

 - Supported reporting operations, documentation management, and workflow coordination for enterprise analytics and business initiatives.
 - Collaborated with business stakeholders and technical teams to gather requirements and support reporting solution development.
 - Developed operational reports, dashboards, KPI visualizations, and project status trackers using SQL, Power BI, Excel, and DAX.
 - Assisted with workflow documentation, reporting standards, and process improvement initiatives across cross-functional teams.
 - Participated in planning meetings, requirements discussions, and project coordination activities supporting operational delivery.
 - Maintained reporting documentation and supported issue tracking, testing validation, and stakeholder communication activities.
- IBM**
Data Analyst

Jul 2021 - Jul 2022
Bengaluru, India

- Developed operational reports and dashboards using Power Query and data modeling to support enterprise business operations and reporting requirements.
- Created workflow documentation, technical process documents, and reporting standards for cross-functional business teams.
- Supported reporting validation, testing activities, and documentation management for enterprise reporting initiatives.
- Collaborated technical and business teams to improve reporting processes and operational workflows.
- Assisted in maintaining project documentation, operational trackers, and process improvement records.

Accenture

Jun 2020 - Jul 2021

Business Intelligence Analyst

Hyderabad, India

- Supported enterprise reporting and business analysis activities using Python, Pandas, and NumPy for workflow analysis, reporting coordination, and operational insights.
- Developed technical documentation, reporting guides, and workflow process documents supporting operational and reporting initiatives.
- Participated in Agile project activities including sprint planning, backlog discussions, testing support, and requirements refinement.
- Coordinated with cross-functional stakeholders to support reporting delivery, issue resolution, and process improvement activities.
- Assisted in maintaining compliance-related reporting documentation and operational process standards.

PROJECTS

Sales Performance Dashboard (End-to-End BI Project)

- Developed an end-to-end Power BI sales performance dashboard using SQL to analyze revenue trends, product performance, and regional financial metrics.
- Performed data cleaning, transformation, and aggregation using SQL and Power Query on retail and e-commerce datasets to support data-quality checks and reporting accuracy.
- Designed KPI visualizations and DAX measures for revenue, profit margin, top-selling products, and regional performance aligned with finance industry reporting standards.
- Identified top 10% of products contributing to 60% of total revenue and flagged underperforming regions, enabling targeted financial analysis and optimization.

Customer Churn Prediction Model

- Built a Python machine learning model using logistic regression and random forest to predict customer churn, achieving approximately 80% to 85% accuracy.
- Performed exploratory data analysis (EDA) to identify key churn drivers including tenure, contract type, and charges.
- Conducted feature engineering, preprocessing, and model tuning to improve predictive analytics performance and customer retention strategy insights.

Healthcare Data Analytics & Insights Project

- Designed a healthcare analytics dashboard to analyze patient outcomes, readmissions, and cost trends using Tableau and Power BI.
- Built SQL queries to extract insights from healthcare datasets including claims, patient visits, and Medicare/Medicaid records.
- Performed data cleaning, missing value handling, and transformation using Python to ensure data quality and integrity.
- Identified high-cost procedures and key readmission risk factors to support healthcare financial analysis and operational optimization.

EDUCATION

Kent State University

Aug 2022 - May 2024

Master of Science, Business Analytics

Kent, OH

- **Coursework:** Predictive Analytics, Machine Learning, Data Mining, Statistical Modeling, Data Visualization (Tableau, Power BI), SQL & Database Systems, ETL & Data Warehousing, Big Data Analytics, Python & R for Data Analysis, Healthcare Data Analytics, Business Intelligence, Optimization Techniques, Capstone Project
