SUMMARY

Network & Cybersecurity Engineer with 5+ year experience in network design, implementation, and security across complex enterprise and Linux-based environments. Skilled in supporting Linux provisioning stacks (DHCP, TFTP, DNS) and proficient with Fedora Linux, Python/Bash scripting, and monitoring tools such as Grafana, Xymon, and MetriX. Holds CCNA, CompTIA PenTest+, CNVP and CompTIA Security+, certifications, demonstrating expertise in infrastructure management, penetration testing, system hardening, and secure network operations. Adept at configuring, managing, and troubleshooting LAN/WAN, routing, switching, and firewalls with a strong foundation in network security best practices. Experienced in automating workflows and monitoring remote infrastructure to build resilient, secure, and scalable network environments. Applies cybersecurity best practices to ensure reliable, compliant, and hardened systems, with a security-first mindset and passion for automation. Thrives in remote work settings, collaborating across teams to enhance business continuity and operational efficiency.

EXPERIENCE

Network Security Engineer | Garbanzo Mediterranean Fresh 07/2023 to Present

Current Roles & Responsibilities - Network Security Engineer

Design, configure, and maintain **secure LAN/WAN infrastructures**, integrate routers, switches, and firewalls to optimize performance and safeguard against cyber threats. Implement **network segmentation, VLAN configurations, and secure routing protocols** to enhance security posture and limit lateral movement in case of a breach. Conduct quarterly penetration tests, reducing high-risk vulnerabilities by 35% within six months. Perform **network traffic monitoring and anomaly detection** using SIEM and IDS/IPS solutions to detect potential intrusions and malicious activity. Apply **network device hardening techniques**, including secure configurations, ACLs, multi-factor authentication, and firmware patching. Collaborate with cybersecurity teams to ensure **compliance with NIST, ISO 27001, and organizational security policies**. Develop and maintained **network security documentation** including incident response playbooks, topology diagrams, and change management records. Leverage automation and scripting to **streamline network monitoring, vulnerability reporting, and threat remediation workflows**. Participate in **incident response efforts**, performing root cause analysis of security events and implementing preventive measures to reduce future risk. Support **business continuity and disaster recovery plans** by designing resilient, redundant, and secure network architectures.

Data Analyst using Python | Sytel Tech SL 02/2020 to 06/2023

Roles & Responsibilities - Data Analyst

Utilized **Python (Pandas, NumPy, Matplotlib, Seaborn)** to perform data wrangling, cleaning, and exploratory analysis on **customer behavior, product usage, and operational performance metrics**. Designed and developed **interactive Tableau dashboards** to visualize KPIs, track business trends, and support cross-functional decision-making. Automated **reporting workflows and data pipelines** using Python and SQL, reducing manual processing time by **60%** and improving reporting efficiency. Conducted **A/B testing, hypothesis testing, and statistical modeling** to assess product performance, marketing strategies, and customer engagement. Collaborated with **data engineers and business stakeholders** to ensure data integrity, consistency, and compliance with organizational reporting standards. Delivered **data-driven insights and actionable recommendations** to senior leadership, influencing strategic planning and **enhancing risk management initiatives**.

Small Business Owner | Aroma Indian Bistro LLC. DBA Aroma Indian Bistro 01/2019 to 02/2020

Roles & Responsibilities - Small Business Owner Aroma Indian Bistro – Merchantville, NJ

Managed **day-to-day restaurant operations**, including staffing, scheduling, inventory control, and vendor relations. Oversaw **menu planning, recipe development, and quality control** to ensure authentic and consistent customer experience. Implemented **cost control measures** for food, labor, and overhead expenses, improving profit margins.

Small Business Owner | Guru Fuels Inc. DBA Palmyra Sunoco 08/2010 to 06/2018

Roles & Responsibilities - Small Business Owner Palmyra Sunoco – Palmyra, NJ

Managed **daily operations** of a gas station and convenience store, including staff scheduling, inventory control, and vendor coordination. Oversaw **fuel supply management**, price setting, and compliance with environmental and safety regulations. Implemented **cost-control measures** to optimize profit margins while maintaining high service standards.

EDUCATION

Master of Science in Computer Science | New Jersey Institute of Technology (NJIT) 2007 to 2010

Newark, New Jersey

Earned a Master of Science in Computer Science from New Jersey Institute of Technology, specializing in advanced topics such as artificial intelligence and data analytics. Completed coursework in software engineering, machine learning, and algorithms, enhancing my problem-solving and programming skills. Acquired hands-on experience through collaborative projects, resulting in innovative tech solutions and a strong foundation in computer science principles.

Bachelor of Science in Computer Science | DAV Institute of Engineering & Technology (DAVIET) 2003 to 2007

Punjab, India

Earned a Bachelor of Science in Computer Science from DAV Institute of Engineering & Technology, focusing on software development and algorithms. Completed projects utilizing programming languages such as Java, C++, and Python, enhancing my problem-solving skills. Participated in team initiatives that improved coding efficiency by 30%, preparing me for real-world tech challenges.

SKILLS

Network Design and Implementation, Penetration Testing & Vulnerability Assessment, Python for Data Analysis & Automation, Cybersecurity Policy Compliance (NIST, ISO 27001), Linux Administration (Fedora, Ubuntu), SIEM & IDS/IPS (Grafana, Xymon, MetriX), Interactive Data Visualization (Tableau, Pandas, Matplotlib), Firewall Configuration & Management (Cisco, Palo Alto), Zero Trust Architecture, Cloud Security/AWS/Azure Networking, VPN Configuration, Disaster Recovery, SOC Operations

VERIFIED CERTIFICATIONS

Cisco Certified Network Associate (CCNA), Certified Network Vulnerability Professional (CNVP), CompTIA Security+, CompTIA PenTest+
