Certifications

- **IBM Data Science Professional Certification** – Coursera
- **Starweaver Certified Business Analysis Professional** – Coursera

College Projects

- **College Database – SQL, Microsoft Access, Relational Database, Data Import/Export, Normalization, Reports**
Designed a comprehensive database system for managing university student, faculty, course, and department data, enabling streamlined academic and administrative operations.
- **Project Management – Teamwork, Stakeholder Management, Communication, Time Management, Problem Solving**
Developed a web-based platform to digitize rare archival materials, incorporating advanced search and analysis tools, ensuring global accessibility.
- **System Design and Analysis – UML, Data Modeling, System Design, Analytical Thinking, UI, Blueprints**
Created an automated payroll system for Eastern Michigan Rec/IM staff to streamline processes, reduce completion time, and ensure timely payments.
- **Product Sales Data Analysis – Power BI, Data ETL, Python, Data Visualization, Data Analyst, Critical Thinking**
Conducted an in-depth analysis of company sales data to identify profitable products and key performance drivers. Explored patterns across sales, products, and other influential business factors.
- **Marketing Campaign Insights Analysis - Power BI, Data ETL, Python, Data Visualization, Data Analyst**
Evaluated various marketing campaigns to determine effectiveness and optimize future strategies. Demonstrated the impact of campaign elements on product and platform performance using marketing analytics data.
- **Building Smarter Logistics for Ultium Cells – SDLC, SQL, PHP, HTML, Azure, Wireframing, UI, AWS**
Designed a centralized logistics management system for Ultium Cells to replace their fragmented, Excel-based tracking process. Hosted on AWS, the platform offers real-time visibility into shipments, inventory, and delivery routes, with AI-powered optimization and IoT-based environmental monitoring.
