

Aisin-Gioro Yeh Montgomery

Arlington, VA, Phone# (864)-908-7870, Email: zy222@georgetown.edu US Citizen (No Sponsorship Required)

HIGHLIGHTS

- Seasoned Data Analyst with strong technical skills proven through 3 year of work experience in manufacturing and Finance industry
- Skilled in solving business problem through technical approaches including machine learning, statistical modelling and data analysis
- Strong in communicating complex issue with both technical and non-technical business stakeholders using storytelling and data visualization

TECHNICAL

Programming Languages: Python, R, SQL, HTML, JavaScript, jQuery, Bash, Git

Big Data & Machine Learning: Spark, Python (e.g., Scikit-learn, NumPy, Pandas, TensorFlow)

Data Science & Analytics: ETL, Data pipeline (Cleansing, Wrangling, Modeling, Visualization, Interpretation)
Statistics, Time Series, Experiential design, Recommender system, Hypothesis testing, APIs, Power BI

EDUCATION

Master of Science in Mathematics and Statistics

Georgetown University

WASHINGTON, DC

Completion Date: May 2023

- **Relevant Coursework:** Statistics, Deep Learning, Financial Mathematics, Operation Management in Python, Data Analysis in R, Mathematics Methods for Machine Learning, AI Algorithms

Bachelor of Science in Mathematics with Summa Cum Laude

University of South Carolina

SPARTANBURG, SC

Completion Date: May 2021

WORK EXPERIENCE

Data Analyst

Unifull America Inc

GREENVILLE, SC

July 2023-Nov2024

- **Data Integration and Automation:** Collaborated with data engineers to collect and cleanse sales data from over 10 sources, integrating pre-processed data via SSIS into a centralized repository on AWS, improving data integration efficiency by 60%.
- **Marketing Analysis and KPI Development:** Partnered with marketing to develop 10+ KPIs using SQL and Tableau, enabling real-time customer engagement monitoring and supporting personalized marketing strategies.
- **Statistical Analysis and Sales Driver Identification:** Employed hypothesis testing, linear regression, and PCA on 20+ variables to identify sales drivers during the pandemic, driving data-informed decisions.
- **Machine Learning Model Development and Risk Detection:** Performed feature engineering and trained ML models with scikit-learn and PyTorch, including XGBoost and SVM, achieving a 72% F1 score in risk detection for carbon products.
- **A/B Testing and Performance Optimization:** Collaborated on A/B testing to optimize P0 metrics, contributing to an 8% increase in pricing efficiency through statistical inference.

Data Analyst (Intern)

Jiaming Advanced Carbon Materials

JIANGSU, CHINA

June 2021-Dec2021

- **Time Series Analysis and Market Trend Forecasting:** Utilized ARIMAX for time series analysis combined with survival models to forecast market trends, informing targeted marketing strategies.
- **Logistics Process Optimization and Bottleneck Identification:** Conducted funnel analysis to identify logistics bottlenecks, implementing a shipping hierarchy that reduced latency by 22%.
- **Data Visualization and Dashboard Construction:** Built interactive dashboards with SQL and Power BI to visualize key metrics, enhancing data storytelling and stakeholder accountability.
- **Metrics Review and Sales Strategy Driven:** Facilitated weekly metrics reviews, monitoring trends and anomalies to inform segmented sales strategies.

RESEARCH EXPERIENCE

Stock Analysis and Prediction

April 2024 – Dec2024

- Employed SQL to efficiently manage and query against 300k+ stock data of the big tech companies.
- Employed rigorous machine learning model evaluation techniques, fine-tuning parameters and optimizing the prophet model to enhance its predictive accuracy. Achieved an accurate model with iterative capability.
