SUMMARY

Business Data Analyst with 4+ years of experience delivering healthcare analytics solutions using SQL, Python, and statistical modeling techniques. Expertise in clinical data analysis, KPI development, ETL pipelines, and business intelligence tools including Power BI and Tableau. Proven ability to translate complex requirements into scalable solutions, optimize processes, and drive data informed decision making within Agile environments while ensuring HIPAA compliance, data governance, and stakeholder alignment.

SKILLS

Programming Languages: Python (NumPy, Pandas, Matplotlib, Seaborn), SQL, R

Data Analytics: SAS, Statistical Modeling, Hypothesis Testing, A/B Testing, Time Series Analysis, Regression, Exploratory Data Analysis, Data Cleansing, Data Validation, Data Interpretation, Data Wrangling

Business Intelligence: Power BI, Tableau, Advanced Excel (Power Query, Pivot Tables, DAX), SSRS, Looker, KPIs

Databases: MySQL, SQL Server, PL/SQL, PostgreSQL, NoSQL, Oracle, MongoDB

Data Engineering & Cloud: ETL Pipelines, Data Warehousing, Data Lineage, Google BigQuery, AWS (S3, EC2, Lambda), Azure

Healthcare & Domain: Healthcare Analytics, Clinical Data Analysis, HIPAA Compliance, EHR, EMR, Regulatory Data Standards

Business Analysis: Requirements Gathering, BRD, FRD, SRS, RTM, Stakeholder Management, SDLC, Agile Scrum, UAT, User Stories

Tools & Technologies: JIRA, Confluence, MS Project, Data Governance, SIEM, Wireshark, Nmap

PROFESSIONAL EXPERIENCE

Syneos Health, United States

January 2025 – Present

Business Data Analyst

- Spearheaded requirement elicitation through stakeholder workshops, translating business needs into BRD and FRD artifacts while ensuring alignment with SDLC governance and HIPAA compliant healthcare data standards.
- Engineered KPI dashboards using Power BI, DAX, and SQL, enabling real time monitoring of clinical operations, patient level metrics, and healthcare performance indicators across enterprise analytics environments.
- Applied statistical modeling, hypothesis testing, and A/B experimentation using Python and R, identifying trends within clinical trial datasets that improved forecasting accuracy and reduced operational variability.
- Architected ETL pipelines leveraging AWS S3, Lambda, and BigQuery, ensuring secure processing of healthcare datasets, maintaining data lineage, and optimizing large scale transformations across clinical analytics platforms.
- Directed Agile workflows managing user stories, sprint cycles, and acceptance criteria within JIRA, accelerating healthcare analytics solution delivery by 22% while maintaining compliance with quality assurance standards.
- Led UAT execution including test case validation, defect tracking, and stakeholder approvals, ensuring successful deployment of healthcare reporting systems with reduced post implementation discrepancies and enhanced user adoption.

Adons Softech, India

August 2020 – December 2023

Business Data Analyst

- Developed optimized SQL queries and relational data models supporting enterprise reporting systems, enabling efficient processing of structured and semi structured datasets across multiple business and operational domains.
- Designed interactive dashboards using Tableau, Power BI, and advanced Excel, delivering actionable insights that improved reporting efficiency by 35% and enhanced decision making across organizational stakeholders.
- Conducted exploratory data analysis, regression modeling, and time series forecasting using Python and SAS, identifying key performance drivers and supporting long term strategic planning initiatives.
- Managed requirements lifecycle including gap analysis, process mapping, and RTM tracking, ensuring traceability and alignment between business objectives and analytical deliverables across cross functional teams.
- Automated ETL pipelines and reporting workflows, reducing processing time by 30% while improving data accuracy, validation frameworks, and metadata management within enterprise analytics ecosystems.
- Collaborated with IT and security teams utilizing SIEM platforms, Wireshark, and Nmap to analyze anomalies, supporting threat detection initiatives and strengthening enterprise risk mitigation strategies.

EDUCATION

Master of Science in Business Analytics

January 2024 – April 2025

Sacred Heart University, Fairfield, United States

Bachelor in Business Administration

July 2018 – March 2021

Andhra University, Andhra Pradesh, India
