

AKRITI SAXENA

SENIOR DATA ANALYST | BUSINESS INTELLIGENCE | ANALYTICS & REPORTING

Charlotte, NC | 803-258-0087 | akriti.s@zohomail.com | linkedin.com/in/akritisaxena08 | github.com/asaxena8

PROFESSIONAL SUMMARY

Senior Data Analyst with 4+ years of experience delivering enterprise analytics, business intelligence, data modeling, reporting, and data pipeline solutions across SaaS, CPG, and regulated environments. Expertise in SQL, Python, Tableau, Power BI, Snowflake, Redshift, AWS, and Azure, with a track record of building executive-ready dashboards, optimizing data workflows, standardizing KPI definitions, and translating business requirements into scalable analytics solutions. Delivered 27% faster dashboard refreshes, 35% less manual reconciliation, 40% higher dashboard adoption, and 200+ fewer monthly ad hoc requests.

CORE SKILLS

Data Analysis & SQL: SQL, CTEs, Window Functions, Stored Procedures, Query Optimization, Data Validation, KPI Analysis, Root-Cause Analysis, Statistical Analysis

BI & Visualization: Tableau Desktop/Server/Prep, Power BI, DAX, Power Query, Salesforce CRM Analytics/SAQL, Advanced Excel

Data Engineering & Modeling: ETL/ELT, Data Pipelines, Dimensional Modeling, Star Schema, Data Quality, Incremental Loads, Snowflake, Amazon Redshift, Databricks, Apache Spark, Azure Data Factory

Programming & Cloud: Python (Pandas, NumPy, scikit-learn), R, AWS (S3, Glue, Lambda, Athena, Redshift), Azure, Git/GitHub

Business & Delivery: Requirements Gathering, Stakeholder Management, Executive Reporting, Metric Definitions, Cross-functional Collaboration, Agile/Scrum

PROFESSIONAL EXPERIENCE

Data Analyst | Salesforce | San Francisco, CA (Remote) | Jun 2025 – Present

Technology: Salesforce CRM Analytics, SAQL, Tableau, SQL, Snowflake, Python

- Own end-to-end analytics and reporting for Salesforce Global Sales Programs, managing dashboards and data pipelines serving as the source of truth for pipeline generation and ACV contribution across a 10,000+ person sales organization.
- Led migration of Sales Programs dashboards from CRM Analytics to Tableau, redesigning data models, KPI calculation frameworks, and parameter-driven views to achieve full reporting parity while retiring legacy analytics licensing.
- Deployed a self-service Tableau analytics platform for 800+ enterprise users, increasing dashboard adoption 40% and eliminating roughly 200 monthly ad hoc data requests.
- Refactored SAQL queries, joins, filters, SQL logic, and Tableau calculations to improve dashboard performance and strengthen data reconciliation, validation, and reporting reliability.
- Partnered with cross-functional stakeholders to translate business requirements and complex business rules into standardized KPI definitions, scalable data models, and production-grade reporting logic.

Data Analyst | McKesson Corporation | San Francisco, CA (Remote) | Aug 2024 – May 2025

Technology: Snowflake, Redshift, Python, AWS Glue/Lambda/Athena, Power BI, Tableau, R

- Built SQL and Python data pipelines processing 50M+ healthcare claims records, enabling standardized KPI reporting for 12+ executive stakeholders across finance and operations.
- Engineered Snowflake star-schema dimensional models and optimized Redshift queries, reducing dashboard refresh latency 27% and accelerating weekly executive review cycles.
- Delivered Power BI and Tableau dashboards using DAX and calculated fields to track cost, utilization, and revenue KPIs, reducing ad hoc data requests 30% and improving reporting consistency.
- Automated ETL workflows with AWS Glue, Lambda, and Athena using incremental loading and data validation checks, cutting manual reconciliation effort 35% and improving pipeline reliability.
- Applied time-series and regression analysis in Python and R to identify anomalous billing and fraud-risk patterns, informing compliance review prioritization.

Senior Data Analyst | Capgemini Technology Solutions | India | Aug 2021 – Aug 2023

Technology: Azure Data Factory, Apache Spark, Power BI, Python, SQL, Databricks

- Drove 9% YoY sales growth for Unilever by building Azure/Spark pipelines that transformed 10M+ SKU records into demand-trend KPIs, surfacing 3 underperforming product lines for targeted promotions.
- Designed scalable ETL pipelines in Azure Data Factory and Spark using partitioning, joins, and caching to support high-volume ingestion, transformation, and business-ready analytics datasets.
- Built interactive Power BI dashboards on Azure/Spark outputs with incremental data processing, supporting growth of the active analytics user base from 1.0M to 1.1M.
- Led stakeholder requirements sessions for a 5-person analytics team, translating business needs into scalable technical solutions aligned with enterprise architecture and delivery constraints.

EDUCATION

Master of Science in Computer Science - University of North Carolina at Charlotte | Aug 2023 – May 2025

Coursework: Machine Learning, Data Mining, Cloud Computing, Statistical Analysis, Database Systems

Bachelor of Technology in Computer Science Engineering - Malla Reddy College of Engineering and Technology | Jul 2018 – Jul 2022

CERTIFICATIONS

AWS Certified AI Practitioner - Amazon Web Services | [Certificate](#)

AWS Academy Graduate, Data Engineering - Amazon Web Services | [Certificate](#)
