[mohanakshaya.work@gmail.com](mailto:mohanakshaya.work@gmail.com) | 469.514.1352 | <http://www.linkedin.com/in/akshayamohan29>

## EDUCATION

**Master of Science, Information Technology and Management** | May 2024

The University of Texas at Dallas

**Bachelor of Engineering, Computer Science and Engineering**

Sri Ramakrishna Engineering College

## SKILLS

SQL, Python, R, DBT, SAS, AWS (S3, EC2, RDS, Redshift), Azure, GCP BigQuery, Hadoop, Snowflake, Data Warehousing, ETL Development, Alteryx, Tableau, Power BI, Looker, Microsoft Excel, Stakeholder Engagement

## CERTIFICATION

Google Data Analytics Professional Certificate, Microsoft Power BI Data Analyst Professional, AWS Cloud Practitioner

## EXPERIENCE

Bright Mind Enrichment and Schooling | Dallas, TX (Remote)

**Data Analyst** | Jul 2024 - Present

- Automated Sprint story point completion rate tracking using SQL and Excel (Pivot Tables, Macros), improving testing efficiency and enhancing capacity planning accuracy by 30%, optimizing resource allocation and workload balancing.
- Increased test case coverage by 25% by automating test execution reports in Excel using Power Query for real-time JIRA data extraction and VBA for automated reporting, improving test accuracy and cycle efficiency.
- Built interactive Power BI dashboards using DAX and Power Query to track defect closure rates, reduced manual reporting by 60%, and provided real-time insights that enabled senior leadership to prioritize high-impact issues.
- Conducted EDA on 50,000+ testing records using Python stack (Pandas, NumPy), implementing statistical methods to identify and resolve missing values and outliers, achieving 99.8% data integrity.
- Facilitated strategic alignment sessions with senior leaders to drive process improvements and deliver ad-hoc reports, enhancing the integration of business objectives with testing strategies.

CommoditEdge LLC | Dallas, TX (Remote) | Capstone Project

**Business Analyst** | Jan 2024 - May 2024

- Developed ETL pipelines using DBT to prepare and transform data for market trend analysis, providing actionable insights that projected a 7% market share for the client and supporting data-driven business decisions.
- Transformed raw sales data in Snowflake using SQL, developing a market segmentation model that identified four high-potential provinces for solar battery charger expansion.
- Supported Agile methodology by prioritizing backlog and product demonstrations ensuring user stories were clearly defined, development milestones were met, contributing to a 95% on-time delivery rate for key features.
- Redesigned reporting workflows based on stakeholder feedback, simplifying complex data for non-technical users and enabling leadership to make timely, confident decisions directly impacting operational efficiency.

BlueRain Cloud Solutions | Coimbatore, India

**Data Analyst** | Nov 2019 - Jun 2022

- Extracted and analyzed large financial datasets using advanced Excel functions (PivotTables, VLOOKUP, VBA), developed Tableau dashboards, providing actionable insights that led to a 20% increase in customer engagement.
- Integrated customer feedback data from surveys into existing CRM data by designing advanced SQL queries, providing crucial insight that led to fixing the two biggest causes of crashes.
- Developed 10+ SQL reports to monitor key performance indicators (KPIs), improving reporting efficiency by 40%.
- Collaborated with stakeholders to capture business requirements and define product vision through workshops, meetings, and interviews, ensuring alignment with organizational goals.

## PROJECT EXPERIENCE

**Exploratory Data Analysis (EDA) - McDonald's Nutrition Study** | Jan 2025

- Conducted hypothesis testing using Python (NumPy) to analyze over 2,500 data points; identified statistical correlations between food choices and nutritional intake, informing future product development strategies.
- Visualized key findings using Python Seaborn and Matplotlib, improving data accuracy by 15%, and providing actionable insights that supported data-driven decision-making.

**Customer Segmentation for E-Commerce** | Dec 2024

- Extracted and transformed data using MySQL from 100,000+ customer transactions to segment buyers using K-Means and hierarchical clustering, identifying 5 customer profiles based on purchasing behavior.
- Developed 5 interactive dashboards in Tableau to visualize segments improving process efficiency by 40%.
- Generated detailed reports with recommendations that led to a 20% improvement in marketing campaign effectiveness, contributing to enhanced business performance and operational success.
