Pronouns: she/her

(724)-553-4742 • Pittsburgh, PA • alexandramlove99@gmail.com

EXPERIENCE

Data Marketing Specialist

Jan. 2023 - Present

Contributor Development Partnership | Boston, Massachusetts

- Managed and executed mailing campaigns for 45 PBS stations, ensuring alignment with specific station goals and enhancing audience engagement.
- Developed and authored SQL queries in Snowflake for data segmentation, optimizing targeted mailings and improving overall campaign performance.
- Acted as subject matter expert for primary mailing processes, leading quality checks and troubleshooting in the absence of senior team members.
- Collaborated with the Membership Marketing Team to understand the impact of marketing decisions on audience behavior.

Data Analytical Engineer I

Jan. 2022 - Sep. 2022

KCF Technologies | State College, PA

- Developed predictive models in Python to forecast power outages at industrial plants, saving clients an estimated \$50,000 per hour.
- Utilized Azure DevOps for project management and code collaboration, improving team workflow and project delivery.
- Conducted research on bearing faults, leading to the creation of a knowledge-sharing document for clients.

Business Analyst

Sept. 2021 - Jan. 2022

KCF Technologies | State College, PA

- Worked closely with clients to gather system requirements and delivered process improvements based on analysis.
- Conducted business process analysis and defined cost-benefit structures for client projects

Edge Computing and Data Science Intern

Feb. 2021 - Aug. 2021

KCF Technologies | State College, PA

- Developed object detection and image classification models using TensorFlow and GitHub.
- Worked collaboratively on software development tasks and contributed to machine learning research.

EDUCATION

Pennsylvania State University | B.S. in Computational Data Science

SKILLS

Programming Languages: Python (Advanced), SQL (Advanced), Java, C++, TensorFlow, Machine Learning

Tools & Platforms: Snowflake, Azure DevOps, Git, Jupyter Notebook, GitHub
