

Ana Rita Alencar Peixoto, MS

Jersey City, NJ | aa18876n@pace.edu | +1 (201) 993-7370 | LinkedIn: [linkedin/anaritaalencar](https://www.linkedin.com/in/anaritaalencar)

Data & Business Analyst | AI & Analytics | Strategy & Tech Projects

EDUCATION

Pace University – Seidenberg School of Computer Science and Information Systems

M.S. in Information Systems | Concentration: Data Analysis | GPA: 3.97 | New York, NY | 2024–2025

Universidade Federal de São João del-Rei

B.S. in Chemical Engineering | GPA: 3.3 (Ranked 11/50) | Ouro Branco, Brazil | 2016–2021

TECHNICAL SKILLS

Languages: Python, SQL, R

Data Tools: Power BI, Tableau, Excel

Other: Agile, MS Project, Data Modeling, Statistics, Machine Learning

EXPERIENCE

True Environmental – Fall AI Intern | New York, NY | Sept 2025 – Present

Environmental consulting & engineering platform specializing in M&A and sustainable growth

- Supporting the transition toward an AI-driven culture by embedding AI into daily operations.
- Collecting, managing, and analyzing datasets to generate insights for strategic decision-making.
- Building interactive dashboards in Power BI to visualize trends and support executive planning.

Vallourec – Project Manager Intern | Belo Horizonte, Brazil | 2019 – 2020

Global leader in tube solutions for energy and industrial markets

- Spearheaded two cross-functional projects to reduce expenses and automate processes, applying Agile methodology.
- Automated company-wide report generation, cutting report creation time by 70%.
- Led change management initiatives using MS Project, Power BI, and Excel to align timelines and objectives.
- Streamlined workflows to eliminate bottlenecks, achieving \$1M+ in annual expense reductions.

PROJECTS

Immigration Hackathon – Foreign Founders & General Assembly (Data Analysis, UX Design & Strategy)

- Teamed up to design MoneyPal, an AI finance app helping immigrants with budgeting, investments, and loans.
- Built a high-fidelity UI mockup and technical implementation plan to showcase product feasibility.
- Applied strategic planning to align product vision with immigrant finance challenges.
- Secured 3rd place among diverse competing teams by presenting to founders, innovators, and industry professionals.

IBM & NYC Hall AI Innovation Challenge (Data Analysis & Machine Learning)

- Developed an AI solution to improve NYC's response to severe floods.
- Collected and analyzed real-time data from 20+ sources.
- Applied machine learning to predict flood risks and design mitigation strategies.
- Achieved Top 5 finalist ranking out of 30 teams.

Event Management System (SQL & Data Modeling)

- Designed a data model to manage events, clients, employees, and venues using Kimball's dimensional modeling.
- Wrote 20+ SQL queries to generate, manipulate, and retrieve thousands of rows of data.
- Pressure-tested the system and produced detailed design documentation.

Ambev USA College Case Competition (Excel, Power BI & Strategy)

- Conducted data analysis and visualization of customer engagement/retention for Ambev.
- Designed a loyalty program to boost repurchase rates, measuring effectiveness against KPIs and benchmarks.
- Won 1st place among 50 international teams.
