US Citizen

Software QA Engineer | QA Automation

Driven by quality. Focused on precision

PROFESSIONAL SUMMARY

Over **6+ years** of professional Quality Assurance experience testing **Web-based and Mobile (iOS/Android)** applications in healthcare, insurance, and financing domains guided by the principle: **"Think like a user. Test like a scientist."**

- Proficient in **building scalable UI and backend automation frameworks from scratch** using **Java, JavaScript, WebdriverIO, Selenium, TestNG, JUnit, Maven, Cucumber (Gherkin), and REST Assured**, successfully designed frameworks supporting 600+ automated tests and integrated them into **CI/CD pipelines using Jenkins and GitHub Actions**
- Exceptional knowledge of **Page Object Model (POM), BDD (Behavior-Driven Development), and TDD (Test-Driven Development)** software development methodologies, as well as **SDLC, STLC, and Defect** triage
- Master in developing test documentation: **Test Plans, Test Strategies, Test Suites, Test Cases, and Traceability Matrix**
- Hands-on experience in performing various types of testing: **Functional, Regression, Integration, Smoke, Sanity, Compatibility, API, UI, end-to-end (E2E), User Acceptance (UAT), Performance**
- Strong advocate of practicing **shift-left methodology** to contribute in the early stage of the software development life cycle
- Proactive self-starter with a keen eye for detail, with a focus on end-user experiences and the ability to go above and beyond to ensure a high-quality release
- Proficient in integrating **AI** into Testing Processes: Leveraged **AI-powered tools** to generate test cases from historical defect data, reducing manual test design time.

TECHNICAL SKILLS

- **Programming languages/Formats:** Java, JavaScript (JS), HTML, CSS
- **Test Automation Tools:** Selenium WebDriver, Webdriver.io, Cypress, Playwright, Copilot
- **Frameworks:** TDD, BDD with Cucumber, Gherkin, TestNG/Junit
- **Database:** SQL Server, Oracle Database
- **CI/CD:** Jenkins, Gitlab
- **API:** REST API, SoapUI, Postman, Swagger, XML, JSON
- **Debugging tools:** Chrome DevTools, Charles Proxy
- **OS:** Android OS, iOS, MacOS, MS Windows
- **TMS:** Jira, Trello, TestRail, Confluence
- **Version control:** Git, GitHub, Gitlab
- **Mobile testing:** Android Studio, XCode, ADB commands
- **Methodologies:** Agile/Scrum/Kanban
- **Terminal:** Unix/Linux
- **Observability:** Kibana, Datalog
- **Accessibility Testing:** Keyboard navigation, High contrast mode, VoiceOver, Reflow, NVDA (WCAG)
- **Server:** GCP, AWS

SOFT SKILLS

- Strong analytical skills
- Attentive to details
- Able to describe complex concepts in simple terms
- Excellent communication
- Strong problem-solving skills
- Result-oriented, strategy thinking
- Great team player as well as an individual contributor
- Meticulous, responsible, passionate about quality

WORK EXPERIENCE

Test Engineer | Full-time | Remote
Northwestern Mutual, USA

January 2022 – July 2025

Project: Platform for Life, Disability, Annuity, and Long-Term Care insurance

- Took full ownership of manual and automation test processes for the Web-based and Desktop insurance platform as a sole QA
- Built a scalable automation **framework from scratch** using **JavaScript and WebDriverIO**, **reducing regression testing time by ~30%** through modular test design and **seamless integration** into **GitLab CI/CD pipelines**
- **Optimized test automation processes by reducing flaky tests** and enhancing framework stability, resulting in more reliable, maintainable, and high-quality test suites
- Performed **functional, integration, regression, sanity, smoke, UI, E2E, compatibility (cross-browser/cross-platform)** testing
- Leveraged **Postman for automated and manual API validation** to detect backend issues early, accelerating defect discovery and enhancing overall product quality
- Designed comprehensive **Test Plans, Test strategies, Test scenarios, Test cases** by following a **"thinking out of the box"** and **"User-first" mindset**
- Executed complex **SQL queries** for database testing, ensuring data accuracy using **MySQL**
- **Work closely with Engineering, Product, and Design teams** to help reproduce and resolve issues, assist in gathering requirements, and discuss the best practices for implementing new features
- **Established QA triage processes** to organize and prioritize tickets effectively
- **Built a relationship** with the **Customer Support team** to review, analyze customer feedback, and identify potential workarounds
- Provided **mentorship** for newcomers, set up KT sessions, and showed a feature demo
- Worked in a fast-paced Agile environment, following all SCRUM ceremonies, including QA triage meetings.

Software QA Engineer | Contract | Remote
GE Healthcare, IL, USA

Sept, 2019 – Dec, 2021

Project: Healthcare Web-based platform

- Contributed to creating, executing, and maintaining test scripts for regression and smoke test suites using **Java, Selenium Webdriver, JUnit, and TestNG**
- Developed and maintained automated test suites integrated with CI pipelines to provide rapid feedback using **Jenkins**
- **Champion BDD approach** with **Cucumber** and **Gherkin** language, aligning test scenarios with business requirements and user workflows.

QA Analyst | Contract | Remote
Union Home Mortgage, Strongsville, OH

Oct, 2017 – Aug, 2019

- Conducted Frontend and Backend manual testing of Web-based and Mobile finance apps.
- Applied various types of testing approaches, including **static, dynamic, black-box, experience-based** techniques
- Validate user stories, file comprehensive defect reports, and feature enhancement tickets
- Ran **adb** commands for **Android testing, Xcode for iOS**.
