Professional Summary

Experienced Data Analyst and Business Intelligence Consultant with over five years of expertise in utilizing Power BI for data visualization and advanced analytics. Proven track record in the digital marketing, recruitment firm, finance, and sales sectors, with strong skills in dataflows, advanced Power BI functions, and creating comprehensive reports to support strategic decision-making. With a solid background in business development and project management.

Experience

BI AND OPERATIONS MANAGER

CP & KRELL GROUP - DALLAS, TEXAS, UNITED STATES (REMOTE)

JULY 2024 – PRESENT

- Monitored and managed cash flow to ensure optimal financial health, including tracking payment statuses, sending invoices on time, and proactively following up on overdue accounts.
- Collaborated with the finance team to streamline billing processes, improve accounts receivable efficiency, and provide regular updates to leadership on invoice performance and financial trends.
- Fostered a results-driven environment by aligning operational practices with the company's strategic objectives.
- Leveraged technology and data visualization tools to integrate data from various systems, monitor key performance metrics, and identify business trends to support strategic initiatives in sales, marketing, and company-wide objectives.
- Analyzed marketing campaigns to assess performance, identify trends, and recommend data-driven adjustments to optimize engagement, conversion rates, and audience segmentation.
- Conducted detailed data analysis to uncover new business opportunities, supported business development campaigns across the USA, Latin America, Europe and Asia, and maintained executive insights on industry trends and key competitors.
- Maintained clean and reliable databases, ensuring data integrity and supporting accurate and efficient reporting.

BUSINESS INTELLIGENCE ANALYST

CP & KRELL GROUP - DALLAS, TEXAS, UNITED STATES (REMOTE)

NOV 2023 - PRESENT

- Leveraged technology and data visualization tools to integrate data from various systems, monitor key performance metrics, and identify business trends, supporting strategic initiatives focused on sales, marketing, and company-wide objectives.
- Supported reporting and analysis for strategic initiatives using Power BI, with a focus on sales and marketing efforts as well as broader company objectives. I translated complex datasets into clear,

actionable insights that guided leadership in refining marketing strategies and optimizing sales performance.

- Analyzed data from marketing campaigns to assess overall performance, identifying key trends, patterns, and opportunities for improvement. By providing a thorough analysis of metrics such as engagement, conversion rates, and audience segmentation, I was able to recommend adjustments that led to more effective campaign execution.
- Maintained executive-level insights about industry trends, key companies, and positions.
- Conducted detailed data analysis to uncover new prospects and market opportunities, contributing to strategic business decisions.
- Created and executed business development campaigns, reaching potential clients in the USA, Latin America, and Europe.
- Utilized SQL to query and manipulate large datasets, ensuring the accuracy, integrity, and efficiency of CRM systems. By streamlining data processes, I maintained the reliability of key business information and supported improved data management practices across the organization.
- Played a key role in establishing a data-driven culture within the company, implementing best practices to ensure that data entering CRM systems was free from duplication, inconsistencies, and errors. This effort enhanced the overall quality of our data and allowed for more reliable and insightful reporting.

CHIEF OF OPERATIONS AND PROJECTS

GÉNESIS DIGITAL THINKING - PUEBLA, MÉXICO (REMOTE)

JAN 2023 - NOV 2023

- Supervised marketing teams by strategically assigning tasks based on individual strengths and expertise, while actively tracking progress through advanced analytics tools. This approach not only maximized team productivity but also fostered a collaborative environment that encouraged professional growth and skill development.
- Coordinated multiple marketing projects simultaneously, ensuring timely execution and high-quality deliverables while strictly adhering to budget constraints. By utilizing effective project management techniques and regular status updates I kept all projects on track and aligned with the marketing strategy.
- Implemented data-driven strategies to optimize project workflows and improve team efficiency.
- Conducted comprehensive performance analysis of marketing initiatives, utilizing key metrics and insights to provide actionable recommendations for enhancing campaign effectiveness. By systematically evaluating the results of various marketing efforts, I was able to identify successful strategies and areas for improvement, driving continuous optimization.
- Established and maintained strong client relationships, ensuring the delivery of high-quality services through regular performance reviews and feedback loops.

DATA ANALYST

GÉNESIS DIGITAL THINKING - PUEBLA, MÉXICO (REMOTE)

FEB 2022 - NOV 2023

- Created detailed weekly and monthly reports to analyze brand KPIs, using a combination of advanced data analysis tools like Power BI and Excel to collect, process, and visualize data. These reports

provided actionable insights on brand performance, highlighting areas for improvement and growth across key business metrics.

- Maintained comprehensive scorecards that measured customer performance against strategic objectives, ensuring that all data was accurately tracked and aligned with the company's overarching goals. This enabled better monitoring of customer engagement, satisfaction, and retention efforts.
- Collaborated with multiple departments, including marketing, sales, and finance, to gather and verify data, ensuring consistency and accuracy in reporting. Facilitated cross-functional communication to ensure that all stakeholders had a clear understanding of the data and its implications for business strategy.
- Utilized Power BI to transform raw data into meaningful, visually engaging insights, providing leadership with clear and concise dashboards that support informed decision-making.

JUNIOR MEDIA BUYER

GÉNESIS DIGITAL THINKING - PUEBLA, MÉXICO (REMOTE)

FEB 2022 - DEC 2022

- Executed Facebook Ads campaigns with precise targeting and continuous optimization, focusing on maximizing return on investment (ROI) by adjusting audience parameters and ad placements based on real-time performance data. This strategic approach ensured that each campaign reached the most relevant audience, ultimately driving higher engagement and conversions.
- Utilized various analytical tools to monitor and evaluate the performance of advertising campaigns, systematically tracking key metrics such as click-through rates, conversion rates, and overall ROI. This data-driven approach allowed for informed decision-making and adjustments throughout the campaign lifecycle to enhance effectiveness.
- Collaborated closely with the strategy team to ensure that the overall marketing strategy was fully aligned with the specific needs and goals of the advertising campaigns.
- Conducted data analysis on ad performance to identify trends and insights, optimizing future campaigns for better results.

BRANCH MANAGER

DALAILAVA - PUEBLA, MÉXICO (ON-SITE)

AUG 2021 - DEC 2021

- Managed daily operations of the branch, ensuring positive customer experience and resolving issues.
- Led a data analysis project aimed at improving operational efficiency, leveraging SQL for complex data manipulation and optimization.
- Utilized SQL queries to clean and standardize large datasets, ensuring data accuracy and consistency across multiple sources. This process involved removing duplicates, correcting inconsistencies, and validating data entries to maintain high data quality.
- Analyzed and extracted key insights from these datasets through complex SQL queries, identifying trends and patterns that informed business decisions and strategic planning, particularly in areas such as marketing performance and customer segmentation. Developed reports and dashboards using Power BI, integrating SQL-based data analysis to provide actionable insights for management.

- Developed complex SQL queries to identify inefficiencies and recommend actionable improvements in operational processes.
