Education

University of Georgia

June 2022 – May 2025

B.S. Biological Engineering

- GPA: 3.24/4.0
- **Coursework:** Computational Engr Methods, Engr Graphics Design, Engr Decision Making, Engr Design Methodology, Public Speaking, Engr Physiology, Bioengineering Professional Persona, Computing and Programming, Statistics

Professional Experience

Data Analyst Intern, *Excelerate*

June 2025 - Present

- Queried marketing data using SQL to find under-performing campaigns; analysis supported a 15% shift in ad budget
- Built Power BI dashboards to visualize click-through and conversion trends by age group and region; used in weekly team reviews
- Automated routine data cleaning with Python (Pandas), cutting prep time by over half

Manager Assistant, *Tony's Complete Automotive*

May 2023 - Present

- Managed appointment scheduling, service documentation, and follow-ups for 100+ customers per week
- Tracked parts inventory and coordinated with vendors to maintain stock for critical components
- Supported the owner with day-to-day operations, including invoice handling and customer communications

Project Experience

Aquaponics Engineering Design, *Market Research Analyst*

Jan 2024 – May 2024

- Researched 10+ commercial systems and identified gaps in efficiency, cost, and scalability
- Built a decision matrix comparing design options; guided selection of final system
- Authored the final technical report documenting system rationale, design tradeoffs, and implementation plan

Epidemiology Research Project, *Data Analyst*

Aug 2024 – May 2025

- Analyzed CDC BRFSS 2022 data (GA) using R and Excel to track health trends across demographics
- Created summary statistics and visuals for the report and presentation
- Collaborated on data interpretation and communication of key public health insights

Best Laboratory Glove Fit Method Project, *Biomedical Human Factors Researcher*

Aug 2025 – Feb 2025

- Directed user research on 100+ participants, collecting data on glove fit, comfort, dexterity, and material preferences to improve medical glove design
- Evaluated hand anthropometry data from 50+ individuals, measuring dimensions such as finger length and hand circumference to optimize glove sizing
- Achieved 90% survey response rate; findings were included in technical report and final presentation

Waterproof Bandage Evaluation, *Testing & Analysis Lead*

Apr 2025 - May 2025

- Designed and ran tests on waterproof bandages to evaluate adhesion, flexibility, and water resistance across materials
- Measured performance metrics under wet and dry conditions; documented test outcomes and failure modes
- Presented findings with visual data summaries to peers in design review

Skills

Technical Skills: Microsoft Office, Programming (MATLAB, Python, Java), Fabrication(3D printing, laser cutting), 3D design (AutoCAD, Inventor, SolidWorks, Revit, Rhino 3D), Data (R, GA4, SQL, Power BI, JMP)
