

ANNE EMESIBE

Austell, GA. 30106 | (615)-481-0600 | thebestlady1@gmail.com | Business Data Analyst

As a business analyst, my primary objective is to support business operations by managing and organizing data, conducting data analysis with data mining to distinguish patterns and recognize trends. Developing solutions that help to interrupt data using visualization dashboards for storytelling. My aim is to create a positive and productive work environment by communicating with team members, internal and external clients, setting clear goals, and monitoring performance.

EXPERIENCE

January 2019 - Present

Associate Data Analyst | OPTUM | Remote

- Review file formats and data structures in AWS platform using targeted SSIS package for file process
- Perform QA reviews on ETL processes to compare landing table configurations and capture errors.
