Summary

Analytical healthcare operations and clinical informaticist with 5+ years of healthcare data analysis, managing remote teams, and quality improvement and process development. A Master's graduate in Informatics at OHSU with growing technical skills in Python, SQL, Tableau and Excel. Adept at translating frontline challenges into systems-level improvements and SOPs. Targeting analyst and informatics roles at mid-sized or enterprise-level organizations where data, workforce and process intersect.

Skills

Python · SQL · Excel · Tableau

Epic · Brightree – Athena

CPT4 · ICD-10-CM · HCPCS Level II

Healthcare Analytics · SOP Development · Workflow Optimization · Project Management

Experience

Synapse Health

Member Transition Specialist

05/2024 - Present

- Identified documentation gaps and qualified patient DME orders under CMS and commercial guidelines, reducing backlog from 30+ to under 7 cases daily with 98% accuracy.
- Designed and implemented an Excel-based task tracker to monitor case throughput, increasing visibility and reducing order delays across the team.
- Authored SOPs and specialty workflows for complex respiratory orders, scaling a new department amid shifting KPIs and high-volume onboarding.
- Built and delivered a structured training curriculum, shortening ramp-up time and standardizing onboarding for CPAP and respiratory order specialists.
- Provided 1:1 and group coaching to peers, improving cross-functional knowledge and contributing to department-wide gains in accuracy and efficiency.

Optum Healthcare

Health Information Management Associate

07/2023 - 04/2024

- Indexed medical records from multiple clinics into the EMR using standardized formats, supporting continuity of care for X patients weekly.
- Fulfilled patient medical record requests within HIPAA regulations, maintaining 100% compliance on internal audits.

ACU Serve Corp

Intake Lead

02/2021 - 05/2023

- Managed a 10-person remote intake team (primarily offshore) to stabilize a high-risk DME client, increasing order volume capacity by 40%.
- Developed Excel tools, job aids, and SOPs that reduced turnaround time by 3+ days and improved team accuracy from 70%.
- Created a financial tracking tool adopted across all affiliate clients, accelerating order closures and standardizing billing workflows.
- Partnered with client leadership to implement reporting mechanisms and workflow changes, securing two additional affiliated clients.
- Led analytics-based SOP revisions and retraining efforts using PowerBI and performance metrics to cut rework by 25% and align with evolving expectations.
