

SQL & DATA PROFESSIONAL • ETL DEVELOPMENT

Curious and dependable technology professional with experience in SQL development, ETL pipeline design, and data analysis. Quick to learn new tools, improve data processes, and collaborate with teams to deliver reliable results.

EXPERIENCE

TABULATION MANAGER

Russell Research, East Rutherford NJ / Mar 2022 - June 2025

- Structured and managed research data for business intelligence and reporting across 100s of jobs from dozens of clients
- Conducted complex statistical regressions and analytical reviews
- Automated workflows using Excel VBA macros to reduce manual effort and increase data throughput saving countless hours
- Facilitated cross-departmental meetings to align insights and improve data reporting processes
- Maintained data integrity across multiple sources and formats
- Created training documentation and operational guides covering processes from raw data cleaning to MaxDiff analysis execution

ASSOCIATE APPLICATION DEVELOPER

Selective Insurance Jan 2019 - Feb 2021

- Optimized ETL processes, reducing runtime by over 80%
- Monitored scheduled data pipelines to ensure task completion and resolution of failures
- Developed a new end-to-end process for generating documentation suitable for querying
- Designed and implemented a reconciliation process for financial data to ensure integrity
- Led the migration from IBM Netezza to IBM Integrated Analytics System
- Oversaw daily sprint planning, backlog grooming, and retrospectives as Scrum Master, facilitating cross-functional Agile ceremonies and maintaining sprint velocity

ELECTRONICS ASSOCIATE

Walmart Oct 2018 - Dec 2018

CUSTOMER SERVICE / CASHIER

Ronetco Supermarkets Apr 2014 - Oct 2018

- Handled customer requests and issues daily while maintaining high satisfaction
- Oversaw theft reduction at self-checkouts through proactive monitoring
- Trained more than 30 employees on store procedures
- Redesigned store training documents to improve onboarding efficiency
