Graduated: May 2025 | GPA: 3.44

Business Intelligence Data Analysis professional Certificate - Codecademy

Key Coursework: Web Development, Front-End Development, PHP/MySQL Programming, Database Design, Software Project Management

Associate of Science in Computer Science

Aims Community College – Greeley, CO

In progress

CERTIFICATIONS

- Python 3 – Codecademy Certificate of Completion
- HTML – Codecademy Certificate of Completion

PROJECTS

User Sign-Up/Admin Panel project

Technologies: PHP, MySQL, HTML/CSS

- Built a web-based control system to manage user signups and player rosters
- Developed backend logic including `add_student_from_tmp()` and `drop_player()` functions
- Modularized functionality using `player_mgr` and `admin_mgr` folders
- Implemented form validation and session-based access control

Medical Insurance Data Analysis project

Technologies: Python, CSV

- Analyzed patient data by age, gender, BMI, smoking status, and region
- Used loops, functions, and conditional logic to categorize and summarize trends

-

National Park Biodiversity Analysis — [GitHub](#) Python, Pandas, Seaborn, Jupyter Notebook

- Analyzed biodiversity data for U.S. national parks to identify species counts and conservation status.
- Created data visualizations showing species distribution and protection levels across multiple parks.
- Used groupby, pivot tables, and bar plots to highlight trends in endangered, threatened, and protected species.
- Identified most commonly observed species and overall park observation densities.
- Published the full project with source code and visualizations on GitHub.
