

# ANUJ SHAH | Data Analyst

Location: GA | Phone: (510) 399 – 9672 | Email: [dashah025@gmail.com](mailto:dashah025@gmail.com) | LinkedIn

## SUMMARY

Experienced **Data Analyst** with over **7+ years of experience** delivering impactful data-driven solutions across healthcare, finance, and insurance industries. Proficient in developing and optimizing **ETL pipelines**, creating **interactive dashboards**, and leveraging **machine learning models** to uncover insights and drive operational efficiencies. Expertise in working with **cloud platforms** like Google Cloud and Microsoft Azure, ensuring scalable, secure, and compliant data solutions. Adept at automating processes, performing **exploratory data analysis (EDA)**, and implementing **predictive analytics** to support strategic decision-making and enhance outcomes. Skilled in collaborating with cross-functional teams, managing large datasets, and aligning technical initiatives with business goals. Committed to data accuracy, compliance (HIPAA, GDPR, CCPA), and enhancing operational workflows through innovative technology.

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL

**Big Data Technologies:** Apache Spark

**Machine Learning Frameworks:** TensorFlow, XGBoost

**Cloud Technologies:** Google Cloud (BigQuery, Google Cloud Storage), Microsoft Azure (Azure Data Factory, Synapse Analytics, Azure Blob Storage, Azure Monitor, Log Analytics)

**ETL Tools and Data Integration:** Python-based ETL pipelines, Google BigQuery, Azure Data Factory

**Data Visualization:** Power BI, Tableau, Excel

**Data Analysis:** Exploratory Data Analysis (EDA), Advanced Data Validation, and Cleansing

**Data Governance and Compliance:** GDPR, CCPA, HIPAA

**Database Management:** Azure Data Lake Storage Gen2, Google BigQuery, SQL databases

**Monitoring Tools:** Azure Monitor, Log Analytics

**Project Management:** Cross-functional collaboration, training, and platform rollout strategies

**Documentation and Training:** Stakeholder documentation, training sessions on cloud tools and workflows

## PROFESSIONAL EXPERIENCE

DaVita, USA

Dec 2023 – Current

Data Analyst

- Spearheaded the development and implementation of a **cloud-based data integration platform**, consolidating disparate patient data sources (EHRs, IoT devices, and lab records), achieving a **98% data accuracy rate**.
- Designed and optimized **ETL pipelines** using Python and Google BigQuery, reducing data processing time by **35%** and enabling real-time insights for clinicians across the network.
- Built and maintained **Power BI dashboards** visualizing patient risk scores, treatment adherence, and clinical trends, improving decision-making efficiency by **40%** for healthcare providers.
- Collaborated with data scientists to develop **predictive analytics models** (TensorFlow, XGBoost) that identified high-risk patients, enabling **20% faster interventions** and improving patient outcomes by **20%**.
- Conducted **exploratory data analysis (EDA)** to identify patterns in clinical data, uncovering key trends and anomalies that informed strategic decision-making.
- Automated clinical documentation processes, integrating data streams from real-time monitoring devices, which reduced documentation errors by **30%** and streamlined workflows.
- Partnered with compliance teams to ensure all data processes adhered to **HIPAA regulations**, safeguarding patient data privacy and security.
- Supported the rollout of the new platform across 100+ clinics, training clinical and administrative staff, and driving a **25% increase in platform adoption rates**.
- Worked cross-functionally with IT, clinical, and leadership teams to align technical solutions with organizational goals, enhancing overall operational efficiency.
- Regularly monitored and updated **machine learning models**, incorporating new data trends and achieving a **10% improvement in prediction accuracy**.

DirecTV (Remote)

Feb 2023 – Nov 2023

Data Analyst

- Developed and optimized scalable ETL pipelines** using PySpark and SQL, seamlessly integrating large datasets into Snowflake, reducing data processing time by **20%** and ensuring data readiness for advanced analytics.
- Built predictive churn propensity models** with an **85% accuracy rate**, identifying high-risk customer segments and enabling retention teams to implement targeted strategies, resulting in a **15% reduction in churn rates**.
- Designed and maintained interactive **Power BI and Tableau dashboards**, providing real-time insights into churn metrics, customer segmentation, and campaign ROI, supported by automated refresh configurations with **Power BI Gateway**.
- Conducted **exploratory data analysis (EDA)** on datasets exceeding 20 million records, uncovering critical churn drivers such as service interruptions, subscription tenure, and pricing gaps, directly influencing retention policies.

- Collaborated cross-functionally with marketing, retention, and technical teams to define **key performance indicators (KPIs)** and ensure alignment between business objectives and analytical deliverables.
- Developed statistical models and forecasts to analyze monthly revenue, churn trends, and customer retention, delivering actionable insights to senior stakeholders and contributing to a **20% increase in marketing campaign ROI**.
- Enhanced data quality processes by implementing automated data validation scripts, achieving **98% data accuracy**, and streamlining data integration workflows.
- Partnered with data engineers to enhance the efficiency of data pipelines, reducing preparation time by **25%**, and ensuring seamless ingestion of third-party competitor and market data.
- Utilized advanced **SQL scripting** to perform complex data transformations, data cleansing, and quality assurance, enabling accurate and timely reporting for decision-making.
- Conducted competitor benchmarking by integrating third-party data sources, analyzing pricing, features, and customer satisfaction metrics, leading to enhancements in DirecTV's customer offerings.
- Presented data-driven insights and strategies to senior leadership, translating complex datasets and models into actionable recommendations that guided decision-making across marketing and retention teams.

**Aspirion Healthcare (Remote), USA**

**May 2021 – Jan 2023**

**Data Analyst**

- **Developed and optimized ETL pipelines** using **Informatica PowerCenter** and **Azure Data Factory**, enabling seamless integration of data from legacy systems into a centralized repository.
- Conducted extensive **data cleansing and transformation** using **Python**, **PySpark**, and **SQL**, improving data quality and reducing inconsistencies by **30%** across datasets.
- Designed and deployed **interactive Power BI dashboards** to visualize real-time **pricing trends, customer preferences, and sales metrics**, supporting data-driven decision-making across teams.
- Performed advanced **A/B testing** and **statistical modeling** (e.g., regression analysis) to evaluate promotional effectiveness and refine pricing strategies, resulting in a **15% improvement in customer satisfaction**.
- Migrated and standardized data from disparate file formats (**CSV, Parquet, Delta**) into **Azure Data Lake**, improving data accessibility and scalability.
- Developed automated workflows using **Python scripting**, reducing manual processing efforts by **20%** and ensuring timely data updates for reporting and analysis.
- Created complex SQL queries and stored procedures in **SQL Server Management Studio (SSMS)** to analyze customer behavior, pricing trends, and performance metrics, reducing query execution times by **25%**.
- Utilized **Informatica Power Exchange** for **Change Data Capture (CDC)**, ensuring real-time synchronization of critical datasets with minimal latency.
- Collaborated with cross-functional teams, including **pricing, customer support, and quality management**, to align data analytics efforts with business goals and address data quality gaps.
- Implemented a comprehensive **data remediation plan**, resolving data discrepancies and improving accuracy and reliability of reporting systems.
- Designed and implemented **User-Defined Functions (UDFs)** in **PySpark**, enhancing the scalability and performance of large-scale data transformation pipelines.
- Partnered with stakeholders to deliver actionable insights through exploratory data analysis (**EDA**) and predictive modeling, driving **data-informed business strategies**.
- Trained and mentored junior data analysts on **SQL optimization, Power BI best practices, and Python automation**, fostering a collaborative and data-driven work culture.
- Ensured compliance with **GDPR** and **CCPA** regulations by integrating robust **data encryption** and anonymization techniques into data workflows.

**Anthem, USA**

**Aug 2019 – Apr 2021**

**Data Analyst**

- Conducted detailed **trend analysis and attrition assessments**, identifying key factors contributing to member churn, which led to a **12% reduction in churn rates** through data-driven retention strategies.
- Designed and implemented **predictive churn models** using Logistic Regression and Random Forest, achieving **82% accuracy**, enabling proactive member retention initiatives.
- Streamlined **data integration processes** by developing ETL workflows using Apache Airflow, consolidating data from multiple sources into an AWS Redshift data warehouse, improving **data accuracy by 98%**.
- Built and managed interactive **Tableau dashboards** to monitor real-time enrollment trends and campaign performance, reducing manual reporting by **25%** and enabling strategic decision-making.
- Conducted **exploratory data analysis (EDA)** with Python libraries such as pandas, NumPy, and Matplotlib to uncover retention-critical patterns, including high-risk member segments and regional trends.
- Developed custom **member segmentation models** using clustering algorithms, categorizing members into actionable retention tiers, and providing the marketing team with tailored campaign insights.
- Benchmarked company policy offerings against competitors, uncovering gaps in benefits, which led to the addition of dental and vision plans and a subsequent **15% increase in policy renewals**.
- Partnered with data engineers to optimize and enhance data pipelines, reducing processing time by **25%** while improving the accessibility of analytics-ready datasets.

- Designed robust SQL queries to extract, clean, and prepare data from CRM and ERP systems, addressing data inconsistencies, missing values, and duplicates to ensure data quality and reliability.
- Collaborated with cross-functional teams, including product development, marketing, and actuarial experts, to align analytics outcomes with business objectives, driving a **20% improvement in campaign ROI**.
- Presented actionable insights and recommendations to senior leadership, influencing key business strategies and decision-making processes, resulting in enhanced customer retention initiatives.

Citigroup, USA

Jan 2017 – Feb 2019

Data Analyst

- **Enhanced data governance frameworks** by analyzing and addressing systemic data issues, leading to a **35% improvement in data accuracy** and ensuring compliance with Federal Reserve and OCC regulations.
- Designed and implemented **scalable ETL pipelines** using Azure Data Factory and Python, successfully migrating data to AWS Redshift, which improved scalability and reduced processing time by **25%**.
- **Automated data validation processes** by developing dynamic frameworks to detect and resolve anomalies in real-time, reducing manual intervention by over **50%** and achieving a **40% reduction in data inconsistencies**.
- Created and maintained **interactive Power BI dashboards**, offering actionable insights into data quality metrics like accuracy, completeness, and timeliness, enabling faster decision-making for stakeholders.
- Conducted **data profiling and quality assessments** using Python and SQL, identifying and resolving issues related to duplicates, missing values, and inconsistent formats across multiple datasets.
- Collaborated with compliance officers to ensure adherence to regulatory standards and conducted rigorous testing of data pipelines, achieving a **99% accuracy rate** in validated data outputs.
- Delivered **training sessions and workshops** for internal stakeholders, driving a **95% adoption rate** for newly implemented data systems and ensuring sustainable practices for data management.
- Partnered with cross-functional teams, including data engineers and business analysts, to standardize workflows and optimize data integration processes, ensuring consistent data availability across systems.
- Regularly presented data insights and project updates to senior leadership and operational teams, aligning deliverables with strategic business objectives and enhancing decision-making capabilities.
- Modernized legacy infrastructure by migrating data warehouses to AWS Redshift, improving performance and scalability, and supporting Citigroup’s long-term data governance strategy.
