

Operation Analyst | Data Analyst

EXECUTIVE PROFILE

Results-driven Data Analyst with 4 years of experience in data analysis, application support, and financial data operations. Proficient in Python, SQL, Microsoft Excel, Power BI, and Tableau, with hands-on experience in data validation, reconciliation, ETL workflows, production support, and operational reporting. Skilled in maintaining data quality, troubleshooting data issues, documenting business processes, and collaborating with cross-functional teams to deliver accurate, reliable, and business-critical data solutions in fast-paced financial environments.

TECHNICAL EXPERTISE

- **Programming:** Python, SQL, Shell Scripting
- **Reporting & Productivity:** Microsoft Excel (Pivot Tables, VLOOKUP, XLOOKUP, Conditional Formatting, Data Validation)
- **Data Analysis & Operations:** Data Analysis, Data Validation, Data Cleansing, Data Reconciliation, Operational Reporting, Workflow Management, Documentation, Business Process Support
- **Application Support & Monitoring:** Production Support, Application Support, Incident Management, RCA, Job Monitoring, Batch Processing, Release Support, Application Monitoring, Splunk, Kibana, AWS CloudWatch
- **Databases:** PostgreSQL, MySQL, SQL Server
- **Cloud & Infrastructure:** AWS (S3, Glue, Lambda, Redshift, IAM, EC2, Athena), Azure (Databricks, ADF)
- **ETL / Data Engineering:** PySpark, Databricks, Delta Lake, Airflow, AWS Glue, ADF, ETL Development, Apache Spark
- **Operating Systems:** Linux, Windows
- **Methodologies:** ITIL, SDLC, Agile, Scrum, Change Management, Release Management
- **Financial Domain:** Investment Management, Portfolio Management, Trade Processing, NAV Processing, Fund Accounting, Portfolio Valuation, Compliance Reporting

PROFESSIONAL EXPERIENCE

One Main Financial

Data Engineer |Aug 2025 – Present |

- Developed and supported **Python** and **SQL** workflows, ensuring accurate financial data availability for downstream business operational records and validate supporting documentation, and support reporting requirements.
- Validated, reconciled, and monitored financial datasets, improving data quality while reducing operational discrepancies across multiple systems.
- Performed data quality checks, investigated production issues, and ensured data completeness and accuracy for critical financial applications.
- Collaborated with business users to resolve operational data issues, review workflow requests, maintain operational records, and support reporting requirements.
- Maintained technical documentation, operational procedures, business records, and support runbooks while ensuring process consistency and data accuracy.
- Monitored AWS production batch jobs, resolved workflow issues, and ensured **SLA compliance** for business-critical data processing.
- Used **SQL** to analyze operational data, troubleshoot production issues, and support business reporting with accurate and reliable datasets.

Wipro

Python Application Support Engineer | Jul 2023 – Jul 2024 |

- Analyzed operational and financial datasets using **SQL** and **Python** to support reporting, business operations, and strategic decision-making.
- Performed data cleansing, validation, reconciliation, and record verification to improve data integrity and reporting accuracy.
- Developed **Tableau** and **Power BI** dashboards while supporting ad hoc reporting requests for business users and stakeholders.
- Collaborated with cross-functional teams to gather reporting requirements, improve workflow processes, perform record validation, and support business operations.
- Maintained technical documentation, workflow records, and reporting artifacts, and business documentation to ensure data accuracy and process consistency.
- Automated recurring reporting tasks using **SQL and Python**, reducing manual effort while improving reporting efficiency and accuracy.

Slice

Data Engineer |Jul 2021 – July 2023

- Engineered **AWS Glue ETL pipelines** to ingest **BNPL** lending data into Amazon Redshift, enabling scalable analytics and reporting.
- Designed **ETL jobs** integrating payment gateways, merchant systems, and **UPI** settlements, reducing manual reconciliation efforts by **30%**.
- Implemented **Python**-based customer risk segmentation pipelines using transaction history and repayment behavior to support credit risk analytics.
- Optimized **SQL queries** across **PostgreSQL** and **Redshift**, improving analytical query performance and accelerating finance and compliance reporting.
- Implemented automated data quality checks and notification triggers to identify settlement delays and abnormal transaction patterns proactively.
- Provided production support by monitoring **ETL** workflows, batch jobs, resolving processing exceptions, and ensuring **SLA compliance**.
- Collaborated with development, infrastructure, and business teams during deployments, workflow validation, production support, and root cause analysis.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Databricks Certified Data Engineer Associate

EDUCATION

Master of Science in Data Engineering | Faulkner University | GPA: 3.8/4.0 | Aug 2024 - May 2026
Bachelor of Electronics & Communication | SCSVMV University, India | GPA: 8.8/10.0 | Jul 2018 - Apr 2022
