LinkedIn: <https://www.linkedin.com/in/aravind-reddy-9811bb385/>

Summary:

- 4+ years of Work experience in Finance and Healthcare Industry as a Data analyst and strong experience on, Snowflake, AWS, UNIX, Tableau, Power BI, Python.
- Proficient in writing complex SQL queries to retrieve data and worked on Snowflake, Teradata, Oracle, SQL Server etc., data sources for various Reporting and analytical needs.
- Familiar with fine tuning of SQL queries to optimize the performance. Worked on huge volume of Data pulls. Tuning SQL statements using Explain statements.
- Using advanced Excel features like Pivot tables and charts and graphs for reporting. Expertise in documentation and training using Word and PowerPoint.
- Hands-on experience in with version control systems like GitHub. Implemented Indexes,
- Design and deploy rich Graphic visualizations with Drill Down and Drop-down menu option and Parameterized using Tableau.
- Excellent Transact SQL (T-SQL) development skills to write complex queries involving multiple tables, great ability to develop and maintain stored procedures, triggers and user defined functions.
- In depth experience in Requirement Gathering using techniques like Interviews, Brainstorming, Focus Group, Document Analysis, JAD sessions, Survey/Questionnaires.
- Documented Business Requirements Documents (BRD), System Requirements Specifications (SRS), and Functional Specification Document (FSD).
- Conducted GAP Analysis by creating current and expected process flow diagrams and assisted in Impact Analysis, SWOT Analysis, Cost-Benefit Analysis, Root Cause Analysis and Feasibility Study.
- Proficient in tracing requirements throughout development life cycle by creating Requirement Traceability Matrix (RTM) using MS Excel & tools like JIRA.
- Proficient in Prototyping User Interfaces using Wireframes and Mock-ups (Balsamiq) with focused attention to detail in enriching User Experience and User Interaction.
- Created UML diagrams like Use Case Diagrams, Activity Diagrams, Sequential Diagrams using MS Visio.
- Created Test Plans, Test Scenarios, and Test Cases using MS Word, MS Excel, and JIRA.

Skill set:

Cloud	AWS (S3, Redshift), Azure, Data Bricks
Analysis Tools	My SQL, SQL server, Tableau Desktop, MS-Excel, Power BI, Spreadsheets, and Microsoft Azure.
Languages	SQL, SAS, Python (Pandas, NumPy)
Tools	Git, JIRA, Informatica, Talend
Database	SQL Server, Oracle, MYSQL
Computer Skills	Data visualization, Data cleaning, Data Mining, Data Warehouse, Microsoft Office, problem-solving, and analytical abilities, Data analysis, exploratory Data Analysis (EDA), statistical analysis, Dashboard Development, Data modeling, Data warehousing, Data Transformation, Data mapping

Methodologies

Agile, Scrum, Waterfall

Professional Experience:

Client: Coventry Health Care, North Bethesda, MD

Oct 2025 – Till Date

Role: Data Analyst

Responsibilities:

- Analyzed large-scale healthcare claims data to identify trends, anomalies, and insights, improving claims accuracy and operational efficiency.
- Optimized SQL queries and ETL workflows, reducing data processing time by 25–30% and improving system performance.
- Developed interactive dashboards using Power BI and Tableau, reducing reporting turnaround time by 40% and enabling faster decision-making.
- Ensured compliance with HIPAA, Medicare, and Medicaid regulations while managing sensitive healthcare data.
- Performed data validation and cleansing using Python and Excel, reducing data discrepancies by 20%.
- Collaborated with stakeholders to define KPIs, gather requirements, and translate business needs into analytical solutions.
- Supported FHIR data mapping and transformation, ensuring interoperability and data integrity across healthcare systems.
- Conducted UAT and Agile ceremonies (stand-ups, sprint planning), ensuring high-quality delivery of analytics solutions.

Environment: SQL, Python, Power BI, Tableau, Snowflake, Oracle, AWS (S3, Redshift), ETL, HIPAA, FHIR

Client: Fifth Third Bank, Cincinnati, OH

Jun 2024 – Sep 2025

Role: Data Analyst

Responsibilities:

- Analyzed banking and transactional data to identify fraud patterns and anomalies, contributing to a 15% reduction in suspicious activities.
- Developed and optimized SQL queries to validate data, perform analysis, and support reporting across SQL Server and Oracle databases.
- Performed data validation, UAT, and GAP analysis, improving data accuracy in reporting systems by 18–22%.
- Designed and executed ETL processes for data extraction, transformation, and integration into data warehouses and data marts.
- Collaborated with stakeholders to gather requirements, conduct JAD sessions, and translate business needs into data-driven solutions.
- Supported implementation of Actimize AML system, enhancing compliance and monitoring of financial transactions.
- Automated recurring reporting processes using UNIX shell scripting and ETL tools, improving efficiency and reducing manual effort.
- Created reports and dashboards using Power BI and SSRS, enabling better business insights and decision-making.

Environment: SQL, Power BI, SSRS, SQL Server, Oracle, ETL, Informatica, UNIX, Actimize

Client: Sparc Technologies, Hyderabad

May 2021 – Nov 2023

Role: Business Analyst/Data Analyst

Responsibilities:

- Analyzed product, inventory, and sales data to identify high-risk items, reducing potential losses through data-driven decision-making.
- Developed SQL queries and reports to support business operations, improving visibility into sales performance and inventory trends.
- Created and maintained reports using Excel, Power BI, and Crystal Reports, enabling stakeholders to monitor key business metrics.
- Collaborated with PMO and cross-functional teams to gather requirements, track project progress, and ensure timely delivery.
- Managed and validated master data in SAP, including material, pricing, and Bill of Materials (BOM), ensuring data accuracy and consistency.
- Led data cleansing and data migration activities, improving data quality for downstream reporting and analytics.
- Supported procurement and supply chain teams by analyzing material substitutions, pricing updates, and inventory changes.
- Trained and mentored a team of data specialists, improving efficiency in data processing and reporting workflows.

Environment: SAP, SQL, Power BI, Excel, Python, Jira
