

# ASHWIN TIWARI

San Francisco, CA | (919)638-2130 | [ashwin.tiwari@duke.edu](mailto:ashwin.tiwari@duke.edu) | [LinkedIn/Ashwin](#) | [GitHub](#)

## SKILLS

- **Data Analysis:** Business Analytics, SQL, SQL Server
- **Reporting And Visualization:** Dashboard Development, KPI Reporting, Power BI, Looker
- **Tools:** Google BigQuery, Microsoft Excel
- **Client And Stakeholder Management:** Relationship Management

## EDUCATION

### DUKE UNIVERSITY, The Fuqua School of Business

May 2026

*Master of Science, Quantitative Management: Business Analytics, Finance*

Durham, NC

- **Coursework:** Data Science for Business, Decision Analytics & Modeling, Data Visualization, Modern Analytics, Tableau, Big Data Querying

### VELLORE INSTITUTE OF TECHNOLOGY

May 2025

*Bachelor of Technology, Computer Science and Engineering*

Vellore, India

## EXPERIENCE

### DELOITTE TOUCHE TOHMATSU INDIA, ET&P | Oracle Analyst Intern

Jan 2025 - Jun 2025

- Leverage cutting-edge technologies, including AI and RPA, to deliver transformative solutions and align organizational goals with actionable technology strategies
- Conducted industry analysis and developed strategic white papers using business analytics to evaluate emerging technology frameworks and support innovation initiatives.

### ITC INFOTECH, Data Analysis | Data Analyst Intern

Jun 2025 - Jul 2025

- Improved cross-country sales by 80% by using SQL and Microsoft Excel to analyze raw sales data, identify ideal stores, and determine the optimal storage quantity for each district.
- Developed a Power BI dashboard that dynamically allocated state budgets based on seasonality and demand, contributing to growth of a 20% margin through KPI reporting.

## PUBLICATIONS

- Sentiment-Based Rating Model using VADER and TextBlob. *Developed a Sentiment-based rating model leveraging VADER and TextBlob for enhanced sentiment analysis accuracy Applied advanced NLP techniques to optimize sentiment classification and rating prediction* [Sentiment-Based Rating Model using VADER and TextBlob](#)
- Synergizing CNNs: An Ensemble Framework for Enhanced Image Classification. *Designed a novel ensemble learning framework combining state-of-the-art architectures for improved image classification. Achieved significant enhancements in accuracy, precision, and recall using bagging and boosting techniques.* [Synergizing CNNs: An Ensemble Framework for Enhanced Image Classification](#)

## CERTIFICATIONS

- AWS Solutions Architect Associate: Amazon AWS
- AWS Cloud Practitioner: Amazon AWS

## PROJECTS

### Flight Prediction Model | [Flight Prediction Model](#)

- Built a model to predict flight delays using datasets from Google BigQuery.
- Analyzed trends and correlations in Looker Studio and engineered model features using linear regression and feature-crossing techniques.

### Admin Dashboard | [Admin Dashboard](#)

- Developed an admin dashboard featuring notifications, charts, and a Kanban board to support organized workflow management.
- Included functionalities for calendars, color pickers, and text editors to enhance usability.

### Fall Detection Model | [Fall Detection Model](#)

- Engineered an image-based fall detection system using YOLO NAS for real-time applications.
- Integrated the system for practical use with camera-based monitoring solutions.
