

ASWANI DONDAPATI

Software Engineer

Email: aswani.dondapati26@gmail.com | Ph: +1 (303) 507-7868

PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience designing scalable cloud-native microservices and full-stack applications on AWS. Expertise in Spring Boot, React, Kafka, and event-driven distributed systems, with hands-on experience automating infrastructure, implementing CI/CD pipelines, and securing enterprise platforms using OAuth2 and JWT.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL, PL/SQL

Frontend: React.js, HTML5, CSS3

Backend: Spring Boot, RESTful APIs, Microservices, OAuth2, JWT, Kafka

Cloud: AWS (ECS, EC2, S3, Lambda, RDS, CloudWatch), Azure (DevOps, App Services), GCP

DevOps: Docker, Terraform, CloudFormation, GitHub Actions, CI/CD

Databases: MySQL, PostgreSQL, MongoDB, Azure SQL, Redis

Testing: JUnit, Mockito, Selenium, JMeter

Methodologies: Agile/Scrum, Clean Architecture

PROFESSIONAL EXPERIENCE

Johnson & Johnson | Software Engineer

March 2025 – Present | Lowell, MA

- Architected Spring Boot microservices on AWS ECS, improving application scalability by 35% while maintaining secure healthcare workflows.
- Designed REST APIs integrated with AWS RDS and S3, enabling secure and scalable data management solutions.
- Implemented event-driven architectures using Kafka and AWS Lambda, reducing batch processing delays by 28%.
- Automated cloud infrastructure provisioning with Terraform and AWS CloudFormation, ensuring consistent and reliable deployments.
- Built CI/CD pipelines using GitHub Actions and optimized application performance through database tuning, monitoring, and containerization.

U.S. Bank | Software Engineer

December 2023 – February 2025 | Boston, MA

- Designed and optimized REST APIs with SQL Database integration, improving query performance and data processing efficiency by 34%.
- Automated CI/CD pipelines using Azure DevOps, reducing release cycle time by 38% and improving deployment reliability.
- Implemented Azure Active Directory authentication and Azure Service Bus messaging, enhancing security and reducing transaction latency by 26%.
- Built monitoring, caching, and containerization solutions using Azure Monitor, Redis, Docker, and Selenium, improving application performance.
- Developed secure Spring Boot services on Azure App Services, improving transaction reliability by 31% for enterprise banking applications.

Verizon | Software Engineer

February 2021 – July 2023 | Hyderabad, India

- Developed enterprise web applications using Spring MVC, improving customer self-service functionality by 33% and supporting large-scale telecom platforms.
- Designed RESTful APIs and optimized relational database performance through stored procedures and indexing strategies.
- Refactored legacy applications into modular service-oriented components, reducing system complexity by 25% and improving maintainability.
- Implemented JWT-based authentication, data validation, and multithreading techniques, improving security and increasing application throughput by 30%.

EDUCATION

Indiana Wesleyan University

M.S., Information Technology Project Management

Malineni Lakshmaiah Women's Engineering College

B.Tech, Electronics and Communication Engineering
