

AUSTIN SONKA

San Antonio, Texas | sonkaaustin@gmail.com | (830) 623-4466 | [LinkedIn](#)

EDUCATION

Southern New Hampshire University
Bachelor of Science in Computer Science

Manchester, NH
Jan 2019 - Dec 2023

SKILLS

Programming Languages: JavaScript, Python, Java, C/C++, HTML/CSS

Databases & APIs: MongoDB, NoSQL, MySQL

Tools: Docker, AWS, Git, Android Studio, Postman, Excel

Relevant Coursework: Data Structures, Discrete Mathematics, Computer Organization, Algorithms

PROJECTS

Inventory Tracker App – Android Studio | Java | SQLite

- Designed and built a mobile app for personal inventory tracking, featuring login authentication, daily inventory views, and custom inventory goal setting.
- Developed a clean, user-centered UI with three core screens: Login, Inventory Display, and Inventory Entry, prioritizing usability through minimalistic design.
- Implemented data persistence using SQLite and used Android Studio to create responsive layouts and intuitive navigation between screens.

Treasure Hunt Pathfinding Agent – Python | Keras | NumPy | Matplotlib

- Developed a Deep Q-Learning AI agent to solve an 8x8 maze-based treasure hunt game, optimizing pathfinding strategy to reach the goal before an opponent.
- Trained a neural network with Keras using experience replay and reward-based exploration to achieve 100% win rate through reinforcement learning.
- Designed custom environment logic (TreasureMaze.py) and agent experience (GameExperience.py), integrating state observations, reward feedback, and Q-value predictions.
- Used Python, NumPy, and Matplotlib for environment simulation, and applied debugging and visualization techniques for training diagnostics.

WORK EXPERIENCE

Amazon - Area Manager

Apr 2024 - Present

- Lead a core team of 80+ hourly associates in inbound operations at a high-volume fulfillment center processing up to 1 million units daily, with a strong focus on productivity, accuracy, and safety.
- Managed inbound shifts with over 200 associates and 3 salaried managers, ensuring seamless operations and achievement of key performance metrics.
- Increased team Efficiency by 38% through data-driven performance coaching and real-time labor optimization.
- Utilize Amazon tools (FC Insights, Labor Planning, Excel Macros) to track KPIs, optimize labor, and drive throughput.
