Florida, USA | +1 5619759513 | bksai809@gmail.com | [linkedin.com/in/sainath-bikki-7557ba16b](https://www.linkedin.com/in/sainath-bikki-7557ba16b)

Professional Summary

Data Engineer with expertise in AWS cloud and PySpark-based data platforms. Designed and maintained scalable batch and streaming pipelines processing over 3 TB daily, reducing latency by 35% and lowering infrastructure costs. Built reusable transformation frameworks and automated data quality validation for ML-ready datasets. Seeking to apply ETL/ELT and data lake expertise to drive impactful analytics solutions.

Technical Skills

Languages: Python, SQL, Java, Bash

Data Engineering: ETL/ELT, Data Pipelines, Batch Processing, Real-Time Streaming, Apache Spark, PySpark, Kafka, Airflow, Data Warehousing, Data Lakes, Lakehouse Architecture, Data Modeling, Workflow Orchestration, Schema Design, Data Quality, Metadata Management, Delta Lake, ELT Workflows, DataFrame APIs

ML Platform / AI Infrastructure Support: ML Data Pipelines, Feature Engineering Pipelines, Model Training Data Preparation, Feature Store Concepts, Dataset Validation, Model Input Validation, Pipeline Monitoring, Data Observability, Workflow Automation, MLOps Support

Databases: Teradata, PostgreSQL, MySQL, SQL Server, MongoDB, Snowflake, Redshift, Hadoop

Cloud: AWS (S3, EC2, Lambda, EMR, ECS, ECR, CloudFormation, CloudWatch), Azure, GCP, AWS Glue, AWS RDS, AWS IAM

DevOps & Tools: Docker, Kubernetes, Jenkins, Git, GitHub, CircleCI, CI/CD, DataOps

Frameworks: FastAPI, Flask, Django, REST APIs, Node.js, Express

Libraries: Pandas, NumPy, SciPy, Matplotlib, Plotly, Scikit-learn

Professional Experience

Florida Power & Light (FPL)

Feb 2025 - Present

Data Engineer

USA

- Designed and maintained scalable batch and streaming data pipelines using Python, PySpark, Spark SQL, Kafka, and Airflow leveraging DataFrame APIs to process 3TB+ of enterprise data daily across 40+ workflows.
- Built real-time ingestion pipelines processing 200K+ events per minute, reducing downstream latency by 35%.
- Developed reusable transformation pipelines and curated datasets supporting analytics, forecasting, anomaly detection, and ML-driven reporting use cases.
- Partnered with analytics and machine learning teams to deliver ML-ready datasets, feature pipelines, and production data workflows supporting model training and inference.
- Built automated data quality validation frameworks using Python, SQL, and Pandas for schema validation, reconciliation, anomaly detection, and completeness checks.
- Supported ML platform operations through feature availability, training data consistency, model input validation, and scalable data access for downstream AI workloads.
- Developed cloud-native data workflows using AWS services including S3, Lambda, EMR, ECS, CloudWatch, AWS Glue, and AWS IAM.
- Optimized PostgreSQL and MongoDB data models across 50M+ records through indexing, partitioning, and query tuning.
- Implemented CI/CD automation using Git, Jenkins, Docker, and Kubernetes improving deployment reliability.
- Implemented ELT workflows to ingest, transform, and load structured and semi-structured data into a centralized analytics platform.

Teradata

Jul 2021 - Jul 2023

Data and Cloud Engineer

India

- Engineered distributed ETL/ELT pipelines using Python, SQL, Spark, and PySpark processing 2TB+ of data daily.
- Designed and optimized cloud-native data pipelines across AWS, Snowflake, Redshift, Teradata, and AWS RDS environments with Delta Lake enhancements for ACID compliance and partition pruning.
- Built reusable data transformation frameworks for ingestion, cleansing, aggregation, and enterprise data delivery.
- Developed Kafka and Spark Streaming pipelines processing 100K+ events per minute.
- Built curated datasets supporting advanced analytics, predictive modeling, and machine learning experimentation.
- Supported ML infrastructure initiatives through training data preparation pipelines, feature engineering workflows, and production dataset delivery.
- Implemented data quality checks, metadata tracking, lineage monitoring, and governance controls.
- Improved warehouse performance through schema optimization, workload balancing, and SQL tuning.
- Reduced AWS infrastructure cost by 20% through compute optimization and storage lifecycle improvements.
- Implemented Delta Lake tables optimized for ACID compliance, partition pruning, schema enforcement, and improved query performance across large enterprise datasets.

Accenture

Aug 2020 - Aug 2021

Data Engineering Intern

India

- Developed ETL workflows using Python and SQL for enterprise reporting and analytics systems.
- Built reusable transformation scripts supporting reporting and dashboarding pipelines.
- Assisted with data preparation for analytics and predictive modeling use cases.
- Optimized SQL queries and schema structures improving reporting performance by 25%.
- Implemented automated data validation checks improving accuracy and reducing defects.

Internshala

Mar 2020 - Jul 2020

Data Engineering Intern

India

- Built Python and SQL-based ETL pipelines for customer, sales, and operational datasets.
- Performed data cleansing, transformation, and validation for analytics use cases.
- Automated reporting workflows and improved ingestion efficiency by 15%.
- Supported data preparation and exploratory analysis for business reporting.
- Improved ETL testing coverage and reduced pipeline defects.

Projects

Real-Time Streaming Data Platform

- Architected and implemented PySpark-based streaming pipelines in Databricks notebooks, ingesting 200K+ events per minute via Kafka for real-time enterprise data movement.
- Built schema validation and monitoring using AWS CloudWatch alongside partition-aware processing, improving pipeline reliability to 99.9%.

Cloud-Native Data Lakehouse Platform

- Engineered an AWS S3-backed ETL platform leveraging Databricks and Spark to ingest over 2 TB of data daily across production pipelines.
- Designed and implemented Delta Lake tables with partition pruning and schema enforcement, supporting ACID compliance and incremental processing for analytics and ML workloads.

Education

Florida Atlantic University, USA

Aug 2023 - May 2025

Master of Science, Computer Science

USA

Lovely Professional University, India

Aug 2017 - Jun 2021

Bachelor of Technology, Computer Science

India
