WORK EXPERIENCE

Senior Technical Business Analyst

Jul 2022 – Present

NYC Human Resource Administration [contract]

New York, NY

- **Implemented** design and deployment of automated reporting pipelines using Azure Synapse, dbt, and Airflow, reducing monthly processing time by **45%** and improving data freshness for citywide KPIs.
- **Integrated** data from multiple sources using **SQL Server Integration Services (SSIS)**, validated the data, thus streamline internal reporting process.
- **Automated** legacy workflows by replacing Excel-heavy manual processes with Python scripts, parameterized stored procedures, and scheduled SSIS packages, reducing processing time by **37%**.
- **Built and maintained** dynamic **12+ Tableau dashboards** for **50+ stakeholders**, including parameter filters, actions, and calculated fields to enable self-service analytics across divisions.
- **Evaluated fraud patterns** in social programs using statistical analyses and regression modeling, contributing to **\$50K** in cost savings through targeted data-driven intervention.
- **Led requirement gathering sessions** with **10+ cross-department stakeholders**, identifying high-impact analytics needs and aligning data projects with city-wide goals.
- **Conducted A/B testing** with SQL and Python (pandas, scipy, statsmodels) to assess outreach methods (text, email, call), boosting employment program enrollment by **14%** among child support participants.

Senior Business Analyst — Data Product Lead

Oct 2018 – Dec 2021

iFour Technolab Pvt Ltd

Ahmedabad, IN

- **Modeled SQL-based reporting systems** architecture for healthcare and enterprise software clients, optimizing data pipelines using Microsoft SQL Server, PostgreSQL, and stored procedures to reduce reporting latency by **40%**.
- **Developed and orchestrated** modular ETL pipelines using SSIS and dbt, with robust data validation to integrate third-party vendor data into centralized analytical models.
- **Structured custom SQL models** and materialized views to optimize reporting workflows, boosting query performance by **3x** across high-volume datasets.
- **Automated dynamic, parameterized SQL scripts** and automation routines to streamline operational reporting and enable ingestion from REST APIs, CSV/XML flat files, and legacy systems.
- **Integrated secure data access frameworks** into CI/CD workflows using dbt, GitLab, and SQL-based access controls, enabling automated provisioning of HIPAA-compliant row-level permissions across reporting environments.
- **Formulated and executed** multiple A/B testing frameworks to assess new product features and customer journey optimizations, increasing conversion rates by **15%**.
- **Created CI/CD pipelines** with Github actions and GitLab, automating version control, validation, and deployment of SQL assets, dbt models, and SSIS packages across dev/staging/production environments.

Data Analyst

Jul 2017 – Sep 2018

ThirdEssential Pvt Ltd

Ahmedabad, IN

- **Scoped and prioritized product features**, translating client needs into data product roadmaps using Agile, and collaborated with engineers to implement data pipelines with **SQL, dbt, and CI/CD via Git**.
- **Created Dataflow, Entity-Relationship (ER) diagrams, Dataflows in Oracle SQL Developer Data Modeler**, enforcing referential integrity.
- **Tuned SQL queries** and optimized store procedures, enhancing query performance by 40%

SKILLS, CERTIFICATION & INTERESTS

Languages & Scripting: Python (pandas, NumPy, scikit-learn, statsmodels, SQLAlchemy, TensorFlow), **SQL, R**, Excel VBA

Visualization: Tableau, Power BI, Excel (Pivot Tables, Macros, Dashboards), **Streamlit**, Metabase

Databases & Warehousing: Oracle EDM, Azure Synapse, **SQL Server**, PostgreSQL, MySQL, Snowflake

ETL & Automation: dbt, Airflow, ADF, SSIS, Stored Procedures, **Git**, Jenkins, **CI/CD**, Docker, VS Code

ML & AI: scikit-learn, Prophet, statsmodels, A/B Testing (scipy), **Isolation Forest**, Streamlit Apps

Cloud & DevOps: Azure (Synapse, Data Factory, Functions), **GitHub/GitLab**, Docker, Jenkins

Analytics & BI: Forecasting, KPI Monitoring, UAT, Data Governance, Root Cause Analysis, Optimization

Methodologies: Agile/Scrum, A/B Testing, Data Lineage, Trend Analysis, Requirement Gathering

Certifications: Google Data Analytics Professional Certificate, Microsoft AI Fundamentals

EDUCATION

Master of Science, Management Information Systems with Data Analytics

Jan 2022 – May 2023

Baruch College

New York, NY

Bachelor of Engineering, Computer Science

Aug 2013 – Jun 2017

Acropolis Institute of Technology and Research

Indore, IN
