Education

Eastern University

Masters of Data Science

June 2025

Philadelphia, PA

Washington State University

Bachelors of Arts BA/Biology

May 2020

Pullman, WA

Skills

Programs: Excel, Git, Python, R, Power BI, Tableau, SAP, NetSuite

Statistical Analysis: Regression Analysis, Hypothesis Testing, Predictive Modeling, Automated Reporting

Experience

First Choice

Jan 2023 - Present

Pricing Analyst

Remote

- Collaborated with cross-functional teams to identify inefficiencies in inventory and pricing processes, leading to a 15% improvement in operational efficiency and cost savings.
- Utilized SAP and NetSuite to monitor inventory movements, track product stock levels, and generate automated reports, providing insights into inventory turnover and demand forecasting.
- Created comprehensive dashboards and reports in Tableau to visualize inventory data, monitor product performance, and drive decision-making in procurement and distribution.
- Led regular audits to ensure inventory accuracy, reducing discrepancies by 20%.
- Trained and mentored new team members, ensuring adherence to inventory management processes.

GAP

May 2022 - August 2022

Strategy/Inventory Analyst

Chicago, IL

- Analyzed sales and inventory data to support inventory planning, ensuring alignment between stock and demand.
- Developed pricing strategies using historical data analysis and sales forecasting techniques to optimize margins and sales, resulting in a 10% increase in profitability during promotions.
- Collaborated with marketing teams to design promotional campaigns and ensure seamless execution, utilizing data insights to enhance visibility and drive sales during peak seasons.
- Prepared and presented data-driven reports to senior management, utilizing Tableau to communicate key insights on inventory trends, market conditions, and pricing strategies.
- Managed data from multiple sources, ensuring consistency and accuracy across inventory and sales platforms.

Zulily

July 2021 - March 2022

Assistant Buyer

Seattle, WA

- Optimized retail pricing strategies using Excel and market data, leading to a 20% increase in product profitability.
- Worked closely with buying and planning teams to develop sales forecasts, align inventory levels, and ensure the timely procurement of products, reducing overstock by 12%.
- Generated weekly and monthly reports on sales, inventory levels, and product performance using Excel, including pivot tables and advanced formulas to identify trends and insights.
- Developed and maintained relationships with vendors, leveraging data-driven insights to negotiate better pricing.
- Supported product selection by analyzing sales data and market trends to recommend high-potential items that would resonate with target audiences, leading to improved sales performance.

Projects

Inventory Optimization Dashboard

January 2024

- Created an interactive Tableau dashboard for tracking inventory levels, turnover rates, and sales forecasts across multiple product categories.
- Allowed stakeholders to identify low-performing items and adjust purchasing decisions in real-time, improving inventory efficiency and sales.

Predictive Sales Forecasting Model

August 2021

- Developed a model to predict future sales for a retail business based on historical sales data, market trends, and seasonality factors. Used Python for data preprocessing, model training, and evaluation.
- Achieved an accuracy rate of 87% in predicting sales trends, which could inform inventory decisions and reduce overstocking by 20%.
