PROJECTS

[Door Dash Marketing Campaign Analysis - Excel](#)

- Identified income as a key determinant in spending patterns among customers aged 35 - 65 enabling more targeted marketing strategies.

[Massachusetts Department of Education Analysis - Tableau](#)

- Developed intuitive Tableau dashboard consolidating performance metrics across 1,800 Massachusetts School systems in 2017.

[Healthcare Analysis -MySQL](#)

- Reviewed 101,000 hospital patient records from 130 US Hospitals in MySQL. Determined that increased procedure frequency increased the amount of time spent in hospital.
- Quantified patient readmission rates revealing that 47% of patients required readmission, informing targeted interventions to improve post-discharge care coordination and resource allocation.

PROFESSIONAL EXPERIENCE

Student Performance Analyst (Scorer)

May 2022 – Aug 2022 Robert Half – Cognia Remote

- Scored student math and reading projects based on pre-defined criteria maintaining over 70% accuracy at all times.
- Maintained an average of 85 % accuracy on math and interpretive reading projects.
- Passed weekly calibration quizzes ensuring continued project participation while maintaining a high standard of quality in evaluating educational student performance metrics.

Census Data Collector (Enumerator)

United States Census Bureau

Aug 2020 – Sep 2020 Concord, NH

- Conducted Non-Response Follow-Up for up to 50 residences daily to obtain demographic and household data.
- Got responses from over 90% of residents at home by addressing resident concerns.

Education

Antioch University of New England Master of Science, Environmental Studies
University of Maine Bachelor of Science, Biology
