EDUCATION

Florida State University, Tallahassee, Florida

Aug 2023 - May 2025

Masters in Data Science - Mathematics (GPA: 3.96/4)

Courses : Data Mining, Applied Regression, Machine Learning, Artificial Intelligence

Jawaharlal Nehru Technological University, Hyderabad

Jul 2017 - Jul 2021

Bachelor of Technology, Mechanical Engineering (GPA: 8.3/10)

TECHNICAL SKILLS

- **Languages:** Python, C, SAP ABAP
- **Databases:** Oracle, MySQL
- **Tools & Technologies:** Apache Airflow, Jira, ServiceNow, SAP EWM, Microsoft Suite, AWS
- **Data & Technical Skills:** Data Analysis, Technical Support, SQL, regression analysis, model evaluation techniques, Data extraction, Data cleaning, R, Excel, Power BI, Tableau, PowerPoint
- **Cloud & DevOps:** AWS (EC2, S3, IAM, Lambda, RDS, CloudWatch), Apache Airflow
- **Python Libraries:** scikit-learn, TensorFlow, PyTorch, Pandas, NumPy

CERTIFICATION

- [AWS Certified Developer](#) – Associate | Amazon Web Services |

PROFESSIONAL EXPERIENCE

Accenture Solutions Pvt. Ltd. | *Application Development Analyst*

Sep 2022 - Jul 2023

- Conducted complex data analysis, providing insights that enhanced decision-making and operational efficiency within SAP modules (ERP, SD, MM, EWM). Major role played in **debugging** and testing application-level issues
- Developed and optimized scalable ABAP solutions in SAP EWM (ABAP **Object Oriented Principals and Data Structure** Concepts), contributing to **system efficiency improvements by 30%**.
- Implemented APIs and Analytical Views to increase the speed of **data retrieval by 20%** from relational Databases. Using SQL for data querying, transformation, and manipulation
- Led multiple projects using Agile methodologies, ensuring quality data intensive solutions and timely delivery.

Accenture Solutions Pvt. Ltd. | *Application Development Associate*

Jul 2021 - Aug 2022

- Engineered and optimized ABAP code for SAP EWM systems, enhancing functionalities like ALV reports and SmartForms.
- Participated in the SPS upgrade for SAP EWM, managing upgrade-related issues and delivering post-implementation support.
- Contributed to projects through API development, Analytical Views, and **SQL**, maintaining familiarity with project management tools like **JIRA** and **ServiceNow**.

PROJECTS

End-to-End Healthcare Data Engineering Pipeline

- Designed and deployed a complete ETL pipeline simulating **Medicaid fraud detection** using Airflow and Python.
- Extracted synthetic claims data, applied anomaly tagging (e.g., high-cost, duplicate, weekend claims), and orchestrated workflows on **EC2**.
- Transformed raw health records into model-ready datasets using Pandas and stored in **S3 for scalable access**.
- Ensured pipeline compliance with logging, validation, and schema enforcement for health data governance.
- Simulated downstream readiness for **Power BI**, Databricks, and ML-driven fraud scoring workflows.
- **Skillset:** Apache Airflow, Python, Pandas, AWS Amazon EC2, Amazon S3, Data Wrangling, ETL Pipelines, Healthcare Data, Anomaly Detection, Data Governance.

Airfare Price Prediction Using Regression Analysis

- Developed a predictive model to forecast flight ticket prices, achieving **~90.8% accuracy (R²: 0.9081)** through regression analysis.
- Identified key factors influencing airfare, including service class, stops, and booking lead time, optimizing pricing insights.
- Improved model robustness using **Box-Cox transformation & Weighted Least Squares (WLS)**, **reducing variance violations**.
- Conducted hypothesis testing and visual analytics to validate findings, enhancing airline pricing strategies.
- **Skillset:** R, Regression Analysis, Data Preprocessing, Box-Cox Transformation, WLS, Data Visualization, Hypothesis Testing, Modelling Data for Analysis, Predictive Analysis.

ANN-Based Churn Prediction

- Built an **Artificial Neural Network (ANN) model** using Keras and TensorFlow to predict customer churn with high accuracy.
- Pre-processed data using **encoding & scaling techniques**, improving model reliability.
- Deployed a **Streamlit web app** for real-time churn predictions, enhancing user accessibility.
- Achieved **optimized classification performance** by fine-tuning ANN hyperparameters.
- **Skillset:** Deep Learning, Artificial Neural Networks, TensorFlow, Keras, Model Training & Evaluation, Feature Engineering, Hyperparameter Tuning, Data Preprocessing, Model Deployment, Streamlit, scikit-learn.
