fatemazzamani@berkeley.edu | Hayward, CA | www.linkedin.com/in/fzz3 | (510)-963-0147

EDUCATION

University of California, Berkeley CA *Data Science, B.A + Public Health, B.A.*

December 2025

Chabot College, Hayward *Math, A.S*

May 2023

Relevant Coursework: Data Structures and Algorithms, Concepts of Probability, Linear Algebra, Multivariable Calculus, Data Engineering, Data Inference and Decisions, Principles & Techniques of Data Science

Technical Skills: Python, PostgreSQL, NumPy, Pandas, Matplotlib, Excel, Java, R, Machine Learning, MongoDB

EXPERIENCE

Elevance Health, *Business Analytics Intern*

May 2025 -Aug 2025

- Analyzed data for 20+ clients to track healthcare performance measures and volume trends using Excel and Tableau, generating data-driven insights for business decision-making to drive performance improvement.
- Enhanced operational efficiency by 10% by delivering analytics reports to key stakeholders; enabling to drive data driven insights that streamlined efficiencies
- Co-piloted the launch of a new efficiency program and onboarded 3 initial clients to establish the initiative.

Alameda County Public Health Department, *Intern*

May 2024 -Aug 2024

- Synthesized health data from Alameda County studies into 10+ visual infographics, driving a measurable increase in social media shares and community dialogue on critical prevention topics.
- Designed and executed language destigmatization projects across Alameda County (pop. 1.65M), raising community awareness through targeted outreach and digital campaigns.
- Leveraged insights from previous Alameda County violence prevention research to develop targeted project interventions, ensuring strategies were data-informed and contextually relevant.

Healthy Amplified, *Product Analyst Intern*

February 2024-April 2024

- Boosted patient engagement by 65% and enhanced team productivity by leading 5 - 6 interns to streamline product access and integrate a telehealth support system.
- Collaborated directly with providers to integrate a key medical device into patient workflows, helping accelerate treatment timelines and cut preparation time by 15%.

Chabot College, *Student Research Assistant*

Sept. 2022- May 2023

- Developed data visualizations to track student progression metrics (graduation/transfer rates), identifying key performance trends that informed targeted academic support projects and strategic advisement.
- Analyzed survey data from 300+ students to develop data-driven recommendations for enhancing student life programs.

PROJECTS

Healthcare Access for Transitional-Aged Youth (Fall 2025) - Researched healthcare access barriers for youth; conducted data analysis and visualization using Pandas and Matplotlib in collaboration with Aspiranet.

Spam VS Ham (Spring 2025) - Built a logistic regression classifier with NLP feature engineering in scikit-learn, optimizing accuracy through text preprocessing and validation.

IQRA (Spring 2024) - Designed a SaaS product pitch in Figma for an educational platform aimed at increasing digital learning access in developing regions.

Movie Classifier (December 2023) - Developed a k-NN classifier in Python using A/B testing and text-based features to categorize movies from textual data.

COVID Trend Analyzer (Spring 2023) - Built a COVID-19 trend forecast model in MATLAB using regression analysis on COVID datasets.

EXTRACIRCULAR

Muslim Tech Collaborative

Fall 2023-Spring 2025

Co-instructed a 6-week programming bootcamp for 25+ students from underrepresented backgrounds.

Muslims of Haas

Fall 2023-Spring 2024

Proposed an educational SaaS solution to improve learning access for women and girls in emerging markets.
