Grand Rapids, MI | 609-250-5170 | mohanaa.alapati@gmail.com | www.linkedin.com/in/mohana-alapati/

Summary

Detail-oriented Data Analyst / Junior Data Scientist with a Master of Science in Data Science and 2 years of hands-on experience in data extraction, cleaning, SQL querying, exploratory data analysis (EDA), and building interactive dashboards. Proficient in Python (Pandas, NumPy), SQL, Power BI/Tableau, and cloud data tools (Redshift-style pipelines, Databricks, Spark). Passionate about transforming complex datasets into actionable insights, automating reporting workflows, and supporting data-driven decisions in analytics, operations, and business intelligence roles.

Education

Western Michigan University | Kalamazoo, Michigan

April 2025

Master of Science in Data Science, GPA 3.6

Skills

Programming & Scripting Languages: SQL, Python, R

Visualization: Power BI, Tableau, Jupyter Notebooks, Databricks

Tools/Technologies: Excel, Google Sheets, SSMS

Cloud & Big Data: AWS, ETL, BigQuery, GCP

Python Libraries: NumPy, Pandas, Matplotlib, PySpark

Machine Learning Techniques: Logistic Regression, Decision-Trees and Random Forests, Linear Regression

Experience

Data Coordinator | Western Michigan University June 2023 – September 2025

- Led end-to-end data reporting and analytics initiatives to support university operations and strategic planning.
- Partnered with stakeholders to **analyze event, scheduling, and traffic datasets**, delivering insights to optimize room usage, resource allocation, and operational efficiency.
- Designed and maintained **automated reporting pipelines** using Python and SQL to monitor utilization trends, reducing manual data processing time by 40%, and improving data reliability.
- Developed interactive **Power BI dashboards** to track key performance indicators, enabling leadership to make data-driven decisions and reducing recurring reporting effort.
- Conducted **data validation, cleansing, and reconciliation** to ensure accuracy and consistency across multiple data sources used for institutional reporting.
- Established analytical relationships across historical usage patterns, seasonal trends, and academic calendars to **forecast demand and support long-term planning and budgeting**.
- Delivered actionable insights that **improved decision-making efficiency by 50%**, directly supporting FY2026 planning and budget forecasting initiatives.

Projects

Customer Retention & Behavioral Analysis

(SQL | Python | Power BI)

- Analyzed user transaction and engagement data to identify key drivers of customer retention and churn
- Performed cohort analysis and customer segmentation using SQL and Python (Pandas)
- Built KPI dashboards in Power BI to track retention rate, churn risk, and customer lifetime value
- Simulated A/B test scenarios to evaluate feature impact on user engagement
- Delivered actionable insights that could improve retention by 15–25%

Operational Downtime Analysis & Dashboarding

(SQL | Python | Databricks)

- Analyzed manufacturing downtime data to identify root causes of unplanned production stops
- Cleaned and transformed large datasets using Python and SQL in Databricks environment
- Built interactive dashboards in Power BI to monitor downtime trends, failure frequency, and production loss
- Identified key factors contributing to downtime, enabling potential reduction in unplanned stops by 20%
- Automated reporting pipeline to reduce manual analysis time and improve data accuracy

Certifications

- **Databricks Certified Data Analyst Associate** (2025)
- **Databricks Generative AI Fundamentals** (2025)
- **Microsoft Certified: Power BI Data Analyst Associate** (2023)
- **Google Data Analytics Professional Certificate** (2022)
- **IBM Data Science Professional Certificate** (2022)
