Education

University of Pennsylvania | Philadelphia, PA

Aug 2019-Dec 2023

- Bachelor of Arts in Philosophy, Politics, & Economics
- Minor in Data Science & Analytics
- GPA: 3.77/4.00

Skills

- SQL, Python (Pandas), Looker, Excel, PowerBI, R, Java, Tableau, Google Analytics

Experience

Wayfair, Business Analyst | Boston, MA

Sep 2024-Feb 2025

- Boosted profit margins by 12% across 1M+ products by developing new pricing strategy, leveraging SQL for price calculations and running controlled simulations to isolate causal impact
- Reduced pricing simulation runtimes by 20% through script refactoring and Quality Assurance testing in SQL on 50M+ rows of data, working cross-functionally with 15+ analysts and engineers to overhaul backend system
- Diagnosed \$500K+ in revenue loss from uncompetitive pricing using Looker dashboards on 2 years of data, communicating results to non-technical supplier teams to adjust pricing and close competitiveness gaps
- Drove price corrections on 200K+ products by conducting quality assurance testing on 10+ promotions, identifying pricing gaps through advanced SQL querying (window functions and CTEs)

Paramount, Product Analyst Internship | New York, NY

Jun 2023-Aug 2023

- Delivered white space analysis and marketing campaign proposal to C-level executives, collaborating with two independent teams and 30+ product, marketing, and data stakeholders
- Generated \$1M+ in additional revenue by spearheading growth strategy for Paramount's physical retail products on Walmart's e-commerce platform, leveraging Excel Pivot Tables to identify high-performing product categories
- Identified \$2.5M+ in revenue across all of Paramount's e-commerce channels by aggregating and analyzing multi-source sales data on Excel, informing strategic merchandising and marketing initiatives

Amazon, Program Manager Internship | Seattle, WA

Jun 2022-Sep 2022

- Achieved \$7M+ in cost savings opportunities by pulling data with SQL and inputting them in multivariate regression in Excel to optimize pick path efficiency across 56 fulfillment sites
- Identified 12 key cost drivers in order packaging through 20+ cross-functional interviews with operations, product, and engineering stakeholders, translating insights into quantifiable cost analysis to drive efficiency
- Quantified \$2M+ in operational costs by standardizing unstructured data into categorical variables, creating strategy for data transformation and guiding warehouse associates in data collection

Wharton External Affairs, Data Analytics Assistant | Philadelphia, PA

Sep 2020-Apr 2023

- Developed Excel training manual for 20+ employees on data cleaning, reporting, and visualization
- Led metrics-driven FAQ updates for 100K+ Wharton alumni, analyzing common issues with Excel PivotTables
- Optimized 20+ alumni sites by identifying low-traffic pages with Google Analytics and updating site pages

Research & Leadership Experience

University of Pennsylvania Department of Sociology, Research Assistant | Philadelphia, PA

Jan 2023-May 2023

- Designed regression models with R using 225 datasets for Ph.D. Fellow's dissertation on Income Inequality
- Facilitated data science process by wrangling and building models with 1M+ rows of data in Excel and R
- Condensed technical steps of data science process into half-page guide for department-wide reproducibility

Consult for America, Project Manager

Sep 2020-May 2023

- Advised CEOs of 4 tech startups by leading 30+ members, delivering recommendations to executive leadership
- Completed four 8-week client projects on time by structuring workflows with Agile methodology

Additional Information

- Honors & Awards: 1st Place in Product Design Competition (2023), 1st Place in Wharton Undergraduates in Public Policy Case Competition (2021), 1st Place in Marketing Simulation Competition (2020)
- Interests: Boulderling, Photography, Running, Anime, Asian-American & LGBTQ Literature, EDM
