Senior Business Analyst | Project Manager | Scrum Master

Results-driven and business-savvy Senior Business Analyst / Project Manager with 12+ years of cross-functional experience leading digital transformation, enterprise analytics, and CRM modernization initiatives across healthcare, payments, insurance, and cybersecurity domains. Adept at bridging the gap between business needs and technology delivery by translating strategic goals into executable roadmaps, scalable systems, and agile project plans. Recognized for leading global teams, owning enterprise platforms like Salesforce, Power BI, Oracle, Eloqua, and successfully delivering high-visibility projects across stakeholder ecosystems.

- Proven track record in driving enterprise-wide CRM, data migration, and reporting platform upgrades across Healthcare, FinTech, and Insurance verticals.
- Expertise in gathering business requirements, creating user stories, and managing product backlogs using tools like JIRA, Confluence, and Azure DevOps.
- Hands-on experience in Salesforce, Power BI, Eloqua, Adobe, e-Magnus, and custom-built enterprise reporting tools for both marketing and operations.
- Led Agile/Scrum ceremonies and release planning across multiple sprints, ensuring stakeholder alignment and continuous delivery.
- Proficient in MDM & Data Governance practices; managed legacy-to-modern migrations with zero disruption to mission-critical business functions.
- Delivered multi-region releases and managed QA/UAT across distributed teams (U.S., India, Europe), ensuring consistent communication and delivery cadence.
- Owned full project lifecycle from initiation through post-deployment support—covering scope, risk, change, communication, and stakeholder management.
- Comfortable working in hybrid Agile-Waterfall environments and translating ambiguous business problems into clearly scoped technical deliverables.
- Known for driving collaborative team culture, mitigating delivery risks early, and ensuring measurable ROI through every initiative.

TECHNICAL SKILLS

Project Management	JIRA, MS Project, Confluence, SharePoint, Trello, Smartsheet

WORK EXPERIENCE

Novartis – Remote (Dallas TX)

Senior Business Analyst / Project Manager

Feb 2023 – Present

Served as a strategic liaison between business stakeholders and IT teams to drive initiatives within Novartis's commercial and medical operations. Led cross-functional projects aimed at implementing Salesforce-based platforms, data-driven decision support systems, and integrated workflow tools. Spearheaded the full project lifecycle from business requirements gathering through delivery and adoption across enterprise functions.

Key Responsibilities

- Acted as the primary point of contact between IT and business units, translating complex business needs into actionable technical requirements and user stories.
- Gathered, analyzed, and documented functional and non-functional requirements across commercial, regulatory, and medical domains.
- Led requirements elicitation sessions with stakeholders, SMEs, and cross-functional teams using workshops, interviews, and workflow analysis.
- Developed BRDs, FRDs, process maps, and current/future state diagrams using MS Visio, ensuring alignment with Novartis business strategy.
- Managed project timelines, budgets, and dependencies; ensured seamless coordination between business analysis and project delivery functions.
- Oversaw the development, testing, and deployment phases, validating deliverables against business requirements and ensuring UAT success.
- Implemented change management protocols and impact assessments to control scope and ensure stakeholder alignment throughout the SDLC.
- Created dashboards and executive reports for program sponsors using PowerPoint and Tableau; facilitated steering committee updates and status reviews.
- Collaborated with Salesforce.com deployment teams, identifying integration points, data migration needs, and system enhancements.
- Led workshops and training sessions post-deployment to drive user adoption and process standardization across departments.
- Utilized JIRA and Confluence to manage product backlogs, trace requirements, and maintain documentation within Agile and hybrid project environments.

Environment - Salesforce.com | JIRA | Confluence | Tableau | MS Visio | MS Project | SAP ERP | Agile / SAgile | SDLC | Power BI (exposure) | SharePoint | Microsoft Office Suite

Infosys | Waste Management – Houston, TX

Senior Business Analyst / Project Manager

Aug 2022 – Jan 2023

Led a high-impact Power BI reporting upgrade initiative within Waste Management's digital analytics ecosystem, focusing on streamlining site hierarchy classification from Version 3 to Version 4. The project aimed to improve enterprise visibility into recycling operations, enabling more granular and actionable insights across 500+ operational sites. Collaborated with onshore and offshore teams to deliver analytics modernization aligned with executive-level reporting requirements.

Key Responsibilities

- Collaborated with data and analytics teams to define reporting requirements for upgraded Power BI dashboards focused on sustainability and recycling KPIs.
- Served as the primary liaison between business stakeholders and Power BI development teams for the V3 to V4 hierarchy migration initiative.
- Facilitated backlog refinement, sprint planning, and story prioritization using Agile Scrum methodologies and Atlassian Jira.
- Authored user stories, acceptance criteria, and process flow documentation aligned with technical and business objectives.
- Orchestrated end-to-end release planning and delivery cycles, including coordination of monthly and quarterly production deployments.
- Coordinated defect triage, change request reviews, and post-release validation processes across global teams.
- Facilitated daily stand-ups, sprint retrospectives, and stakeholder review sessions, ensuring transparency and sprint velocity.
- Shared reporting insights and best practices in cross-functional user group meetings, advocating for continuous improvement.
- Managed stakeholder expectations by providing timeline forecasts, risk assessments, and mitigation strategies for deliverables.
- Led global collaboration with geographically dispersed teams in India, the Philippines, and the U.S., optimizing timezone overlaps for round-the-clock progress.

Environment - Power BI | Atlassian Jira | Agile / Scrum / Kanban | SharePoint | Azure DevOps (basic exposure) | MS Teams | Excel | User Story Mapping | SDLC | Global Delivery Model

Paya, Inc. – Atlanta, GA

Business Analyst

Apr 2021 – Jun 2022

Supported multiple financial platform enhancement initiatives across Paya's integrated payments ecosystem, including modernization of back-office tools and customer-facing reporting platforms. Worked closely with cross-functional teams to drive backlog grooming, change control, and release coordination for systems such as e-Magnus and MOR (My Online Reports), supporting over 100K merchants.

Key Responsibilities

- Analyzed business processes for payment acceptance and settlement systems; collaborated with stakeholders to define functional requirements and system behavior.
- Led day-to-day Agile ceremonies including backlog grooming, sprint planning, stand-ups, and retrospectives as part of the BA role in a cross-functional Agile team.
- Authored and maintained user stories with clear acceptance criteria in Jira; collaborated with QA and dev teams to ensure accurate test coverage and delivery.
- Partnered with product owners and SMEs to refine backlogs, prioritize enhancements, and plan iterative sprint goals across digital product lines.
- Facilitated resolution of technical blockers by coordinating across development, QA, and release teams using Scrum and Kanban principles.
- Conducted impact analysis for change requests and coordinated end-to-end delivery including regression testing and UAT support.
- Managed release planning activities, including creation of release notes, stakeholder communications, and post-deployment monitoring.
- Delivered continuous support for legacy payment systems, including enhancements, hotfixes, and production incident management.
- Supported strategic initiatives to increase customer satisfaction by enhancing reporting capabilities and improving data transparency.

Environment - e-Magnus | MOR (My Online Reports) | Atlassian Jira | Confluence | Agile (Scrum / Kanban) | MS Excel | SDLC | SQL (basic familiarity) | Release Planning | Cross-functional Collaboration
Cardinal Health Inc. – Houston, TX
Scrum Master / Project Manager
Feb 2020 – Apr 2021

Oversaw Agile delivery for Salesforce CRM optimization initiatives within the Sales and Marketing divisions, enhancing workflows around pricing, voucher processing, and lead management. Managed both strategic transformation projects and tactical enhancements to streamline customer engagement and product tracking across multiple healthcare product lines.

Key Responsibilities

- Led cross-functional Agile teams focused on modernizing Salesforce modules for lead generation, pricing strategy, ticket resolution, and voucher tracking.
- Guided teams through sprint planning, stand-ups, demos, and retrospectives; used Agile games and techniques to boost engagement and innovation.
- Collaborated with product owners and business stakeholders to define and manage backlogs, ensuring high-priority items aligned with commercial goals.
- Tracked burndown charts, sprint velocity, and blocker resolution using MS Excel and MS Teams reporting templates.
- Executed project plans across hybrid Agile-Waterfall environments, managing scope, risk, and change control for both strategic and operational initiatives.
- Supported adoption of Salesforce CRM features by training end-users and gathering feedback to inform future releases.
- Facilitated change request evaluations and defect triaging to improve Salesforce stability and end-user experience.
- Delivered ongoing communication to senior stakeholders through dashboards, metrics, and presentation decks using MS PowerPoint and Excel.
- Removed team impediments and acted as a servant leader to drive on-time, high-quality delivery within distributed team structures.
- Fostered a collaborative and transparent team culture, significantly improving retrospectives and velocity across sprints.

Environment - Salesforce CRM | Agile (Scrum / Kanban) | MS Excel | MS Teams | MS PowerPoint | Confluence | Jira (basic exposure) | Waterfall / Hybrid Delivery Models | Healthcare Product Management

McAfee Inc. – Plano, TX
Business Analyst
Dec 2012 – Jan 2020

Led enterprise-wide Sales and Marketing platform initiatives for McAfee's global operations, ensuring data integrity, system modernization, and alignment of CRM/MDM tools with corporate go-to-market strategies. Oversaw system upgrades, migration efforts, and enhancements across Salesforce, Adobe, Eloqua, and Oracle-based platforms—impacting user groups across North America, EMEA, and APAC.

Key Responsibilities

- Owned end-to-end lifecycle management for global Sales and Marketing platforms, including strategy, roadmap, and stakeholder alignment.
- Delivered multiple system enhancements, data governance protocols, and tool migrations—ensuring business continuity and system scalability.
- Collaborated with marketing, sales operations, and IT to identify business enrichment opportunities by refining and applying business rules within marketing automation platforms.

- Managed global cross-functional teams responsible for system design, development, QA, and deployment of marketing tools and CRM upgrades.
- Drove data quality initiatives using Master Data Management (MDM) tools, improving segmentation, lead scoring, and campaign attribution accuracy.
- Administered Salesforce CRM, Adobe Marketing Cloud, Eloqua, and Oracle tools; coordinated system configuration, security settings, integrations, and user access.
- Spearheaded the migration of legacy marketing systems to next-gen platforms, minimizing downtime while enhancing functional capabilities.
- Established governance models for data consolidation and cross-platform reporting between Sales, Marketing, and Finance departments.
- Led monthly and quarterly release cycles, including validation, stakeholder sign-off, and post-release support.
- Served as a primary SME for Marketing and Sales data ecosystems, supporting audits, compliance reviews, and executive data requests.

Environment - Salesforce CRM | Adobe Marketing Cloud | Eloqua | Oracle CX | Master Data Management (MDM) | Data Governance | Agile (Scrum/Kanban) | System Migration | Enterprise CRM/MarTech Tools | Global Stakeholder Engagement

State Farm Insurance – Bloomington, IL
Project Coordinator / Business Analyst
Dec 2011 – Nov 2012

Supported enterprise-level IT initiatives focused on enhancing claims and policy systems through structured project coordination and business analysis. Acted as a liaison between requirements, development, and testing teams to ensure clear communication, accurate documentation, and successful execution across multiple project phases.

Key Responsibilities

- Assisted in managing full Software Development Life Cycle (SDLC) processes by applying project management best practices across scope, schedule, and quality control.
- Partnered with business and technical teams to define and document requirements, ensuring alignment with project objectives and functional design.
- Facilitated communication between stakeholders and cross-functional IT teams to drive clarity on application features and technical constraints.
- Coordinated change control activities by revising documentation (requirements, specifications, and test plans) based on scope updates and stakeholder feedback.
- Logged, tracked, and validated defects across multiple testing phases, working closely with QA and development teams to ensure timely resolution.
- Supported Agile ceremonies, including backlog grooming and sprint tracking, while contributing to story testing and defect life cycle management.
- Monitored project progress through status reports and milestone tracking, identifying risks and supporting escalation processes where necessary.
- Played a key role in ensuring that test entrance/exit criteria were maintained, supporting high-quality UAT and system deployment.
- Promoted a culture of continuous communication, ensuring all technical changes were clearly understood by impacted teams and stakeholders.

Environment - Agile / Waterfall | SDLC | MS Excel | MS Project | Jira (Basic) | Requirements Gathering | Defect Management | UAT Support | Cross-functional Coordination | Documentation & Change Management
