EDUCATION

Cornell University

B.S in Operations Research & Information Engineering

Ithaca, NY

June 2018 - May 2022

WORK EXPERIENCE

Healthie

Remote

Finance & Billing Analyst (Contract)

February 2025 - April 2025

- Provided customer support by answering inquiries related to Healthie's billing, subscription plans, and payment processing.
- Managed collections and payment transactions using Stripe, ensuring accurate customer account updates.
- Reviewed and analyzed customer contracts to facilitate seamless onboarding onto Healthie's platform.
- Calculated key financial KPIs, including revenue and collections data from Excel and Salesforce, in weekly finance meetings to support business decision-making.

Nomura Holdings

New York, NY

Technology Analyst

May 2023 – July 2024

- Developed and enhanced backend functionality for a risk management application using Python and Java, optimizing data processing efficiency.
- Designed a Java-based serialization system to streamline data archiving and ensure data integrity.
- Conducted data analysis on financial risk data in Excel and implemented SQL updates, reducing execution times and improving data accuracy.

Cornell University

Ithaca, NY

Teaching Assistant

June 2021 – August 2021

- Assisted in teaching MATH 1910 (Calculus for Engineers) to pre-freshman engineering students, providing individual and group support to enhance comprehension.
- Developed review materials and interactive activities to reinforce key calculus concepts and improve student performance.

PROJECTS

Simulation Modeling Project

- Applied simulation techniques (bootstrapping, event modeling) to optimize emergency helicopter placement.
- Analyzed and cleaned data using Python (Pandas), leading to a 3% reduction in helicopter utilization while maintaining coverage.
- Delivered a comprehensive report, showing insights and actionable recommendations for resource optimization.

Data Science/Analytics Project

- Analyzed domestic flight delays using Python (Pandas, NumPy) and SQL to identify key delay factors.
- Developed and optimized predictive models (linear/logistic regression) to enhance accuracy and performance evaluation.
- Created Tableau visualizations and authored analytical reports to present insights and support stakeholder decision-making.

OTHER SKILLS

Programming Languages: Python, MATLAB, R, Java (Spring Boot), SQL (SQLite, MSSQL, Oracle SQL)

Packages: Python – Pandas, Numpy, Matplotlib, Seaborn, Scikit Learn, Keras

Other Tools: Tableau, PowerBI, Excel (Google Sheets), Jenkins, Monday.com, Postman, Maven, Linux, Unix, GitLab, Git, Jira, Stripe, HelpScout, Salesforce

Languages: Fluent in English, Proficient in Mandarin Chinese, Spanish & French
