SUMMARY

- **10+ years of experience designing and delivering end-to-end BI and analytics solutions** that empower strategic business decisions across multiple domains.
- Expert in Power BI, Tableau, Oracle Analytics Server (OAS), and OBIEE, creating highly interactive dashboards, role-based reporting, and drill-down visualizations.
- Proven ability to translate complex datasets into actionable insights through advanced DAX, Power Query transformations, and dynamic visual storytelling.
- Skilled in data modeling, ETL processes, and data cleansing, ensuring data accuracy and consistency using SQL, Power Query, and built-in BI validation tools.
- Designed and deployed custom KPIs, calculated measures, and hierarchical navigations to support targeted performance monitoring for executives and analysts.
- Developed secure, role-based access controls in BI reports, ensuring sensitive data is viewed only by authorized users without compromising usability.
- Experienced in Agile/Scrum environments, collaborating with cross-functional teams and stakeholders to iteratively refine requirements and deliver analytics products with rapid value delivery.

SKILLS

Languages:

Python, Power Query, DAX

BI & Analytics:

OBIEE 11g/12c, Oracle Analytics Server, BI Publisher, Tableau Desktop, Tableau Server, Power BI, SSRS

Databases:

PL/SQL, Postgres SQL, Microsoft SQL Server

ETL Tools:

SSIS, Tableau Prep Builder

Software & Tools:

ServiceNow, SPSS, Microsoft Office, Jira

Data Analytics & Science:

Exploratory Data Analysis, Data Warehousing, Data Wrangling, Data Manipulation, Data Visualization, Statistical Analysis

Cloud Technologies:

Oracle Analytics Cloud

Data Modeling:

Star Schema, Dimensional Modeling

Methodologies:

SDLC, Agile, Scrum, Kanban, Waterfall

Operating Systems:

Windows, Linux

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate | Oct 2024
- Tableau Certified Data Analyst | Sep 2024
- Oracle Cloud Infrastructure 2023 Certified Enterprise Analytics Professional | Sep 2023

EDUCATION

Master of Public Health (MPH), Specialization in Medical Informatics

University of South Africa

| 2011

Bachelor of Science in Public Health

Haramaya University

| 2002

EXPERIENCE

Senior BI Developer

| Mar 2024 – Present

McKinsey & Company, Chicago, IL

- Collaborated with cross-functional teams to gather business requirements and translate them into data-driven reporting strategies, aligning BI outputs with strategic objectives and KPIs.
- Designed conceptual and physical data models in collaboration with DBAs, forming the foundation for consistent, scalable, and high-performance analytics pipelines.
- Developed custom Oracle tables and optimized complex SQL queries to support efficient ETL processes, ensuring seamless data flow and minimal latency.
- Engineered automated data cleaning pipelines, transforming unstructured data from flat files into structured Oracle datasets with enhanced data accuracy and reliability.
- Led the upgrade and migration from OBIEE 12c to Oracle Analytics Server (OAS), ensuring continuity of reporting, zero data loss, and improved system performance post-migration.
- Troubleshoot OBIEE-to-OAS configuration issues, safeguarding data integrity & optimizing report delivery in new environment.

- Customized Oracle Analytics interfaces, including OAS login and UI elements, aligning with brand standards and replicating legacy system aesthetics via XML configurations.
- Leveraged Power BI Composite Models to integrate DirectQuery and Import data modes, enabling scalable real-time analytics across large datasets.
- Empowered business units through training sessions and workshops on OAS and Power BI, promoting a self-service analytics culture and improving data literacy.
- Developed reusable, role-based reports and dashboards, incorporating drill-downs, filters, and dynamic slicers to ensure tailored and intuitive user experiences.

Senior BI Consultant

| Apr 2018 – Feb 2024

Infosys Limited, Indianapolis, IN

- Designed and developed dynamic dashboards using Power BI, Tableau, and OBIEE/OAS with interactive drill-downs, slicers, and conditional formatting, enhancing data visibility and decision-making for business users.
- Engineered robust metadata models in OBIEE/OAS, leveraging star schemas, dimensional hierarchies, and BMM layer optimizations to deliver high-performance analytics and accurate aggregations.
- Built reusable BI Publisher data models and templates, ensuring seamless reporting migration from Hyperion to OBIEE and maintaining report consistency and accuracy across platforms.
- Transformed complex datasets using Power Query and Tableau Prep, cleaning, shaping, and integrating multiple data sources to ensure quality inputs for reporting and analytics.
- Implemented advanced DAX measures and Composite Models in Power BI, supporting complex business logic, enabling cross-source analytics, and reducing refresh times across large datasets.
- Optimized dashboard performance by tuning dataflows, applying best practices in visualization design, and utilizing tools like Power BI Performance Analyzer and Tableau performance tracking.
- Implemented robust ETL workflows using SSIS, streamlining data integration from multiple sources into enterprise data warehouses to support timely decision-making.
- Created and documented detailed data lineage and logic flows, ensuring data traceability, transparency, and compliance across reporting environments.
- Led training workshops for business teams, enabling self-service BI adoption and empowering end-users with knowledge of Tableau, Power BI, and OBIEE/OAS tools and best practices.
- Built advanced dashboards in Tableau and Power BI, utilizing calculated fields, parameters, and DAX to deliver rich, interactive visualizations across departments.

Senior Business Intelligence Engineer **Insight Global**

| Jan 2022 - Dec 2022

- Designed and delivered business-critical analytics and operational reports using Tableau, enabling data-driven decision-making across various departments.
- Developed and maintained clean, informative KPI dashboards in Tableau, empowering business users to make actionable, data-informed decisions.
- Built scalable, intuitive, and high-quality Tableau dashboards that align with business requirements and user needs, ensuring seamless adoption and usability.
- Partnered with cross-functional leaders to gather reporting requirements and design actionable data strategies that drive measurable business outcomes.
- Conducted knowledge transfer (KT) training sessions and workshops on Tableau best practices, fostering a culture of data-driven decision-making and standardization.
- Performed Tableau Server administration, including project/subproject creation, permission management, ownership assignments, and access control for users/groups, adhering to company standards.
- Authored job aids and SOPs for permission standards, data sources, and workbook migrations, ensuring consistency, accuracy, and reliability in analytics processes.
- Implemented proactive monitoring by creating alerts to identify and address broken data sources, stale content, and other potential issues, ensuring data integrity and system performance.

Data Analyst

| Feb 2015 – Apr 2018

Harris County Public Health, Houston TX

- Optimized reporting templates and key performance indicators (KPIs) to enable data-driven decision-making.
- Designed interactive Power BI and Tableau dashboards to monitor program performance, track KPIs, and deliver real-time insights.
- Prepared and transformed datasets from multiple sources using Power Query, ensuring high-quality and reliable data for reporting.
- Created advanced data visualizations, including trend analyses and drill-through reports, to support public health initiatives and provide actionable insights.
- Conducted statistical analysis of patient satisfaction surveys using SPSS, delivering evidence-based recommendations to stakeholders.
- Produced monthly, quarterly, and ad-hoc reports in Power BI & Tableau to inform strategic health programs and operational decisions.
- Performed ad-hoc data analysis to address specific business needs and support operational decision-making.
- Monitored and improved the performance of reports and dashboards to ensure user satisfaction and functionality.
- Forecasted contraceptive demand and analyzed supply chain needs to ensure accurate inventory levels and timely distribution to healthcare facilities.
- Predicted contraceptive demand to enhance supply chain planning and distribution efficiency.
