San Diego, CA

SUMMARY

Experienced professional with 9+ years in project and operations management, specializing in financial and process analysis through Excel and PowerBI, IT procurement, strategic sourcing, and vendor relationship management. Proven track record of financial auditing leading to over \$500,000 discovered to reapply to accounts, developing and utilizing Excel reports to reduce costs averaging 20%, and optimizing business processes to reduce operational costs averaging 15% through data analysis and ERP systems.

WORK EXPERIENCE

Scripps Research Institute

Sept. 2023 – May 2023

Program Coordinator & Financial Analyst

San Diego, CA

- Audited all financials, resulting in the discovery of over \$500,000 mis-reported as spent and placing back into laboratory funding.
- Through auditing and reporting, managed to cut down one laboratory's monthly budget from \$70,000 to \$50,000 per month.
- Created a complex Excel dashboard in conjunction with PowerBI for a live-reporting financial report for accurate account awareness.
- Conducted monthly financials meetings with multiple laboratories to streamline processes and further save on spending.

Crown Computers

July 2020 – Sept. 2023

Operations Coordinator & IT Sourcing Specialist

San Diego, CA (Remote)

- Negotiated vendor contracts incorporating milestone payments and amendment clauses, achieving an average of a 20% bid reduction by aligning contract specifications with performance-based milestones.
- Led strategic sourcing initiatives that secured favorable terms including data security provisions and end-of-life terms for consistent support.
- Cultivated a strong vendor relationship with Dell Computers and negotiated scalable service agreements that optimized costs and met service uptime guarantees, aligning with client project needs and ensuring consistent IT support.
- Established and maintained partnerships with key software providers such as VMware and Trusted Tech Team, negotiating custom contracts to ensure cost-effective solutions that addressed the unique requirements of each team.
- Sourced hardware solutions through Disc Tech to meet diverse client and internal needs, working closely with the vendor to ensure budget-conscious, high-quality hardware options that aligned with technical specifications.
- Identified and implemented Hudu as a training and knowledge base platform, customizing the site to create an internal training wiki that boosted team skills, leading to improved service delivery for clients through enhanced staff readiness and expertise.

San Diego Cash Register

Oct. 2015 – April 2020

Project Manager & Business Analyst | Nov. 2017 – April 2020

San Diego, CA

- Evaluated and recommended process improvements through comprehensive data analysis, leading to a 15% reduction in wasted labor hours.

- Identified and implemented Smartsheets as a project management solution, enhancing interdepartmental communication and project tracking, while securing cost-effective pricing aligned with budget constraints, and ensuring scalability to accommodate expanding departmental needs and accessibility compliance for all users.
- Monitored industry trends to integrate innovative technologies, improving service delivery and customer satisfaction.
- Spearheaded the integration of project management tools to facilitate the addition of a new product line rollout.
- Designed and implemented metrics to evaluate the effectiveness of IT solutions, ensuring continuous improvements.

Project Manager & Corporate Trainer | May 2016 – Nov. 2017

San Diego, CA

- Negotiated CRM contracts with ConnectWise, incorporating amendment clauses and usage-based milestones to ensure a cost-effective, flexible contract structure, which ultimately resulted in a 35% bid reduction.
- Provided technical training to end-users, ensuring a seamless experience with hardware and software solutions.
- Participated on the beta testing committee for implementing a new CRM, conducting in-depth demo evaluations and hands-on testing to assess functionality and compatibility, ultimately identifying the optimal solution for the company's operational needs.
- Developed customized installation plans for clients, addressing needs and ensuring that all aspects were covered.
- Developed comprehensive project plans that outlined scope, resources, and timelines to meet client objectives.

IT Solutions Architect | Oct. 2015 – May 2016

San Diego, CA

- Configured network infrastructure to support robust server environments and improve data accessibility for all teams.
- Developed and maintained a comprehensive knowledge base for recurring technical support solutions and resources.
- Developed disaster recovery plans and ensuring business continuity in case of system failures or data breaches.
- Led the resolution of complex technical issues, collaborating with cross-functional teams to ensure effective solutions.
- Developed and maintained relationships with clients to understand their needs and provide tailored IT solutions.
- Conducted on-site visits for hardware and software installations and troubleshooting, ensuring all systems were operational and met client specifications.
